The interRAI HC Assessment System has been designed to be a user-friendly, reliable, person-centered system that informs and guides comprehensive planning of care and services for elderly and disabled persons in community-based settings around the world. It focuses on the person's functioning and quality of life by assessing needs, strengths, and preferences. It also facilitates referrals when appropriate. When used on multiple occasions, it provides the basis for an outcome-based assessment of the person's response to care or services. The interRAI HC Assessment System can be used to assess persons with chronic needs for care, as well as with post-acute care needs (e.g., after hospitalization or in a hospital-at-home situation). Using an original framework, this practical introduction to evaluation shows how to identify appropriate forms and approaches, involve stakeholders in the planning process and disseminate the evaluation findings. 'Evaluation Roots' examines current evaluation theories & traces their evolution with the point of view that theories build upon theories &, therefore, evaluation theories are related to each other. Contents are Peer Work Group Evaluation Forms, useful for record keeping. Small pyrex glass spheres, representative of stoney meteoroids, were fired into 2024-T3 aluminum alclad multiple-sheet structures at velocities to 11,000 feet per second to evaluate the effectiveness of multisheet hull construction as a means of increasing the resistance of a spacecraft to meteoroid penetrations. The results of these tests indicate that increasing the number of sheets in a structure while keeping the total sheet thickness constant and increasing the spacing between sheets both tend to increase the penetration resistance of a structure of constant weight per unit area. In addition, filling the space between the sheets with a light filler material was found to substantially increase structure penetration resistance with a small increase in weight. -Tailor assessments to every topic, skill, and concept taught in physical education. -Help students make connections between concepts to enhance learning. -Meet a wide range of learning styles and teach to all intelligences, including linguistic, spatial, visual, and kinesthetic. -Incorporate learning into the assessment process by calling on various levels of thinking, such as recall, summary application, and evaluation. In today's physical education framework, the demands on your time and energy are great. Every second of class time is precious, so an efficient method of assessment that can plug into any lesson or unit being taught is a highly sought-after commodity. Loaded with assessment templates and sample units, the Physical Education Assessment Toolkit provides you with everything you need in order to simultaneously assess and teach students the lifelong value of physical education. Assessment templates form the basis of the Physical Education Assessment Toolkit. Presented in a concise, user-friendly format, this comprehensive package contains the following features: -Bound-in CD-ROM--PDFs of each reproducible are provided for duplication, including posters that can be printed on letter-sized or larger paper in color or in black and white. -Reproducible templates--Generic forms may be completed easily to address the specific topic, concept, or skill at hand, allowing you to tailor assessments to your students' needs and abilities. -Sample units--Designed using the backward design model of curriculum development, three complete units show how to transform blank reproducibles into highly practical assessment tools. Each chapter includes lesson plans with model reproducibles for the following categories: written assessment, self-assessment, peer assessment, and application or performance assessment. Within each of these categories, you'll receive guidance on implementing and creating more meaningful assessments. Templates may be used to meet a variety of student learning styles, providing opportunities for assessing through rubrics, journal-writing assignments, self-assessments, and skill-tracking assessments across the cognitive, affective, and psychomotor realms. Rather than stealing valuable classroom time, the template approach actually enables teachers to use assessment to reinforce and extend learning in a systematic way. The Physical Education Assessment Toolkit is the one resource that physical educators will turn to anytime they need to do an assessment, no matter what unit or lesson is being taught. This book and CD-ROM package contains the ready-made, pilot-tested materials needed for effective assessments of students, leaving teachers to focus on what they do best--teach. Contents are Student Evaluation Form for Kindergarten Forms, useful for record keeping. Performance appraisals are one of the least enjoyable duties managers face. "Thoroughly revised to incorporate recent research on evaluation and new examples of good practice in the United States and around the world, Program Evaluation, Third Edition, provides a conceptual and practical overview of the evaluation process in real-world educational, organizational, and social service settings. Owen helps students and practitioners compare and select from an array of evaluation approaches by providing an original conceptual framework for the five major forms of evaluative inquiry: proactive, clarificative, interactive, monitoring, and impact. Retaining the issues-driven perspective that made previous editions so popular, the third edition includes a new chapter on evaluation management and new sections on negotiation theory, evidence-based practice, performance auditing and management, and realistic evaluation"--Publisher's description. This book discusses the application of Geospatial data, Geographic Information System (GIS) and Remote Sensing (RS) technologies in analysis and modeling of urban growth process, and its pattern, with special focus on sprawl and compact form of urban development. The book explains these two kinds of urban forms (sprawl and compact urban development) in detail regarding their advantages, disadvantages, indicators, assessment, modeling, implementation and their relationship with urban sustainability. It confirms that the proposed modeling approaches, geospatial data and GIS are very practical for identifying urban growth, land use change patterns and their general trends in future.
