Renal Medullary Circulation Jul 19 2022 The two kidneys of mammalian organisms receive around 25 % of the cardiac output at rest, of which only ~7 % is distributed to the renal medulla. Despite the low blood flow to the renal medulla, small changes in perfusion to the region can have profound effects on urine-concentrating ability and the excretion of sodium, which in turn affects the chronic regulation of body fluid volumes and arterial blood pressure. Importantly, we know that if blood flow to the renal medulla is not tightly regulated, sodium and water homeostasis is impaired and medullary hypoxia develops. The resultant injury inevitably reduces urine concentrating ability and leads to hypertension. This book will discuss the variety of mechanisms that mammalian organisms have developed to ensure that renal medullary blood flow and oxygen levels are precisely regulated. This book will focus on the unique anatomical arrangement of the medullary circulation, the functional roles of medullary blood flow, as well as the experimental techniques used to assess medullary blood flow and the insight that these studies have provided. The hormonal and non-hormonal control of medullary blood flow will be considered and finally the impact of reduced medullary blood flow on blood pressure is discussed.

Perspectives on World War I Poetry Jun 18 2022 Introducing students to the full range of critical approaches to the poetry of the period, Perspectives on World War I Poetry is an authoritative and accessible guide to the extraordinary variety of international poetic responses to the Great War of 1914-18. Each chapter covers one or more major poets, and guides the reader through close readings of poems from a full range of theoretical perspectives, including: • Classical • Formalist • Psychoanalytic • Marxist • Structuralist • Reader-response • New Historicist • Feminist Including the full text of each poem discussed and poetry from British, North American and Commonwealth writers, the book explores the work of such poets as: Thomas Hardy, A.E. Housman, Alys Fane Trotter, Eva Dobell, Charlotte Mew, John McCrae, Edward Thomas, Eleanor Farjeon, Margaret Sackville, Sara Teasdale, Siegfried Sassoon, Rupert Brooke, Teresa Hooley, Isaac Rosenberg, Leon Gellert, Marian Allen, Vera Brittain, Margaret Postgate Cole, Wilfred Owen, E.E. Cummings and David Jones.

The Japanese Navy in World War II Jun 25 2020 Top-ranking Japanese officers offer their personal perspectives of the Pacific War. Lauded by historians and World War II buffs eager for the Japanese viewpoint, this collection of essays makes significant contributions to the field of World War II literature. This second edition, originally published in 1986, adds five articles to the original twelve to provide a full picture of the Japanese's navy's role in the war. Most of these moving accounts were written in the 1950s and retain the immediacy felt by the writers when they participated in the events. They provide valuable information on the strategy, tactics, and operations of the Japanese fleet, as well as insights into the personalities and motives of its leaders. Here, Vice Admiral Shigeru Fukudome comes to grips with allegations that the assault on Pearl Harbor represented strategic folly, political blundering, and tactical stupidity. Captain Mitsuo Fuchida describes how his bombing group unleashed "devils of doom" on Battleship Row, and Mitsuru Yoshida gives an eye-witness account of the sinking of the famous battleship Yamato. The new contributions to the volume, translated especially for this book by the editor, discuss operations in the Indian Ocean, the battle of the Philippine Sea, the protection of merchant shipping, submarine warfare, and Japan's overall naval strategy. A brief introduction precedes each essay to set it in historical context, and a biographical summary of each contributor is included. A striking collection of photographs and maps, many of which are new to this edition, augment the text.

Baltic Iron in the Atlantic World in the Eighteenth Century Dec 24 2022 This book looks at the one of the key commercial links between the Baltic and Atlantic worlds in the eighteenth century - the export of Swedish and Russian iron to Britain - and its role in the making of the modern world.

A Southern Woman of Letters Aug 20 2022 Wilson (1835-1909) is little known now, but was one of the most popular authors of the 19th century, with most of her nine novels becoming best sellers. Sexton (writing, Morehead State U.) selects and annotates letters to her friends, among them well known literary and political figures, that illuminate her life and times. With this volume, the series expands from the 19th to encompass the 20th as well. Annotation copyrighted by Book News, Inc., Portland, OR

Bottlenecks Apr 28 2023 Learn the psychological constrictions of attention, perception, memory, disposition, motivation, and social influence that determine whether customers will be receptive to your digital innovations. Bottlenecks: Aligning UX Design with User Psychology fills a need for entrepreneurs, designers, and marketing professionals in the application of foundational psychology to user-experience design. The first generation of books on the topic focused on web pages and cognitive psychology. This book covers apps, social media, in-car infotainment, and multiplayer video games, and it explores the crucial roles played by behaviorism, development, personality, and social psychology. Author David Evans is an experimental psychology Ph.D. and senior manager of consumer research at Microsoft who recounts high-stakes case studies in which behavioral theory aligned digital designs with the bottlenecks in human nature to the benefit of users and businesses alike. Innova tors in design and students of psychology will learn: The psychological processes determining users' perception of, engagement with, and recommendation of digital innovations Examples of interfaces before and after simple psychological alignments that vastly enhanced their effectiveness Strategies for marketing and product development in an age of social media and behavioral targeting Hypotheses for research that both academics and enterprises can perform to better meet users' needs Who This Book Is For Designers and entrepreneurs will use this book to give their innovations an edge on what are increasingly competitive platforms such as apps, bots, in-car apps, augmented reality content. Usability researchers and market researchers will leverage it to enhance their consulting and reporting. Students and lecturers in psychology departments will want it to help land employment in the private sector. Praise "Bottlenecks' is a tight and eminently actionable read for business leaders in startups and enterprises alike. Evans gives us a rich sense of key psychological processes and even richer examples of them in action." - Nir Eyal, Author of Hooked: How to Build Habit-Forming Products "Clients frequently ask our UX researchers and designers for deeper truths about why certain designs work and others fail. Bottlenecks offers practical explanations and evidence based on the idea that human cognition did not begin with the digital age." - John Dirks, UX Director and Partner, Blink UX "Bottlenecks brings together two very important aspects of user experience design: understanding users and translating this into business impact. A must-read for anyone who wants to learn both." - Josh Lamar, Sr. UX Lead, Microsoft Outlook

Techniques in Free Radical Research Jan 01 2021 Free radical species are generally short-lived due to their high reactivity and thus direct measurement and identification are often impossible. ESR is the only technique which has the potential for direct detection of radicals but in biological systems even these must be trapped by a spin-trapping agent. Thus most investigations involve recognition of indicators of the presence of radicals in vivo or "FOOTPRINTS" of radical-mediated damage. Techniques in Free Radical Research assembles and critically assesses the most relevant and reliable experimental approaches used towards the measurement of radicals and radical-mediated damage in chemical systems, in cells and in tissues under the following six headings: a) Footprints of DNA damage, b) Footprints of protein damage, c) Footprints of lipid peroxidation, d) Footprints of antioxidant consumption, e) Footprints via indirect radical assays, and f) Footprints via the availability of transition metal complexes.

Habits of Mind Feb 02 2021 "In Habits of Mind, his fourth book on Ben Jonson, Robert C. Evans turns to the reading habits of one of the best-read and most-learned of all the great English poets and discovers that the impact of Jonson's reading on his own art was both immediate and strong." "Studying Jonson's markings can provide unique insights into his own thinking and creativity, Evans postulates, because the poet's reading was not a distraction, but central to his inspiration and artistic development." "The marked books that Evans discusses are a deliberately mixed lot, and the methods used in discussing them are also intentionally diverse. The chosen works represent differing periods, genres, styles, and thematic concerns, thus suggesting the impressive range of Jonson's interests as well as the continuities that seem to underlie them."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. New Dictionary of Christian Apologetics Sep 21 2022 The New Dictionary of Christian Apologetics is a must-have resource for professors and students, pastors and laypersons--in short, for any Christian who wishes to understand or develop a rational explanation of the Christian faith in the context of today's complex and ever-changing world. Packed with hundreds of articles that cover the key topics, historic figures and contemporary global issues relating to the study and practice of Christian apologetics, this handy one-volume resource will make an invaluable addition to any Christian library. Editors Gavin McGrath and W. C. Campbell-Jack, with consulting editor C. Stephen Evans, have divided the dictionary into two parts: Part one offers a series of introductory essays that set the framework for the dictionary. These essays examine the practice and importance of Christian apologetics in light of theological, historical and cultural concerns. Part two builds on these essays to present numerous alphabetized articles on individuals, ideas, movements and disciplines that are vital to a rational explanation of the Christian faith. Both essays and articles are written by leading Christian philosophers and theologians. Together, they form an indispensable resource for Christians living in today's pluralistic age.

Fungal Nutrition and Physiology May 25 2020 The motivation for writing this book came the insights gained 10 years of teaching a one-quarter graduate level course in fungal physiology to students in botany, mycology, microbiology, and plant pathology at the Ohio State University. During that period many excellent books were published on all facets of fungal physiology; they included monographs, symposium volumes, and long, on-going treatises.

LGBTQ+ Literature in the West Nov 23 2022 A survey, within one volume, of the history of critical responses to LGBTQ literature from the beginning to the present day, this book explores changes in attitudes, literature and criticism over a period of two and a half thousand years. For various reasons it focuses on literature of 'the West', trying to give readers a clear sense, within a relatively short compass, not only of the development of 'queer' literature (perhaps the most encompassing of all terms) but especially of critical responses to that literature, notably during the past century and particularly the past fifty years. All in all, this book offers a roadmap to much of the excellent scholarship concerning LGBTQ literature that has arisen in the last half-century – an era of unparalleled interest in the topic and an era that has moved the topic from the distant sidelines of literary study to a place ever closer to the center of things.
