Foundation English the Expression of Ideas (Classic Reprint) Nov 30 2020 Excerpt from Foundation English the Expression of Ideas As high school teachers we have been slow to arise to the occasion. Our teaching has often been too academic; we have copied the college methods without examining them to see

whether they were pedagogically sound as high school methods. The consequence has been that we have allowed our classes to drift along, with the burden of real preparation placed on the pupils of the upper classes. Such slipshod work as this not only has failed to prepare classes properly for college, but has left out of account those pupils who are not preparing for college, as well as those who leave school before the course is

completed. We are beginning to see, however, that English as well as other branches of study can be taught in a definite and logical manner; that the proper time for beginning the work, whether in preparation for college or for the world at large, is in the first year; that, sound as college methods may be for the college, they may; not be sound for the high school; that the whole of rhetoric should not be taught in the first year, or in any year, any more than

the whole of algebra or the whole of Latin; that a book containing all the principles of rhetoric is, at this early stage, in the highest degree confusing; and that practice under direction is essential to coherent expression. An Imperiled Generation Jul 19 2022 Without good schools, none of

America's hopes can be fulfilled. Since 1983, school reform has been at the top of the national agenda; however, there is a disturbing gap between rhetoric and results. After travelling to some of the nation's largest cities and interviewing administrators and teachers, Carnegie Foundation representatives determined the following priorities for improving urban schools: (1) affirm that every student can succeed; (2) build an effective governance arrangement for urban schools that ends excessively centralized, bureaucratic control; (3) introduce at every school a

comprehensive system of renewal that emphasizes preschool and early education, breaks schools into smaller units, defines curricular goals, ensures flexible scheduling, and improves facilities; and (4) create a network of support beyond the school that empowers parents, and involves community, business and government participation. A new National Urban Schools Program is proposed which would: (1) incrementally increase funding of Head Start so that all eligible children are served by the year 2000; (2) increase the appropriation for federal child

nutrition programs; (3) each year increase the funding for Chapter 1 of the Education Consolidation and Improvement Act by 5 percent; (4) add to the Education Consolidation and Improvement Act a provision enabling poor parents to place their children in afternoon and summer enrichment programs; (5) make summer fellowships available for teachers; (6) make available to school districts low interest loans to improve school facilities; (7) encourage schools to introduce new curriculum or scheduling arrangements; and (8) encourage cooperation between schools

and postsecondary institutions. Data are presented in six tables. (BJV)

Encyclopedia of the Social and Cultural

Foundations of Education Oct 22

2022 More than any other field in

education, the social and cultural foundations of education reflect many of the conflicts, tensions, and forces in American society. This is hardly surprising, since the area focuses on issues such as race, gender, socioeconomic class, the impact of technology on learning, what it means to be educated, and the role of teaching and learning in a societal context. The Encyclopedia of the Social and Cultural Foundations of Education provides a comprehensive introduction to the social and cultural foundations of education. With more than 400 entries, the three

volumes of this indispensable resource offer a thorough and interdisciplinary view of the field for all those interested in issues involving schools and society. Key Features · Provides an interdisciplinary perspective from areas such as comparative education, educational anthropology, educational sociology, the history of education, and the philosophy of education · Presents essays on major movements in the field, including the Free School and Visual Instruction movements · Includes more than 130 biographical entries on

important men and women in education · Offers interpretations of legal material including *Brown v. Board of Education*(1954) and the GI Bill of Rights · Explores theoretical debates fundamental to the field such as religion in the public school curriculum, rights of students and teachers, surveillance in schools, tracking and detracking, and many more · Contains a visual history of American education with nearly 350 images and an accompanying narrative Key Themes · Arts, Media, and Technology · Curriculum · Economic Issues ·

Equality and Social Stratification · Evaluation, Testing, and Research Methods · History of Education · Law and Public Policy · Literacy · Multiculturalism and Special Populations · Organizations, Schools, and Institutions · Religion and Social Values · School Governance · Sexuality and Gender · Teachers · Theories, Models, and Philosophical Perspectives · A Visual History of American Education *Improving Your School One Week at a Time* Feb 14 2022 First Published in 2006. Foundations of American Education Jan 01 2021 For courses in Foundations of Education and Introduction to Teaching. Focuses on becoming an effective teacher in challenging times. Education constantly changes- and teachers need to continue learning through professional development and educational research to improve their performance in tomorrow's classrooms. Foundations of

American Education addresses the realities and challenges of teaching head on. With many new references and an emphasis on emerging trends that are impacting our schools, such as the Common Core Standards, Every Student Succeeds Act (ESSA), and social and global networking, this text encourages students to embrace new methods of instruction. Concepts are explored through current discussions of theory and practice in such critical areas as advocacy, legislation, and the current social, political, and economic climate.
