No longer do humans struggle to meet their basic needs.

Arguably, they live better than kings of old. But despite this, it's the intelligence explosion that steals the limelight; technological innovations come so rapidly that they create a backlash. The risks to the new world order are just too great. And now there's talk of both a nano man--comprised of a shape-shifting swarm of nanites--and a human with the god gene. Even with a planetary ubermind to keep things under control, fears are that one or another of them will be able to hack the ubermind. Have they done so already? And if so, how long after they settle their score with one another to see who's top dog before they're free to mess with the entire human race? For one woman and the two men that love her, these concerns are more than simply academic. You see, one of the three carries the god gene. Pick up a copy now to see if the very thing that truly makes us stronger--our relationships--survives the latest onslaught of a technology that hits like a tsunami wave. worse, right or wrong, just different. Laugh and cry with Dr. Black and his wife as you vicariously join them on their journey of service in Tanzania. If I really press myself, I can remember. Are you still supposed to stand by your man, even if it turns out he isn't who you thought he was? When she promised "for richer or poorer, in sickness and in health," this isn't what she pictured. But sometimes you don't get the life you imagined.
