Thomas D. Grant examines the Great Debate over state recognition, tracing its eclipse, and identifying trends in contemporary international law that may explain the lingering persistence of the terms of that debate. Although writers have generally accepted the declaratory view as more accurate than its old rival, the judicial sources often cited to support the declaratory view do not on scrutiny do so as decisively as commonly assumed. Contemporary doctrinal preference requires explanation. Declaratory doctrine, in its apparent diminution of the role state discretion plays in recognition, is in harmony, Grant asserts, with contemporary aspirations for international law. It may seem to many

writers, he believes, that international governance functions better in a conceptual framework that reduces the power of states to legislate what entities are states. Grant proceeds from this analysis of the contemporary status of the old debate to ask what questions now take center stage. In place of doctrine, Grant argues, process is the chief issue concerning recognition today. Whether to recognize unilaterally or in a collective framework; whether to acknowledge legal rules or to let recognition be controlled by political calculus--as Grant points out, such questions concern how states recognize, not the theoretical nature of recognition. This is an important analysis for scholars and researchers of international law and relations and contemporary European politics.

But even a perfectly written proposal, or a highly qualified grant writer, cannot guarantee funding. **Best Practices in Grant Seeking: Beyond the Proposal** explores how to involve an organization's leadership in the grant seeking process, and how to work together with staff from public relations, program,s and even other fundraising areas, to make the grant proposal process more fruitful. The best practices in this book can help nonprofit officials determine agency-wide activities – both short and long term – that support and enhance the efforts of the grant writer and that will ultimately improve the amount and number of grants receive from

The opioid epidemic, now several decades in the making, continues to cause pain and suffering for millions of Americans. Each year, thousands of individuals die from overdose, and thousands more grieve from these losses. Opioid use disorder (OUD) can lead to a complete interruption of day-to-day activities, including caring for one's family, maintaining a job or career, or keeping track of basic necessities, such as health care and finances. This report, the first in a series of three, examines four of the Substance Abuse and Mental Health Services Administration (SAMHSA)'s grant programs that help alleviate suffering due to opioids and improve treatment quality and access. It offers recommendations about the existing reporting tools used by these programs and proposes additional metrics and outcomes that should be considered.

1st. Edition #1 New York Times Bestseller

“THIS. This is the right book for right now. Yes, learning requires focus. But, unlearning and relearning requires much more—it requires choosing courage over comfort. In Think Again, Adam Grant weaves together research and storytelling to help us build the intellectual and emotional muscle we need to stay curious enough about the world to actually change it. I’ve never felt so hopeful about what I don’t know.”

—Brené Brown, Ph.D., #1 New York Times bestselling author of Dare to Lead The bestselling author of Give and Take and Originals examines the critical art of rethinking: learning to question your opinions and open other people's minds, which can position you for excellence at work and wisdom in life Intelligence is usually seen as the ability to think and learn, but in a rapidly changing world, there's another set of cognitive skills that might matter more: the ability to rethink and unlearn. In our daily lives, too many of us favor the comfort of conviction over the discomfort of doubt. We listen to opinions that make us feel good, instead of ideas that make us think hard. We see disagreement as a threat to our egos, rather than an opportunity to learn. We surround ourselves with people who agree with our conclusions, when we should be gravitating toward those who challenge our thought process. The result is that our

beliefs get brittle long before our bones. We think too much like preachers defending our sacred beliefs, prosecutors proving the other side wrong, and politicians campaigning for approval--and too little like scientists searching for truth. Intelligence is no cure, and it can even be a curse: being good at thinking can make us worse at rethinking. The brighter we are, the blinder to our own limitations we can become.

Organizational psychologist Adam Grant is an expert on opening other people's minds--and our own. As Wharton's top-rated professor and the bestselling author of *Originals* and *Give and Take*, he makes it one of his guiding principles to argue like he's right but listen like he's wrong. With bold ideas and rigorous evidence, he investigates how we can embrace the joy of being wrong, bring nuance to charged conversations, and build schools, workplaces, and communities of lifelong learners. You'll learn how an international debate champion wins arguments, a Black musician persuades white supremacists to abandon hate, a vaccine whisperer convinces concerned parents to immunize their children, and Adam has coaxed Yankees fans to root for the Red Sox. *Think Again* reveals that we don't have to believe everything we think or internalize everything we feel. It's an invitation to let go of views that are no longer serving us well and prize mental flexibility over foolish consistency. If knowledge is power, knowing what we don't know is wisdom. In addition to traditional management tools, government administrators require a fundamental understanding of the tools available to address the ever-changing context of government communications. Examining the ins and outs of the regulations influencing public information, *The Practice of Government Public Relations* unveils novel ways to integrate cutting-edge technologies—including Web 2.0 and rapidly emerging social media—to craft and maintain a positive public image. Expert practitioners with extensive government communications experience address key topics of interest and provide an up-to-date overview of best practices. They examine the specifics of government public relations and detail a hands-on approach for the planning, implementation, and evaluation of the wide-ranging aspects of government public relations—including how to respond during a crisis. In addition to the tools provided on the

accompanying downloadable resources, most chapters include a Best Practice Checklist to help you successfully utilize the communication strategies outlined in the book. Focusing on the roles of government managers enacting policies adopted by elected officials and politicians, this book is ideal for program managers seeking innovative and inexpensive ways to accomplish their programs' missions. While no manager can be an expert in all aspects of public administration, this book helps you understand the external communications tools available to advance the mission and results of your agency. An examination of new urban approaches both in theory and in practice. Taking a critical look at how new urbanism has lived up to its ideals, the author asks whether new urban approaches offer a viable path to creating good communities. With examples drawn principally from North America, Europe and Japan, *Planning the Good Community* explores new urban approaches in a wide range of settings. It compares the movement for urban renaissance in Europe with the New Urbanism of the United States and Canada, and asks whether the concerns that drive today's planning theory - issues like power, democracy, spatial patterns and globalisation - receive adequate attention in new urban approaches. The issue of aesthetics is also raised, as the author questions whether communities must be more than just attractive in order to be good. With the benefit of twenty years' hindsight and a world-wide perspective, this book offers the reader unparalleled insight as well as a rigorous and considered critical analysis. A state-of-the-art guide for developing grants with a strong emphasis on using program outcome measurement to underscore need and accountability. Based on the authors' many years of experience in the public and nonprofit sectors, *Effective Grant Writing and Program Evaluation for Human Service Professionals* integrates the topics of grant proposal writing and program evaluation, offering grant seekers the practical guidance they need to develop quality proposals, obtain funding, and demonstrate service results and accountability. The authors clearly and succinctly illustrate and describe each stage of the grant writing and evaluation process. Problems or issues that arise frequently are highlighted and followed by specific advice. In addition, numerous

real-world examples and exercises are included throughout the book to give readers the opportunity for reflection and practice. This timely reference incorporates a strengths perspective, providing: An inside look at the grant writing and evaluation processes, with insights from experienced grant writers, agency administrators, foundation program managers, and grant reviewers Specific examples of successful grant proposals and evaluation plans and instruments serving as models for learning and practice Field-tested individual and group exercises that facilitate the development of grant writing and evaluation skills Discussion of electronic technology in grant writing and evaluation, including writing and submitting grant proposals online, and identifying funding sources This grant writing and program evaluation guide follows a needs-driven, evidence-based, result-oriented, and client-centered perspective. Its authoritative discussion equips human service professionals to effectively develop grants with a strong emphasis on measuring program outcomes. The new edition of this well regarded book introduces the underpinning theory and concepts required for the development of first class communication and interpersonal skills in nursing.
