Corporate Entrepreneurship and Venturing is positioned at the crossroads of the strategy and entrepreneurship fields. The common theme is how and why corporate entrepreneurship and corporate venturing can contribute to innovation and strategic renewal in large established companies, in particular it explores ways to balance exploitation and exploration in established companies. The issue is how the locus of entrepreneurship affects the way corporate entrepreneurship addresses the exploitation/exploration challenge. In some chapters corporate entrepreneurship is dispersed across the organization and they examine the key elements of an entrepreneurial culture and the organizational conditions that are favorable to entrepreneurial initiatives. The other chapters contribute to the discussion on the potential role of corporate venturing which is separated from the main parts of the organization. They examine the advantages and disadvantages of corporate venture capital programs as particular forms of focused corporate entrepreneurship. Why do you lack motivation? Adam Embry gets to the heart of this issue: it's not to do with a lack of willpower, but because we are controlled by sin and so fail to be the wise and diligent workers God created us to be. The solution is found in the gospel. Obesity in the United States is such a major health issue. Alongside COVID-19, another disease was spreading, and its progress could not be halted using N-95s or social distancing. This disease moved faster than any virus, and threatened economic harm as great as the pandemic itself. #2 A panic is when a shock causes an initial round of selling, which in turn causes more selling. This downward spiral can lead the entire economy to collapse. Panics are usually the result of structural vulnerabilities in the financial system. #3 The American banking system was designed so that only chartered banks could issue money claims. But over the past several decades, shadow banks have begun to issue similar but legally distinguishable forms of money that consumers do not consider to be deposits. #4 The Fed stepped in to help the Wall Street firms, offering up to \$1.5 trillion in short-term loans. The Fed's New York bank was their counterpart, and they were providing the money claims that the primary dealers used to finance their activities. Without minimizing White racism or other forms of Western social ills, and without criticizing or passing judgements on Asian-American, Hall (human ecology and social work, Michigan State U.) offers some insight into the implications of skin color for Asian-Americans, demonstrating a form of interaction among those who would otherwise be considered post-colonial victims. Among the dimensions he explores are the sport of color, psychological colonization, the bleaching syndrome, a survey of Asian's color bias in the Philippines, what Asian-American women say, Eurasian identity, racism though skin color, and beyond race. Portland, OR (booknews.com). Maya Sanders has had enough drama to last a lifetime. For too long has Maya withstood the slings and arrows of those close to her—her aunts, uncles, and cousins; her daughter's father; his mother; and any number of so-called friends. Now she is ready to open a Pandora's box and share secrets about herself and others that everyone believed would go with them to their graves. She tells her story with the hope that when she's done, everything will finally be out in the open. In her memoir, she recalls the forty-year grieving process that she has undergone in order to get where she is today. She has overcome the sense of being held hostage by those whom she believed loved her. Exploring the tragic circumstances of her life, she discusses all the pain she experienced and affirms that God has given her the strength to move on. Maya shares the honest saga of her trials and tribulations as she tried to navigate the world on the streets of Chicago. Now, after decades of grief and healing within the comforting arms of God, Maya is ready to finally say goodbye to her pain. Alcohol abuse remains a significant problem world-wide. The most commonly affected organ remains the liver with a risk of alcoholic liver disease (ALD) which can range from asymptomatic to alcoholic hepatitis to alcoholic cirrhosis. In 2010, alcohol-attributable cirrhosis was responsible for 0.9% of all global deaths. Given the sheer magnitude of alcohol abuse and alcoholic liver disease, an update on this topic is pertinent and relevant. This issue will focus on a variety of topics including alcoholism, the pathogenesis of ALD, the spectrum of ALD, the pathology of ALD, and the long-term management of patients with ALD. Alcoholic hepatitis is a particular type of ALD with a high mortality. This issue will explore the syndrome of alcoholic hepatitis, its prognostic markers, and the available therapies. Because alcohol intake can influence so many other conditions of the liver (especially hepatitis C), articles in this issue will also explore the impact of alcohol abuse on other liver conditions. In addition, several other topics such as nutritional therapy for ALD, ALD and liver cancer, and ALD and infection risk will be explored. Also, even though it is quite controversial, we will also explore liver transplant as a therapy for alcoholic liver disease including alcoholic hepatitis. The Natural Wonders Issue explores the symbiotic relationship we have with our planet: how we can be kind to the Earth and what we can learn about kindness from Mother Nature. This issue features an illustrated world map of seven natural wonders of the world, a comic with a moral, and some incredible poetry that is out of this world! Each issue of Mighty Kind also includes a "Destination" section that highlights a single country, region, or people, a "Big Idea" section, with pages devoted to critical thinking and self-development and a "Service" section that provides hands-on volunteer opportunities for kids to reach beyond themselves and do good in the world.
