"Taking a skills-building approach, Kickstarting Your Academic Career is a primer on the common scholastic challenges first-year social sciences students face upon entering college or university. Based on the challenges that instructors most often find students need help with, the authors offer practical advice and tips on such topics as communicating with instructors, note taking, how to read a textbook, writing exams, and researching and writing papers. The succinct writing and clear organization make this an essential reference for first-year students as they encounter post-secondary work for the first time, and a useful refresher for upper year students looking to refine their skills."-- Covering the theory of computation, information and communications, the physical aspects of computation, and the physical limits of computers, this text is based on the notes taken by one of its editors, Tony Hey, on a lecture course on computation given by a series of six books for Classes IX and X according to the CBSE syllabus A brief, practical text that focuses on the art of speaking persuasively. A discretionary purchase for law students, business school students, lawyers, and other professionals, this text compliments any course covering persuasion, trials, appellate advocacy, and any clinical program with an oral component. New to the Third Edition: Porter v. Donnelly Case File: With these materials, readers can practice making opening statements, closing arguments, examining witnesses, and making arguments to a court. Exercises at the end of each chapter to help you master new skills. Expanded historical examples of effective and ineffective speeches. Analysis of how social media has affected verbal persuasion, the dangers of propaganda, and the roles of facts and emotions in effective rhetoric. Professors and students will benefit from: This book offers a practical, easy-to-understand approach to improve your public speaking. The lessons are derived from the best teachings of classical rhetoric, psychology, law, and the theater. Readers are exposed to concrete lessons in topics such as how to write an effective verbal presentation, how to create and use memorable visual aids, how to improve physical delivery and stage presence, vocal exercises, and techniques to conquer stage fright. The book also explores how to speak effectively in a world dominated by social media and in today's political climate. This book is suitable for a trial practice class because it includes a complete case file for the trial of Porter v. Donnelly. However, it exceeds the offerings of a typical case file because readers are not simply learning the nuts and bolts of trial practice exercises; instead, they are asked to view each of those exercises through the lens of rhetoric. Original publication and copyright date: 2011. Announcements for the following year included in some vols. "We cannot change the cards we are dealt, just how we play the hand."---Randy Pausch A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave--"Really Achieving Your Childhood Dreams"--wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have...and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come. However, in the 2013 conference, we were overwhelmed with a large number of teachers who not only wanted to find out about this teaching and learning concept but had already used it. Consequently, the focus of the 2nd German Inverted Classroom Conference to which this conference volume is dedicated was no longer the "installation" of the Inverted Classroom Model (ICM) but fine adjustments in the actual application of it. This is reflected in the contributions to this volume. Even though all three central aspects of the ICM are addressed, (1) content production and delivery, (2) testing, and (3) the in-class phase, there has been a shift away from mere content production towards an expansion of the model as well as a move towards fine adjustments of the three components. This newest book from Watts Humphrey is a hands-on introduction to basic disciplines of software engineering. Designed as a workbook companion to any introductory programming or software-engineering text, Humphrey provides here the practical means to integrate his highly regarded Personal Software Process (PSP) into the undergraduate curriculum. Applying the book's exercises to course assignments, students learn both to manage their time effectively and to monitor the quality of their work, good practices they will need to be successful in their future careers. The book is supported by its own electronic supplement, which includes spreadsheets for data entry and analysis. A complete instructor's package is also available. By mastering PSP techniques early in their studies, students can avoid-or overcome-the popular "hacker" ethic that leads to so many bad habits. Employers will appreciate new hires prepared to do competent professional work without, as now is common, expensive retraining and years of experience. Description of the product: • 100% Updated with Latest Syllabus & Fully Solved Board Paper • Crisp Revision with Topic wise Revision Notes, Mind Maps & Mnemonics • Extensive Practice with 2000+ Questions & 2 Practice Papers • Concept Clarity with 1000+concepts, Smart Mind Maps & Mnemonics • Final Boost with 50+ concept videos • 100% Exam Readiness with Competency Based Questions Announcements for the following year included in some vols. In the early days of the First World War two volunteer Pals Battalions were raised in Bradford and this is their remarkable story. David Raw's account is based on memoirs, letters, diaries, contemporary newspaper reports, official records and archives, and it is illustrated with many maps and previously unpublished photographs. He recaptures the heroism and stoical humour displayed by the Bradford Pals in the face of often terrible experiences, but he also recounts the tragedy, pain, suffering and grief that was the dark side of war.
