"This report discusses the Army's initial research into converting Force 21 Training Program (FXXITP) products to meet the increasingly pressing training needs of digital battle staffs. The report describes the activities and outcomes of the U.S. Research Institute for the Behavioral and Social Sciences (ARI) Force 21 Training Program Digital (FXXITP-D) project. The project developed an approach that supports the conversion of existing training products in order to meet new training needs. During the project, the conversion approach was employed to research and enact conventional to digital conversions of selected FXXITP products, including the Battle Staff Training System (BSTS) and Combined Arms Operations at Brigade Level, Realistically Achieved Through Simulation (COBRAS) vignettes, Brigade Staff Exercise (BSE), and Brigade and Battalion Staff Exercise (BBSE).
