The F-82 "Twin Mustang" was conceived during WWII as a long-range fighter escort. Like the P-51, it was designed by North American's brilliant engineer, Edgar Schmued. The F-82 utilized two extended P-51 fuselages, mounted to a newly-designed center wing and tail. The plane incorporated new propeller assemblies and a unique, four-wheel landing gear. In short, while the plane would be cosmetically similar to the Mustang, in reality it was an entirely new beast. The F-82 wasn't ready before WWII ended, but the program escaped cancellation, and planes entered operational service in 1948. The F-82 became the last piston-powered fighter ordered by the USAF. It flew as an escort for

SAC B-29s, and with distinction as a night fighter in Korea. It was retired in 1953. Originally printed by the USAF and North American, this pilot's handbook provides a glimpse inside the cockpit of this warbird. The epitome of grace, beauty and design, the Supermarine Spitfire was one of the most deadly fighters of WWII. The Spitfire prototype, designed by Supermarine's Chief Designer R.J. Mitchell, first flew in 1936. By the time the Battle of Britain began in earnest, nineteen Spitfire squadrons were available to the RAF. Their pilots were most often tasked with engaging Luftwaffe fighters, including the Bf-109. With its superior maneuverability, it proved more than a match.
