Providing e?ective access to large collections of XML documents is therefore a key issue for the success of these systems. INEX aims to provide the necessary methodological means and worldwide infrastructures for evaluating how good XML retrieval systems are. Since its launch in 2002, INEX has grown both in terms of number of p- ticipants and its coverage of the investigated retrieval tasks and scenarios. In 2002, INEX started with 49 registered participating organizations, whereas this number was more than 100 for 2008. In 2002, there was one main track, c- nered with the ad hoc retrieval task, whereas in 2008, seven tracks in addition to the main ad hoc track were investigated, looking at various aspects of XML retrieval, from book search to entity ranking, including interaction aspects. This third edition of the Beecham Manual has its origins in a manual produced by Selwyn Carson for his general practice in Christchurch, New Zealand. He produced loose-leaf sets of instructions for his practice team and colleagues. Beecham Research Laboratories of New Zealand did a great service for the medical profession by publishing and distributing Dr Carson's manual there. The British version of the Beecham Manual had different objectives. The vocational training programme needed basic resources and the British Manual was created as an easy to read reference book on common problems and methods in general practice. The first and second editions met with enthusiastic approval from principals, trainers and trainees. This third edition follows the same general format but has been completely revised and updated and includes many new additions. The five sections are: o planned care of definable population and other groups o principles of teaching and learning o emergencies and their management o psychiatry o clinical care of common conditions We have kept to simple, clear and brief presentations of our conjoint views based on our experiences in our own practices. We dedicate this third edition to our colleagues involved in caring, learning and teaching. They may not agree with us completely but we hope that we will make them consider our suggestions and use them for thought, debate and discussion. We hope also that it will be used as a work book for the whole practice team.
