**As humans, we get to choose what we believe and who we want to be. This book is a ruthlessly pragmatic guide to creating your own answers to life's biggest questions. Each of this book's four chapters covers one of the most important questions a person must ask themselves: - What is the purpose of my life?- How can I best realize the purpose of my life?- Who do I want to be?- How do I want other people to think of me?Rather than give you answers to these questions, this guide provides a framework that helps you develop your own answers while equipping you with the neuroscientific tools necessary to transform yourself into whomever you choose to be. If you are looking for a light read that will make you feel good about yourself, this isn't the book for you. If you want to take the time to think hard, take full ownership of the person you have allowed yourself to become, and permanently transform yourself into the best iteration of that person then you have found your book. "No other work treating Indian philosophy on a comparable scale contains the illuminating comparisons between doctrines of Indian schools and the thought of Western philosophy ranging from Plato to Sartre and Wittgenstein...It will, moreover, contribute to the understanding of Western philosophy by Indian thinkers and vice versa...Raju has an intimate acquaintance with a remarkable range of Western thinkers and this distinguishes his work from most of what has gone before...Raju, moreover, is himself a critical thinker and consequently, although he has written a history, he treats the ideas and doctrines in a philosophical mode and his assessments of positions are often**

**original and illuminating." -- John E. Smith, Clark Professor of Philosophy, Yale University "Purpose: To deal with Indian philosophy in a fashion reflecting the way the best German historians of philosophy deal with Western philosophy...The book is remarkable for its comprehensiveness in combination with extensive critical discussions...Raju's book...is more critical than Radhakrishnan's and more philosophical than Dasgupta's. Radhakrishnan's comments are far less philosophically sophisticated and interesting than Raju's....a monument to a senior Indian philosopher's lifelong study and thoughtful critical consideration of the great classical systems of his tradition." -- Karl H. Potter, Professor of Philosophy, University of Washington "Raju's credentials are impeccable. He is one of the few scholars in the world who could presume to write a major work on Indian thought. Accordingly, his knowledge of the Indian schools is accurate and impressive. To the extent that one of his intentions is to cast those schools in terms which make them more intelligible to western readers, his work measures up very well." -- Harold H. First, I have found that incredible insights from enlisted leaders exist across the Air Force yet are only available to those who personally know a given leader. This book is intended to help shine a light on these dimly lit corners of our organization so every Airman can benefit from the wisdom of our most experienced military leaders. Second, we all make assumptions about what senior leaders in our organizations want from us. I know I'm guilty of this and have unintentionally acted without understanding, causing me to engage in unproductive behaviors at times throughout my career. So instead of going down the same path many of us have, how about we do something different? Instead of making you operate in the dark without a guiding light, how about we illuminate your understanding around a few big topics by providing thoughts and insights from senior enlisted leaders. This undertaking was intended to help you learn from a broad and diverse range of experiences by our senior enlisted cadre, with the hope that their thinking will guide your actions and create purposeful, constructive behaviors across all levels. As you'll see soon, some answers are concise and direct while others are long and winding. This result is intentional and meant to mimic the varying leadership styles you'll encounter over the course of your career. Ultimately, our hope is that you'll find answers that help guide you in your stage of life or career.
