Title promotes guided reading and writing, and also useful for independent reading, and phonemic awareness. Size:

18.4cm wide by 20.4cm high. 52 pages. Published 2003. Maps have been a part of human culture since the days of scratching on cave walls, and this richly illustrated history chronicles the road from simple diagrams used to avoid danger to the complex, navigational charts used today. Displaying an array of historic atlases and a variety of cartography styles, this book allows young readers to test their map-reading skills while discovering the intricate beauty and the wealth of information held within. Geographical concepts are spotlighted through an assortment of guided activities--including finding the elevation of hills, plotting a course with a magnetic compass, creating three-dimensional land models using a contour map, and performing a plot survey. Drawing the conclusion that the study of geography and maps is crucial to understanding an ever-changing planet, this handbook discloses the ways in which technological advances in cartography can further discussions on climate change, warfare, environmental conservation, population growth, and other timely topics. This exemplary Handbook provides readers with a novel synthesis of international research, evidence-based practice and personal reflections to offer an overview of the current state of knowledge in the field of teaching geography in higher education. Chapters cover the three key transitions – into, through, and out of higher education – to present a thorough analysis of the topic. Additional reading and writing. A cross-curricular theme based book for Key Stage 1 and 2 (19 other titles also available in series). Hotlinks include a range of genre, and lesson plans and activity sheets are available on CD-ROM.
