Delmar is a part of Cengage Learning. Delmar's Growth and Development Handbook: Newborn through Adolescence is a text for undergraduate nursing students and nurses that approaches human development from a holistic and family-centered perspective. It provides a learner oriented approach to understanding and retaining

growth and developmental information required to become a safe and caring practitioner while interacting with families and pediatric patients from the newborn period to adolescence. The handbook presents a succinct summary of human development for the student and practitioner that is easy to use and/or refer to on clinical units. The text can also be used as a supplemental item complementing the students' textbook or as a clinical reference for growth and development content. Practicing nurses may find the text useful as a clinical reference for key information about the development and assessment of their pediatric clients since normal developmental milestones, health, health promotion, and anticipatory guidance are stressed throughout. Analysis. Judgment. Decision-making. These elements are fundamental to nursing. The umbrella term "critical thinking" is fashionable for discussion of those elements, and it is a great obstacle to becoming a nurse. Delmar's Case Study Series is the most ambitious attempt to bridge the gap between content knowledge and clinical application. Pediatrics is the second installment in the series, which recognizes that numerous considerations, or variables, factor into making nursing decisions. Every case contains an introductory "blueprint" of variables that must be considered while evaluating that particular scenario, which are pertinent concerning the client, nursing protocol, or setting of care. Examples of these variables include age, gender, or culture of the client, the client with a pre-existing condition, legal issues, or communication skills. Each blueprint is different, just as each clinical situation is unique in some way to the previous. By simulating the actual decision-making process, learners gain a comfort level to make informed clinical judgments that will help them become successful nurses. Quite simply, Delmar's Case Study Series shortens the distance between the classroom and nursing practice like never before. Delmar is a part of Cengage Learning. If you are preparing to take the NCLEX-RNA(R) examination, you cannot afford to be without Delmar's Nursing Review Series. Delmar is a part of Cengage Learning. This book gives the reader a broad overview of pediatric nursing, including common conditions of each body system, nursing interventions, family/patient teaching, and growth and development. Delmar's Pediatric Nursing Care Plans, Third Edition, provides detailed information on developing care plans for children with health alterations. Each care plan presents information to guide users in developing comprehensive, individualized nursing care plans based on solid, scientific knowledge. Care plans solicit specific client data and prompt the user to individualize the interventions and evaluate the child's individual responses. Interventions and outcomes are suggested to keep parents informed of and involved in their child's care. This book offers a dynamic and insightful guide to caring for pediatric clients. The authors embrace a holistic, family-centered approach to the care and nurturing of children in all states of health, exploring healthy growth and development milestones, as well as illness states and chronic conditions. Delmar's Maternal-Infant Nursing Care Plans, 2nd edition, provides detailed information on caring for clients during pregnancy, labor and delivery, the postpartum period, and the newborn/infant period. All the information needed to develop specific and effective nursing care plans for clients in the maternal and newborn periods is included. Each care plan presents information to guide users in developing comprehensive individualized nursing care plans based on solid scientific understanding of the physiological, psychological, and social events surrounding childbirth. Care plans solicit specific client data and prompt the user to individualize the interventions, consider cultural relevance, and evaluate the client's individual response. Student Study Guide provides multiple choice, true-false, and fill-in questions, as well as case studies with critical thinking scenarios (answers appear at the end of the book).
