Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz - rich cars, poor quality. Mini celebrates 60 amazing years of this iconic car, from its revolutionary introduction to the popularity of its new-generation models. The first two-door Mini, introduced in 1959 and built until 2000, revolutionized automotive design with its innovative front-wheel-drive layout that made the car appear bigger on the inside than the outside. In 1999, the Mini was voted the second most influential car of the 20th century, behind the Ford Model T. Designed for British Motor Corporation (BMC) by Sir Alec Issigonis and manufactured in England, Australia, Spain, Belgium, Chile, Italy, Portugal, South Africa, Uruguay, Venezuela, and Yugoslavia, the Mini was as successful in competition as it was on the street, winning the Monte Carlo Rally four times from 1964 through 1967. Originally built by BMC, the Mini's later parent company, Rover, was acquired by BMW in 1994. In 2000, BMW sold most of the Rover Group but retained the Mini brand. The last and 5,387,862nd original Mini rolled off the production line in October, 2000. In July 2001, BMW launched production of the new-generation of Mini which was soon joined by Countryman, Clubman, convertible, Cooper Works, and numerous special editions. Nearly 20 years later, the new Minis remain as popular as the original from 1959. Derrick suffers from Athazagoraphobia, the fear of being forgotten. The next morning, he wakes in his home hoping it was all a terrible nightmare. He quickly discovers that it wasn't. Derrick has been given the power to turn invisible. Determined to cure himself of this power, Derrick enlists the help of the three other power-afflicted survivors. Together they set out to learn what happened to them and how to rid themselves of their powers. When their investigation leads them to a serial killer with inhuman speed, they have a decision to make. Will the group overcome their fear, harness their abilities, and face the villain, or will they give in to their anxieties and allow countless innocents to die? McFarlane, Hopkins, and Nield's Land Law is the most succinct, analytical textbook available in this subject area. These experienced and respected authors have used their unique approach to land law to provide a consistent structure with which students and lecturers can tackle the topics. The approach arms students with the tools needed to analyse content covered in classes and exams autonomously by demonstrating how to consider rules in isolation before looking at the full picture. This method helps students make links across topics. The concise treatment allows students to concentrate on building an in-depth, sophisticated grasp of the core principles. The authors' direct writing style and contextual outlook guides readers through the depth and detail and gives lucidity to abstract rules. The use of significant cases to exemplify rules in practice and diagrams for visual learners gives additional clarity to concepts that are particularly difficult to imagine. Students are encouraged to test their knowledge by answering end-of-chapter questions and to widen their research by referring to the resources suggested in the further reading lists accompanying each chapter. Online resources Students can access additional supportive materials online including: - Web links to useful sites containing further information on chapter-specific topics - Self-test questions with instant feedback - Essay questions and guidance on how to answer them - Updates on legal developments in land law From the completely juvenile yet brilliant mind of Sidharth Sharotri comes a compilation of his 'serious automobile journalism' work, which consisted of him driving posh cars and making up stories around them for newspapers. These highly technical (read: not at all technical) articles first appeared in a weekly motoring page called Honk in Deccan Chronicle and Asian Age between 2013 and 2015, which this author was exclusively entrusted with. Letters from the Open Road does exactly what his newspaper articles did - make the reader giggle a little bit while making them wonder if they should chase their own childhood dreams. The Land Registration Act 2002 has been in force for almost fifteen years. When enacted, the legislation, which replaced the Land Registration Act 1925, was intended to offer a clear and lasting framework for the registration of title to land in England and Wales. However, perhaps confounding the hopes of its drafters, the legislation's interpretation and application has since generated many unanticipated problems which demand attention. In this book's twenty chapters, leading land law scholars, Law Commissioners past and present, judges, and Registry lawyers unpick key technical controversies, and expose underlying theoretical and policy concerns. Core issues addressed in these chapters include: the legitimate ambitions of registration regimes; the nature and security of title afforded by registration; the resolution of priority disputes affecting registered titles; the relationship between the general law and the registration regime; and new challenges presented by modern technological developments.
