A captivating memoir about tutoring for Manhattan's elite, revealing how a life of extreme wealth both helps and harms the children of the one percent. Ben orders daily room service while living in a five-star hotel. Olivia

collects luxury brand sneakers worn by celebrities. Dakota jets off to Rome when she needs to avoid drama at school. Welcome to the inner circle of New York's richest families, where academia is an obsession, wealth does nothing to soothe status anxiety and parents will try just about anything to gain a competitive edge in the college admissions rat race. When Blythe Grossberg first started as a tutor and learning specialist, she had no idea what awaited her inside the high-end apartments of Fifth Avenue. Children are expected to be as efficient and driven as CEOs,

starting their days with 5:00 a.m. squash practice and ending them with late-night tutoring sessions. Meanwhile, their powerful parents will do anything to secure one of the precious few spots at the Ivy Leagues, whatever the cost to them or their kids. Through stories of the children she tutors that are both funny and shocking, Grossberg shows us the privileged world of America's wealthiest families and the systems in place that help them stay on top. One of the greatest gifts you can give your children is a strong sense of personal values. Helping your children develop values such as

honesty, self-reliance, and dependability is as important a part of their education as teaching them to read or how to cross the street safely. The values you teach your children are their best protection from the influences of peer pressure and the temptations of consumer culture. With their own values clearly defined, your children can make their own decisions -- rather than imitate their friends or the latest fashions. In *Teaching Your Children Values* Linda and Richard Eyre present a practical, proven, month-by-month program of games, family activities, and value-building

exercises for kids of all ages. For *Elementary Reading Methods* courses. This comprehensive and balanced look at literacy practice has long been one of the most popular reading methods texts available. The text begins by introducing seven principles for comprehensive reading instruction, and then explains the theoretical foundations of teaching reading. Part I builds on those foundations with specific methods in Part II, and then in Part III it describes how to create a variety of learning centers, and how to plan developmentally appropriate reading curriculum for students in both K-3

and 4-8 classrooms, chapters 12 and 13 provide a continuum of knowledge by describing classroom organization and curriculum for grades 4-6 and 6-8. There's more to student success than standards and test scores... *Integrating Social and Emotional Learning into a Curriculum* has been shown to increase personal and school-wide growth. With lifelong success the goal over simply meeting academic thresholds, *Teaching Kids to Thrive* presents strategies, activities, and stories in an approachable way to develop responsible, self-

motivated learners. Uniting social, academic, and self-skills this instrumental resource offers benefits to students such as: Using mindfulness strategies to help students tap their inner strengths Learning to self-regulate and control other executive brain functions Developing growth mindsets along with perseverance and resilience Cultivating a sense of responsibility, honesty, and integrity Encouraging a capacity for empathy and gratitude Teaching children how to learn is a groundbreaking book offering Primary language

teachers a new and practical methodology based on the importance, now universally recognized in curricula around the world, of teaching children how to learn. Teaching children how to learn comes from authors Gail Ellis, British Council adviser on Young Learners and Quality for the EU region, and Nayr Ibrahim, Head of Young Learners and Bilingual Section at the British Council, Paris. The authors are passionate about learning to learn and in Teaching children how to learn they aim to help teachers create the optimum conditions for children to reach their full potential as

enthusiastic and motivated language learners. Teaching children how to learn contains three distinctive parts which take teachers through a step-by-step approach to understanding, implementing and reflecting on learning to learn. It shows how learning to learn can be achieved through a "Plan, Do, Do More, Review and Share" routine. Teaching children how to learn is a rich Teacher Development resource book, combining theory, practical classroom-ready activities, models for teachers, interactive Teacher Development activities, keys and model answers: Part A • presents the

theoretical and methodological concepts of learning to learn • elaborates a framework of teaching principles for planning and implementing learning to learn systemically and explicitly Part B • provides teachers with 30 models which enable them to help children learn to learn • includes 'Wilbur's Toolkit' with over 60 ready to use activity worksheets and record pages. These resources are available online to download and photocopy. Part C • contains a range of interactive activities to assist teachers in their personal and professional development • includes a

Teacher's Toolkit with keys, model answers, lesson plans and interactive dialogue with the authors Teaching children how to learn incorporates extensive additional photocopiable resources at [www.deltapublishing.co.uk/resources](http://www.deltapublishing.co.uk/resources) Challenging popular beliefs about self-esteem parenting, a guide for parents recommends an alternative approach that encourages respect for the self and others, in a reference that explains how to foster such values in children as thankfulness and unselfishness. Original. 50,000 first printing. This book describes and

analyzes programs and approaches to the teaching of thinking from all around the world, providing ideas for teachers to use in their own classrooms. With new summaries for each chapter, this new updated version includes more practical ideas to start the day thinking. Teaching Children to Think features more on emotional intelligence, cognitive acceleration, and the use of ICT in teaching thinking; while also providing more on assessment, new resources, and weblinks. Explains to parents how to teach their children golf basics, discussing putting and chipping,

pitching and full swing, bunker shots, special shots, and how to create a positive atmosphere. The Children You Teach is a book of stories about students and teachers. But it is also a book about children's development. Each chapter tells the true story of a child or teacher facing a dilemma. Weaving in research from psychological science, Susan Engel shows how to look at children through a developmental lens, which can change what happens in the classroom, and transform the craft of teaching. Drawing on her many years as a developmental scientist and classroom teacher,

Susan applies theories and studies from developmental psychology to the lives of real children. She summarizes the research and data to help teachers understand the way children think, and then shows how teachers can use that knowledge in the classroom. No plan book or curriculum guide can replace the power and usefulness of thinking about children from a developmental perspective. You can take concrete steps to make child development integral to your daily work with children. Learn to think differently about the children you teach and let your insights guide

you as you help them grow. A #1 bestseller on Amazon for early childhood education with more than half a million copies in print, Teach Your Child to Read in 100 Easy Lessons will give your child the reading skills needed now for a better chance at tomorrow, while bringing you and your child closer together. Is your child halfway through first grade and still unable to read? Is your preschooler bored with coloring and ready for reading? Do you want to help your child read, but are afraid you'll do something wrong? Teach Your Child to Read in 100 Easy Lessons is a complete, step-by-step program that

shows patents simply and clearly how to teach their children to read. Twenty minutes a day is all you need, and within 100 teaching days your child will be reading on a solid second-grade reading level. It's a sensible, easy-to-follow, and enjoyable way to help your child gain the essential skills of reading. Everything you need is here—no paste, no scissors, no flash cards, no complicated directions—just you and your child learning together. One hundred lessons, fully illustrated and color-coded for clarity, give your child the basic and more advanced skills needed to

become a good reader. Why Do Kids These Days Expect Everything to be Given to Them? Today's kids don't know how to read a map. They can Google the answer to any question at lightning speed. If a teen forgets his homework, a quick call to mom or dad has it hand-delivered in minutes. Fueled by the rapid pace of technology, the Instant Gratification Generation not only expects immediate solutions to problems—they're more dependent than ever on adults. Today's kids are being denied opportunities to make mistakes, and more importantly, to learn from them.

They are being taught not to think. In *Teaching Kids to Think*, Dr. Darlene Sweetland and Dr. Ron Stolberg offer insight into the social, emotional, and neurological challenges unique to this generation. They identify the five parent traps that cause adults to unknowingly increase their children's need for instant gratification, and offer practical tips and easy-to-implement solutions to address topics relevant to children of all ages. A must-read for parents and educators, *Teaching Kids to Think* will help you understand where this sense of entitlement comes from—and how to turn it around in

order to raise children who are confident, independent, and thoughtful. This optimistic and challenging book will transform the way parents, teachers, and other taxpayers perceive education. From the preface by Deborah Meier: "We have a long way to go to make John Holt's dream available to all children. But his books make it possible and easier for many of us to join him in the journey." In this enduring classic, rich with deep, original insight into the nature of early learning, John Holt was the first to make clear that, for small children, "learning is as natural as

breathing." In his delightful book he observes how children actually learn to talk, to read, to count, and to reason, and how, as adults, we can best encourage these natural abilities in our children. More and more parents today are disillusioned with public education. Instead of merely tolerating a faulty system, expanding numbers of parents are turning to alternative education for their children. "Homeschooling" describes what homeschooling is all about, helps parents decide whether or not this choice fits their family lifestyle, covers virtually every aspect of

homeschooling, and more. This guide shows parents how to combine story reading, phonics, and writing to help their children develop into skilled and motivated readers. The guide discusses how to prepare children for reading success; how to use children's literature to promote learning and enjoyment; why combining book experiences and phonics is better than using either approach alone; ways to use writing to enhance children's reading progress; why reading aloud is important; and which books to use and where to find them. Chapters in the guide are: (1) "The 'Great Debate'"; (2)

"Acquiring Language and Learning To Read"; (3) "Early Readers: What Can They Teach Us?"; (4) "What Works? One Successful Program"; (5) "Using 'Real Books' in Your Program"; (6) "Preparing for Formal Lessons"; (7) "Book Reading and Strategy Development"; (8) "Learning about Letters, Sounds, and Words"; (9) "Story Writing in the Reading Lesson"; and (10) "Putting It All Together: A Sample Lesson." Contains 79 references. Appendixes present a 600-item bibliography of children's trade books; a special note for Christian educators; and advice on

establishing a tutoring project. (RS) Psychologist Madeline Levine, author of the New York Times bestseller *The Price of Privilege*, brings together cutting-edge research and thirty years of clinical experience to explode once and for all the myth that good grades, high test scores, and college acceptances should define the parenting endgame. Parents, educators, and the media wring their hands about the plight of America's children and teens—soaring rates of emotional problems, limited coping skills, disengagement from learning and yet there are ways to reverse these disheartening trends. *Teach Your*

*Children Well* acknowledges that every parent wants successful children. However, until we are clearer about our core values and the parenting choices that are most likely to lead to authentic, and not superficial, success, we will continue to raise exhausted, externally driven, impaired children who believe they are only as good as their last performance. Real success is always an inside job, argues Levine, and is measured not by today's report card but by the people our children become fifteen or twenty years down the line. Refusing to be diverted by manufactured controversies such

as "tiger moms versus coddling moms," Levine confronts the real issues behind the way we push some of our kids to the breaking point while dismissing the talents and interests of many others. She shows us how to shift our focus from the excesses of hyperparenting and the unhealthy reliance on our children for status and meaning to a parenting style that concentrates on both enabling academic success as well as developing a sense of purpose, well-being, connection, and meaning in our children's lives. *Teach Your Children Well* is a call to action. And while it takes

courage to make the changes we believe in, the time has come, says Levine, to return our overwrought families to a healthier and saner version of themselves. A simple and sweet parenting book with 365 tips—a new one to try every day! As a parent, you want the best for your child, and one of your greatest hopes is that your child will grow up to be a good person. So, what makes a good person? Generally, we think about good people as being kind: those who are compassionate, empathetic, generous. However, it seems that, in our fast-paced, individual-driven society, kindness is

fading and the pressure on parents to raise socially conscious, empathetic, and caring children can seem overwhelming at times. In *Teaching Kids to Be Kind*, Rachel Tomlinson draws from her professional experiences to provide 365 inspiring strategies to help children and families practice kindness every day of the year. Daily tips include: Taking your child shopping around the holidays to select a new toy to donate to another little boy or girl their age. Leaving little notes in their lunch box or school bag for them to find. This models unconditional love and consideration

for others. Baking a cake together to teach patience and teamwork and build on their ability to delay gratification. An essential tool for parents, *Teaching Kids to Be Kind* will help children develop empathy, regulate their emotions, and improve their general well-being as well as support families in strengthening their overall relationships. In his latest book, Daniel Meier highlights the critical importance of integrating content and mechanics for successful and engaged writing at the K-4 level. Featuring the teaching philosophies and strategies of seven exemplary teachers,

and a discussion of relevant research and theory, Meier provides a fresh, practical, and much-needed perspective on making writing meaningful and effective in the current standards-based era. Written by an experienced teacher and researcher, this book will be of interest to both new and veteran teachers, As well as curriculum coordinators, literacy coaches, and researchers on writing. The ideas and teaching strategies presented in this book are clearly developed to actively involve teachers in understanding and thinking about children's reading

and writing development. Information is derived from the latest theory and research on reading and language development. Central to the book is the real world classroom, thus theory and research are applied to literacy teaching through examples, strategies, and illustrations. Topics include: becoming an influential teachers, understanding the writing and reading process, building vocabulary and comprehension connections, using literature and reader response, and more. PLEASE UPDATE SAGE INDIA AND SAGE UK ADDRESSES ON IMPRINT PAGE. This book

contains step-by-step instructions for teaching children and teenagers to clean an entire house. Plus many other life skills such as doing laundry, loading a dishwasher properly, and making a bed. Cleaning is not an option, it's a necessity! If your child doesn't learn, it'll plague them the rest of their lives. According to the latest research, teaching your child to clean may be the most important thing you ever do for them! You want your child to learn basic life skills, but finding the time for accomplishing this seems to get more difficult each day. What's the answer? A new approach, that practically

does it for you! You'll find it in these pages and even more: \* The research on children & cleaning \* Proven tactics to get the job done \* Chore charts for every age \* Room evaluations for easier cleaning \* What tools they need \* Safe green cleaning solutions, you can make yourself \* Checklists for detailed cleaning in every room \* How to clean appliances \* How to do laundry, set the table and everyday chores \* How to take care of pets \* Fun cleaning games Knowing how to take care of yourself in your everyday environment is a skill no one should be without! Skills

for creating a successful classroom are included in this transcription of a keynote address and workshop given to a conference of Montessori educators, in which basic features of Nonviolent Communication (NVC) are described. This book shows parents the communication skills they need to teach their children to govern themselves. With the proper family environment and understanding of childhood behaviors homes can become happier. How much do your children know? We teach our children academics. We give them instruction in the arts and physical fitness. We

show them how to swim, skate, and ride a bike. But have we forgotten the most basic and necessary skill of all? Have we taught them to pray? Prayer is the foundation for communicating with God, growing as a person, and receiving help and wisdom for every other part of life. Teaching children to pray is one of the most important tasks parents have. Inside Teaching Your Child to Pray you will find: Answers to your children's questions about prayer Practical tips, helps, and activities for teaching the discipline of prayer What the Bible says about children and prayer Stories and examples of how

prayer works Ways to reap the benefits of prayer for your children and see it affect their lives Give your children a real head start. Teach them to communicate with the Savior. It will make an eternal difference. "Ruth Charney gives teachers help on things that really matter. She wants children to learn how to care for themselves, their fellow students, their environment, and their work. Her book is loaded with practical wisdom. Using Charney's positive approach to classroom management will make the whole school day go better." - Nel Noddings, Professor Emeritus, Stanford University,

and author of Caring This definitive work about classroom management will show teachers how to turn their vision of respectful, friendly, academically rigorous classrooms into reality. The new edition includes: More information on teaching middle-school students Additional strategies for helping children with challenging behavior Updated stories and examples from real classrooms. "Teaching Children to Care offers educators a practical guide to one of the most effective social and emotional learning programs I know of. The Responsive

Classroom approach creates an ideal environment for learning—a pioneering program every teacher should know about." - Daniel Goleman, Author of Emotional Intelligence "I spent one whole summer reading Teaching Children to Care. It was like a rebirth for me. This book helped direct my professional development. After reading it, I had a path to follow. I now look forward to rereading this book each August to refresh and reinforce my ability to effectively manage a social curriculum in my classroom." - Gail Zimmerman, second-grade teacher, Jackson

Mann Elementary School, Boston, MA This exciting book fosters the skills involved in learning, providing a framework for developing active learning in every community, classroom, and school. This new edition suggests more ways to create powerful learning environments. Teaching Children to Learn has been revised and enlarged, giving more practical ideas to develop creative learning skills. It includes new sections on learning styles, accelerated learning, and ways to motivate learning. Young children can surprise us with tough questions.

Tominey's essential guide teaches us how to answer them and foster compassion along the way. If you had to choose one word to describe the world you want children to grow up in, what would it be? Safe? Understanding? Resilient? Compassionate? As parents and caregivers of young children, we know what we want for our children, but not always how to get there. Many children today are stressed by academic demands, anxious about relationships at school, confused by messages they hear in the media, and overwhelmed by challenges at home. Young children look to the adults in

their lives for everything. Sometimes we're prepared... sometimes we're not. In this book, Shauna Tominey guides parents and caregivers through how to have conversations with young children about a range of topics—from what makes us who we are (e.g., race, gender) to tackling challenges (e.g., peer pressure, divorce, stress) to showing compassion (e.g., making friends, recognizing privilege, being a helper). Talking through these topics in an age-appropriate manner—rather than telling children they are too young to understand—helps

children recognize how they feel and how they fit in with the world around them. This book provides sample conversations, discussion prompts, storybook recommendations, and family activities. Dr. Tominey's research-based strategies and practical advice creates dialogues that teach self-esteem, resilience, and empathy: the building blocks for a more compassionate world. How can we help children to become independent learners? The third edition of this invaluable companion for Early Years practitioners provides a broad-ranging and up-to-

date review of current thinking and best practice within Foundation Stage and Key Stage 1 education. Based on the basic truth that an effective Early Years curriculum must start with the children, this book focuses on their needs and their potential. The best teaching must have a strong element of fun, wonder and excitement: David Whitebread and Penny Coltman show how play is a crucial part of this. Each chapter combines a review of important principles with practical and inspiring classroom examples. This third edition has been fully revised and updated in light of the introduction

of the Early Years Foundation Stage, and includes completely new chapters concerned with classroom organisation to support independent learning, outdoor learning, speaking and listening and mathematics in the early years. The authors review all major areas of the Foundation Stage and Key Stage 1 curriculum and a range of basic issues and principles, including: an analysis of current research into how children learn discussions of general issues such as classroom organisation, curriculum management, and assessment a detailed section on

play and language chapters covering individual curriculum areas across all six Foundation Stage areas of learning and across the areas of the Key Stage 1 National Curriculum The book is essential reading for all Foundation Stage and Key Stage 1 trainee teachers, their tutors and mentors, and serving teachers working with children in the three to seven age range wishing to reflect upon and develop their practice. An essential guide for teachers and parents that's destined to become a classic, *The Art of Teaching Children* is one of those rare and masterful

books that not only defines a craft but offers a magical reading experience. After more than thirty years in the classroom, award-winning teacher Phil Done decided that it was time to retire. His days of teaching schoolchildren may have come to an end, but a teacher's job is never truly done, and he set out to write the greatest lesson of his career: a book for educators and parents that would pass along everything he learned about working with kids. The result is this delightful and insightful teaching bible, *The Art of Teaching Children*. From the first-day-of-school jitters to the last day's tears,

Done writes about the teacher's craft, classrooms and curriculums, the challenges of the profession, and the reason all teachers do it—the children. Drawing upon decades of experience, Done shares sound guidance, time-tested tips, and sage advice: Real learning is messy, not linear. Greeting kids in the morning as they enter the classroom is one of the most important parts of the school day. If a student is having trouble, look at what you can do differently before pointing the finger at the child. Ask yourself: Would I want to be a student in my class? When children watch you, they are learning how to be

people, and one of the most important things we can do for our students is to model the kind of people we would like them to be. Done tackles topics you won't find in any other teaching book, including Back to School Night nerves, teacher pride, lessons that bomb, the Sunday Blues, Pinterest envy, teacher guilt, and the things they never warn you about in "teacher school" but should, like how to survive lunch supervision, recess duty, and field trips. Done also addresses some of the most important issues schools face today: bullying, excessive screen time, unsupportive administrators, the

system's obsession with testing, teacher burnout, and the ever-increasing demands of meeting the diverse learning needs of students. With great wit and wisdom, first-rate storytelling, and boundless compassion, *The Art of Teaching Children* is the definitive guide to educating today's young learners and the perfect resource for teachers and parents everywhere. The author draws from her years as a teacher in inner-city and independent schools to discuss what she has learned about managing a responsive classroom and

teaching children to care, describing the approaches and tools she uses to set up rules, expectations, and consequences. This guide will help you teach the skills children need to make choices that reflect ethical thinking and social courage. Good news, Rabbit and Mouse are going on a picnic. Bad news, it is starting to rain. Good news, Rabbit has an umbrella. Bad news, the stormy winds blow the umbrella (and Mouse!) into a tree. So begins this clever story about two friends with very different dispositions. Using just four words, Jeff Mack has created a text with remarkable flair that is both funny

and touching, and pairs perfectly with his energetic, and hilarious, illustrations. Good news, this is a book kids will clamor to read again and again! An excellent educational approach which naturally integrates a Christian world view and scriptural principles, "Teaching Children" draws on noted English educator Charlotte Mason and the Child-Light approach to learning. Child-Light puts children in touch with fine literature and teaches them through the use of "living books". Introduction by Susan Schaeffer Macaulay. A guide for parents to help children of all ages process the

onslaught of unfiltered information in the digital age. Education is not solely about acquiring information and skills across subject areas, but also about understanding how and why we believe what we do. At a time when online media has created a virtual firehose of information and opinions, parents and teachers worry how students will interpret what they read and see. Amid the noise, it has become increasingly important to examine different perspectives with both curiosity and discernment. But how do parents teach these skills to their children?

Drawing on more than twenty years' experience homeschooling and developing curricula, Julie Bogart offers practical tools to help children at every stage of development to grow in their ability to explore the world around them, examine how their loyalties and biases affect their beliefs, and generate fresh insight rather than simply recycling what they've been taught. Full of accessible stories and activities for children of all ages, *Raising Critical Thinkers* helps parents to nurture passionate learners with thoughtful minds and empathetic hearts. "Through clear and readable

explanations of current research and enlightening vignettes, educators will understand how violence and other forms of trauma affect the key elements of a child's school and social success, including behavior, attention, memory, and language."

"Throughout the book, realistic sample scenarios demonstrate how teachers can make the strategies work in their classroom, and challenging What Would You Do? quizzes sharpen educators' instincts so they can respond skillfully in difficult situations. With this timely, much-needed guidebook, education professionals will

create supportive classrooms and schools that meet the complex learning needs of children who hurt - and help the most vulnerable students build resilience and hope."--BOOK JACKET.
