This book examines the cultural, political, and social implications of surfing and street skateboarding by drawing on critical cultural studies, political philosophy, postcolonial studies, urban sociology, and poststructuralist theory to analyze and render everyday performances as critical theoretical gestures. 2018 Debbies Book® 30th Edition Digital/Printable Book 5 ways to experience Debbies Book®! • Physical book for users who want to hold it in their hands • Printable book for users who want to print certain pages • Searchable eBook PDF with the full exported database • Mobile App for iOS & Android Devices • Blog featuring how-tos, vendors and news The book is organized by categories in alphabetical order. Addresses for Prop Houses and Costume Rental Houses are only displayed in the Prop House and Costume Rental House categories to save space. These proceedings collect selected papers from the 7th International Conference on Green Intelligent Transportation System and Safety held in Nanjing on July 1-4, 2016. The selected works, which include state-of-the-art studies, are intended to promote the development of green mobility and intelligent transportation technology to achieve interconnectivity, resource sharing, flexibility and higher efficiency. They offer valuable insights for researchers and engineers in the fields of Transportation Technology and Traffic Engineering, Automotive and Mechanical Engineering, Industrial and System Engineering, and Electrical Engineering. How is being a professional skateboarder different from being, say, a professional golfer? More scabs, for one. Veteran skate journalist Sean Mortimer has interviewed the top skaters of all time to answer that question in meaningful and often humorous ways. Tony Hawk, Stacy Peralta, Lance Mountain, and Rodney Mullen are a handful of the skaters who opine on sacking yourself, skate-induced ulcers, and the various ways in which skating ruins your love life. Including compelling photographs, Stalefish documents the gritty oral history of professional skating like no other book. The President's Commission on the Assassination of President Kennedy, known unofficially as the Warren Commission, was established by President Lyndon B. Johnson through Executive Order 11130 on November 29, 1963 to investigate the assassination of United States President John F. Kennedy that had taken place on November 22, 1963. This book includes the Commission's report, which was based on the

investigation, as well as all the supporting documents collected during the investigation, and the testimony or depositions of 552 witnesses. "TRB's National Cooperative Highway Research Program (NCHRP) Report 730: Design Guidance for Freeway Mainline Ramp Terminals presents design guidance for freeway mainline ramp terminals based on current driver and vehicle behavior. Appendixes A to D to NCHRP Report 730 were not published as part of the print or PDF version of the report. They are only available electronically through the following links: Appendix A: Aerial View of Study Locations. Appendix B: Histograms of Observed Acceleration Rates. Appendix C: Verbal Instructions for Behavioral Study. Appendix D: Potential Changes Proposed for Consideration in the Next Edition of the Green Book (Note: Appendix D contains tracked changes that have been intentionally left intact--i.e., not accepted.)" Appendixes are available at: <http://www.trb.org/Highways1/Blurbs/167516.aspx>-- EXCLUSIVE OFFER - 'The FlatSigned Press' announces the release of our FIRST published work! We are NOW offering 'THE ASSASSINATION OF JFK REPORT' for the FIRST TIME EVER ANYWHERE! We are offering Signed/Leather/Numbered copies, each PERSONALLY signed by former President Gerald R. Ford, the last surviving member of the Warren Commission, TO YOU NOW! This treasure includes EXCLUSIVE new information from our eldest living American president! Only 2948 #ed editions and 52 Lettered Editions. For fifty years the truth about the assassination of President John F. Kennedy has been obscured. This book releases us from a crippling distortion of American history. At 1:00 p.m. on November 22, 1963, President John F. Kennedy was pronounced dead, the victim of a sniper attack during his motorcade through Dallas. That may be the only fact generally agreed upon in the vast literature spawned by the assassination. National polls reveal that an overwhelming majority of Americans (75%) believe that there was a high-level conspiracy behind Lee Harvey Oswald. Many even believe that Oswald was entirely innocent. In this continuously absorbing, powerful, ground-breaking book, Vincent Bugliosi shows how we have come to believe such lies about an event that changed the course of history. The brilliant prosecutor of Charles Manson and the man who forged an iron-clad case of circumstantial guilt around O. J. Simpson in his best-selling Outrage Bugliosi is perhaps the only man in America capable of writing the definitive book on the Kennedy assassination. This is an achievement that has for years seemed beyond reach. No one imagined that such a book would ever be written: a single volume that once and for all resolves, beyond any reasonable doubt, every lingering question as to what happened in Dallas and who was responsible. There have been hundreds of books about the assassination, but there has never been a book that covers the entire case, including addressing every piece of evidence and each and every conspiracy theory, and the facts, or alleged facts, on which they are based. In this monumental work, the author has raised scholarship on the assassination to a new and final level, one that far surpasses all other books on the subject. It adds resonance, depth, and closure to the admirable work of the Warren Commission. Reclaiming History is a narrative compendium of fact, forensic evidence, reexamination of key witnesses, and common sense. Every detail and nuance is accounted for, every conspiracy theory revealed as a fraud on the American public. Bugliosi's irresistible logic, command of the evidence, and ability to draw startling inferences shed fresh light on this American nightmare. At last it all makes sense. Some images in this ebook are not displayed due to permissions issues. Warren Commission Report is the result of the investigation regarding the assassination of United States President John F. Kennedy. The U.S. Congress passed Senate Joint Resolution 137 authorizing the Presidential appointed Commission to report on the assassination of President John F. Kennedy, mandating the attendance and testimony of witnesses and the production of evidence. After eleven months of the investigation the Commission presented its findings in 888-page final report. The key findings presented in this report were that President Kennedy was assassinated by Lee Harvey Oswald, that Oswald acted entirely alone and that Jack Ruby also acted alone when he killed

Oswald two days later. The Commission's findings have proven controversial and have been both challenged and supported by later studies. Warren Commission hearings. Skateboarding is both a sport and a way of life. Creative, physical, graphic, urban and controversial, it is full of contradictions – a billion-dollar global industry which still retains its vibrant, counter-cultural heart. Skateboarding and the City presents the only complete history of the sport, exploring the story of skate culture from the surf-beaches of '60s California to the latest developments in street-skating today. Written by a life-long skater who also happens to be an architectural historian, and packed through with full-colour images – of skaters, boards, moves, graphics, and film-stills – this passionate, readable and rigorously-researched book explores the history of skateboarding and reveals a vivid understanding of how skateboarders, through their actions, experience the city and its architecture in a unique way. An intelligent transportation system (ITS) offers considerable opportunities for increasing the safety, efficiency, and predictability of traffic flow and reducing vehicle emissions. Sensors (or detectors) enable the effective gathering of arterial and controlled-access highway information in support of automatic incident detection, active transportation and demand management, traffic-adaptive signal control, and ramp and freeway metering and dispatching of emergency response providers. As traffic flow sensors are integrated with big data sources such as connected and cooperative vehicles, and cell phones and other Bluetooth-enabled devices, more accurate and timely traffic flow information can be obtained. The book examines the roles of traffic management centers that serve cities, counties, and other regions, and the collocation issues that ensue when multiple agencies share the same space. It describes sensor applications and data requirements for several ITS strategies; sensor technologies; sensor installation, initialization, and field-testing procedures; and alternate sources of traffic flow data. The book addresses concerns related to the introduction of automated and connected vehicles, and the benefits that systems engineering and national ITS architectures in the US, Europe, Japan, and elsewhere bring to ITS. Sensor and data fusion benefits to traffic management are described, while the Bayesian and Dempster-Shafer approaches to data fusion are discussed in more detail. ITS Sensors and Architectures for Traffic Management and Connected Vehicles suits the needs of personnel in transportation institutes and highway agencies, and students in undergraduate or graduate transportation engineering courses. 2017 Debbies Book® 29th Edition Digital/Printable Book 5 ways to experience Debbies Book®! • Physical book for users who want to hold it in their hands • Printable book for users who want to print certain pages • Tablet-friendly eBook for users who love their iPads and eReaders • Mobile App for iOS & Android Devices • Blog featuring how-tos, vendors and news The book is organized by categories in alphabetical order. The story of the simple skateboard is part thriller, part underground, underdog success tale. It's chock-full of innovations, far-out graphic artistry, and ever-more-incredible hot-dogging feats. And the story's told in this book with contributions from the stars themselves—Tony Hawk, Stacey Peralta, Jeff Ho, the Dogtown Z-Boys, and more. Beautifully illustrated with historical posters, ads, and memorabilia along with new action photography, studio skateboard shots, and unique portraits of the stars, this is a fitting tribute to an American classic. 2016 Debbies Book® 28th Edition Digital/Printable Book 5 ways to experience Debbies Book®! • Physical book for users who want to hold it in their hands • Printable book for users who want to print certain pages • Tablet-friendly eBook for users who love their iPads and eReaders • Mobile App for iOS & Android Devices • Blog featuring how-tos, vendors and news The book is organized by categories in alphabetical order. Ramp tricks—skate moves made on, over, or around wood ramps, cement bowls, and half-pipes—are a key, albeit challenging, component of skateboarding. Hundreds of captioned, sequential photographs demonstrate precisely how these exacting moves are safely made in this indispensable guide to 40 ramp tricks. Beginning with basic moves, including stalls, grinds, and slides, skaters gradually learn the particular positioning and balance needed to perform more advanced tricks such as flips and airs. A brief history of ramp skateboarding examines the birth of the genre as well as champions of the sport, including the pioneering Dogtown Crew and current stars Bob Burnquist and Tony Hawk. It was the double murder case that gripped Australia, and former Crown

Prosecutor Mark Tedeschi QC is finally able to share all the shocking details. Dorothy Davis and Kerry Whelan were both happy, healthy, affluent, middle-class women from conservative, loving families. Such women are hardly ever among the ranks of the missing. They were not hitchhikers, or associates of drug dealers, or unhappy with their family relationships, or suffering from mental health issues. Dorothy Davis and Kerry Whelan came from different parts of Sydney, mixed in quite different circles, and led completely different lives. They had never met each other, and if they had, they would have had little in common. In fact, Dorothy Davis and Kerry Whelan had one thing in common – they both knew Bruce Allan Burrell. The disappearance without trace of these two women caused massive police investigations and resulted in sensational trials that gripped the nation of Australia. This book explores the intricacies of those investigations and delves into the twisted, tortuous processes of the legal proceedings, while exploring the dark recesses of the mind of Bruce Burrell. 'Gripping writing, from an expert on the inside of some of the state's worst murders and disappearances.' Peter FitzSimons This book is about skateboard video and experimental ways of thinking about cities. It makes a provocative argument to consider skate video as an archive of the city from below. Here 'below' has a dual meaning. First, below refers to an unofficial archive, a subaltern history of urban space. Second, below refers to the angle from which skateboarders and filmers gaze upon, capture, and consume the city—from the ground up. Since taking to the streets in the early 1980s, skateboarding has been captured on film, video tape and digital memory cards, edited into consumable forms and circulated around the world. Videos are objects amenable to ethnographic analysis while also archiving exercises in urban ethnography by their creators. I advocate for taking skate video seriously as a (fragile) archive of the urban backstage, collective memory across time and space, creative urban practice, urban encounters (people-to-people and people-to-object/s), and the globalization of a subculture at once delinquent and magnificent. "Research sponsored by the American Association of State Highway and Transportation Officials in cooperation with the Federal Highway Administration." Based on new archival evidence and interviews, and setting out a new theoretical framework for music video analysis, Emily Caston presents a major new analysis of music videos from 1966-2016, identifying not only their distinctive British traits, but their parallels with British film genres and styles. By analysing the genre, craft and authorial voice of music video within the context of film and popular music, the book sheds new light on existing theoretical and historical questions about audiences, authorship, art and the creative industries. Far from being an American cultural form, the book reveals music video's roots in British and European film traditions, and suggests significant ways in which British video has impacted popular film and music culture. 2019 Debbies Book® 31st Edition Digital/Printable Book All the ways to experience Debbies Book®! • Physical book for users who want to hold it in their hands • Printable book for users who want to print certain pages • Searchable, online database accessible from any device • Blog featuring how-tos, vendors and news The book is organized by categories in alphabetical order. Addresses for Prop Houses and Costume Rental Houses are only displayed in the Prop House and Costume Rental House categories to save space. The purpose of this study was to evaluate the traffic safety of urban highway segments near exit and entrance ramps in the Montréal metropolitan area. The city's tight urban environment has resulted in the construction of sub-standard highway ramp merging sections (e.g. short merging lengths, inadequate visibility, influence zone overlap, etc.). In order to mitigate safety problems associated with these inadequately designed features, a special lane-change ban treatment (technical designation LCGV1) was implemented several years ago at various ramps. This study used accident data and video-based surrogate safety measures to evaluate the safety effectiveness of the treatment. The cross-sectional accident analysis controlled for factors such as lane configuration, merge length, traffic flow and speed, area of influence overlap (inter-ramp distance), lane and shoulder widths, horizontal and vertical curves, and covered the presence of the treatment across 10 years ... 2020 Debbies Book® 32nd Edition Digital/Printable Book The book is organized by categories in alphabetical order. All the ways to experience Debbies Book®! • Physical book for users who want to hold it in their hands • Printable pdf book for users who want to print certain pages • Searchable, online database accessible from any device • Blog featuring how-tos, vendors and news This updated edition of The Warren Report, compiled by The Associated Press, is the definitive guide to the U.S. government's

investigation of President John F. Kennedy's assassination. The AP first published the findings of the Warren Commission to help the general public understand the details of the report, which was both comprehensive and complex. Now, read this updated account with its fascinating conclusions for an inside look at Lee Harvey Oswald's attack on the president and its devastating repercussions. Featuring photos from the AP archive and a special report, "The Lingering Shadow," which first appeared in The Dallas Times Herald in 1967 to address Warren Report critics, this book is a must-read for lovers of American history and those curious about a singular event that changed the course of a country.
