In a time of war, morality is overcome by the unthinkable. The unthinkable justified by fear and circumstances beyond our control. From uncontrollable circumstances emerges a new world of terror. To fight this terror we sacrifice our morality further and go beyond the unthinkable. The remnants of this vicious cycle turn with a momentum all their own and live on long after the treaties are signed. This is the fuel that sustains us between conflicts. This is the catalyst that ignites our creativity and spawns new technologies of war. We are united through common enemies, even though our greatest enemy is our own fear. For David Andrews, his peaceful existence collided with the reverberations of a war written into history books decades earlier. As the reality of these uncontrollable events swamp over him he comes face-to-face with the unthinkable. The cyclone of a war that will not die will test his fear of the unknown by redefining everything he knew to be true and replacing it with an alternate universe. An alternate set of events sent into motion the day of his birth. A universe created by the cold war in a long forgotten US military base called Camp Hero. Camp Hero State Park is located on the south fork of Long Island, just west of the Montauk Point Lighthouse. The Montauk Point Lighthouse was commissioned by General George Washington in 1792 during the Revolutionary War. In 1929, during WWI the US Army established Fort Hero, named after Major General Andrew Hero, Jr. who was the Army's Chief of Coastal Artillery. In 1942, during WWII the US Army upgraded the defenses of Fort Hero to deal with the growing threat of German invasion and Camp Hero was born. Camp Hero was eventually turned over to the Air Force in 1950 to become part of the National Air Defense system. Finally, in 1984 the land was turned over to the New York State Department of Parks. Conspiracy theorists believe the base is still operational today and the science being developed is out of this world. A depiction of the esteemed Victorian portrait photographer describes her marriage to Charles Hay Cameron, her affectionate correspondence with scientist Sir John Herschel, the technologies that shaped her career, and her work as chronicled by niece Virginia Woolf. "Camaro City - named by car thieves, because the Camaro is popular there - is a Connecticut factory city that has lost its factories. The stories in this collection concern its people, most of whom take whatever work they can find. They are trash inspectors at the landfill, assistant fleet managers at the traprock quarry, owners of construction companies that go bankrupt. The local teenagers also seem to be having a run of bad luck - they can't handle cigarette lighters safely, let alone motorcycles, and they get too many of their cues about life from the aphorisms displayed on the sides of grocery trucks that rumble up and down the interstate behind the high school." "Never go to bed angry with each other!" one such truck proclaims, but people in Camaro City often do. They also go to bed confused - especially the men, who don't understand why their lives don't seem to fit anymore. (The women are less likely to consider college sissified and are put out of work much less often.) Spirited and stubborn, these people refuse to see themselves as relics of the factory economy. Their more and less fortunate neighbors are also represented here - a girl from the inner city who must choose how to grow up; a young woman of relative privilege who discovers the joy and difficulty of her mother's work. Straightforward, respectful, and beautifully crafted, Sternberg's stories offer a clear window on the life of a small American city late in the twentieth century."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved The fan-favorite couple from Netflix's "delicious romp" (Slate) Love Is Blind share their engaging and accessible love advice for the modern world, the ups and downs they've experienced during their first years of marriage, and exclusive behind-the-scenes anecdotes from the pods. When Cameron Hamilton and Lauren Speed locked eyes for the first time, they were already engaged. They had no idea what to expect, having fallen in love across the divider of their pods on the daring Netflix reality show Love Is Blind. While they never expected to find their other half through this experiment, Lauren and Cameron emerged proof of the hypothesis that love is blind. Now, they'll take us back to the origins of their whirlwind romance to tell their definitive story. Through alternating points of view, we'll find out what led them to the show in the first place, how scary it was to bare their souls to faceless strangers on television, and how things

shifted—for better and for worse—once the cameras were suddenly off and the rings were on. Lauren and Cameron’s journey together is a modern love story like no other, and their adventure is just beginning. This book discusses the historical value and sixth century context of the Greek historian Procopius of Caesarea. The year is 1980, and President Jimmy Carter has given away the Panama Canal. The Russians have invaded Afghanistan, and Iranian radical Muslims are holding fifty-six American embassy employees hostage. Interest rates and unemployment are in the double digits. At this point in history, the world is a nasty place, and for the Palm Avenue Auction Gallery in Sarasota, Florida, things are equally bad. The auction business had been a source of entertainment in small resort areas throughout most of the 20th century. Then, times began to change as young people threw ink on fur coats. It became dangerous to wear expensive jewelry, and silver tea sets were no longer a status symbol. Summer stock, dinner theaters, and comedy clubs filled the entertainment appetite. Colby chose a bad time to join the auction business. He spent his early years as an SAS British Army officer, same as the secretive Delta Force. Making his transition as a resort area auctioneer felt natural. At the Sarasota gallery, Colby is a comedian one minute and a salesman the next. Then, within one months time, two people end up dead, two are missing, and twenty million dollars has been stolen. The craziness of world history can take a back seat to Florida. Will the twenty-first century see terrorist fingers on the nuclear trigger? How likely is it terrorists will obtain weapons of mass destruction? What factors would determine their decision to use them? Gavin Cameron assesses the causes for, and implications of, the escalating lethality of terrorism. The growing opportunities for nuclear proliferation, primarily arising from the collapse of the Soviet Union are explained. The book concludes that the organisational and psychological pressures within terrorist groups and the changing nature of political violence combined with the heightened danger of nuclear micro-proliferation have made mass-destructive terrorism the greatest non-traditional threat to international security in the world today. W. Griffith, John Ford, Robert Altman, Francis Ford Coppola, Martin Scorsese, Oliver Stone, Spike Lee. From the earliest flickering images of *The Spirit of 76* (1905) through Nixon, *America on Film* subtly and entertainingly examines Hollywood's filming of American history, including biographies. Among the many films considered, some omissions seem surprising: *The Birth of a Nation* and *Gone with the Wind*, for example, since they are based on fiction. But *The Iron Horse*, *The Beginning or the End?*, the Jackie Robinson Story, *Patton*, *Quiz Show*, *Lenny*, *Malcolm X*, *Apollo 13*, and literally hundreds of others are all here. Through these many movies, we see the interrelationships between image and substance, illusion and reality, racism and democracy, and cynicism and idealism, which form America's unique national identity. His word picture of the world's romantic center matches Robert Cameron's stunning photography. Foreword by Kathy Halbreich. Text by Philippe Vergne. Excerpt by Charles Bukowski Alexandra Keller provides a critical study of James Cameron as an auteur. Insightful, provocative and now in paperback, The Cultural Impact of RuPaul's Drag Race is a collection of original material that goes beyond simple analysis of the show and examines the profound effect that RuPaul's Drag Race has had on the cultures that surround it: audience cultures, economics, branding, queer politics and all points in between. Once a cult show marketed primarily to gay men, Drag Race has drawn both praise and criticism for its ability to market itself to broader, straighter and increasingly younger fans. The show's depiction of drag as both a celebrated form of entertainment and as a potentially lucrative career path has created an explosion of aspiring queens in unprecedented numbers, and had a far-reaching impact on drag as both an art form and a career. Contributors include scholars based in the United Kingdom, the United States, Canada and South Africa. The contributions are interdisciplinary, as well as international. The editor invited submissions from scholars in theatre and performance studies, English literature, cultural anthropology, media studies, linguistics, sociology and marketing. What he envisaged was an examination of the wider cultural impacts that RuPaul's Drag Race has had; what he received was a rich and diverse engagement with the question of how Drag Race has affected local, live cultures, fan cultures, queer representation and the very fabric of drag as an art form in popular cultural consciousness. This original collection, with its variety of topics and approaches, is a critical appraisal of RuPaul's Drag Race at an important point of the programme's run, as well as of the growing industries around RPDR, including DragCon and drag queens' post-show careers in the on- and offline world. Primarily of interest to students, scholars and researchers in media and communication studies, gender and sexuality studies, popular culture, queer theory, LGBTQ history, media studies, and fan studies. Will also appeal to fans of the series. The Corporeal Self argues that questions about identity, conceived in bodily terms, are not only relevant for Melville and Hawthorne, the two nineteenth-century authors whose works are positioned at opposite extremes of the consideration of human identity, but lie at the heart of the American literary tradition, and have, in that tradition, their own revisionary status. Profiles the life and work of a nineteenth century pioneer of photography and offers a selection of her portraits of women A biography of the model-turned-actress who starred in "The Mask," "My Best Friend's Wedding," and "There's Something About Mary." As told by veteran entertainment journalist Marc Shapiro, the story of James Cameron is rich in history and as explosively entertaining as any of his masterpiece films. Cameron the youngster built toy rockets and submarines and displayed at an early age the drive to win at any cost. The Cameron legend has it that when a neighbor stole some of little Jim's toys, he sneaked into the boy's backyard and sawed through the branches supporting his treehouse. When the treehouse collapsed, Cameron's rival ended up in the hospital. Ever since that day, James Cameron has been leaving many of those who cross his path in a state of mental or physical disrepair. But his fanaticism and incredibly strong work ethic also win the respect of those around him, and inspire many to go the extra mile. The teenager who was awestruck by the visual power and special effects of Stanley Kubrick's groundbreaking 2001: A Space Odyssey and immediately decided to become a filmmaker, has grown up to be one of the very best. But at what cost? Those who would label Cameron a self-absorbed, egotistical maniac have plenty of ammunition to back up their claims. As early as 1984's The Terminator, cast and crew members took to wearing T-shirts with the slogan "You can't scare me...I work for James Cameron." Of course, the infamous director never really talks to co-workers on his sets, he barks at them in succinct soundbites. And he doesn't play favorites. Not even his franchise player, Arnold Schwarzenegger, got special treatment during the filming of True Lies. High on a crane and ready to film a scene, he reports: "I had to go to the bathroom read bad. Jim screams up to me, 'No you can't! You're a military man on a mission, would a real pilot land just to go to the bathroom?'" James Cameron: An Unauthorized Biography of the Filmmaker includes other revelations and insights: \* how the idea for The Terminator came to him in a fever dream \* how he fell overboard in love with actress Suzy Amis on the set of Titanic \* how Cameron's antics drove several stars of The Abyss to near nervous breakdowns \* how someone on the set of Titanic allegedly attempted to incapacitate the lovable director by slipping him, and the rest of the crew, the drug PCP
