Survival Ebooks Excerpt from *The Legend of Longinus in Ecclesiastical Tradition and in English Literature, and Its Connection With the Grail* The present study was presented to the Faculty of Bryn Mawr College in October, 1910, in fulfilment of a requirement made of candidates for the degree of Doctor of Philosophy. The object of the dissertation is, in the main, to investigate anew the origin of the legend of Longinus in ecclesiastical and popular tradition, and to trace its use in mediæval English literature, as has already been done in the field of French literature by Carl Kroner. In following the course of the Longinus legend I have thought best not to confine attention solely to literary documents, but to include also some account of the part which it played in art and in the liturgy, for the reason that its importance in both these connections undoubtedly contributed to its development in literature, and perhaps even determined to some extent its literary form. Moreover, though the present study has been undertaken primarily from the standpoint of English literature, I have ventured to discuss, in the last two chapters, special problems relating to the literary influence of Longinus which lie wholly outside of that field. The first of these is the resemblance, first pointed out by Bugge, between the Longinus story and the slaying of Baldr. The second is the relationship which exists between the lance of the Crucifixion and the bleeding lance of the Grail romances. These two chapters, though distinctly in the nature of excursus, deal, after all, with phases of the Longinus legend which are of general literary importance. In this fascinating and comprehensive collection of Chinese myths and legends, E. T. C. Werner drew upon material readily available to him as a member of the Chinese government's' Historiographical Bureau in Peking. A former barrister and British consul in Foochow, Werner presents a wealth of information illuminating the ideas and beliefs that governed the daily lives of the Chinese people long before the revolutions of the 20th century. Offering a provocative glimpse into a world dominated by traditional rules of etiquette and inhabited by demons, dragon-gods, and spirits, the volume opens with an introductory chapter on the origins of the Chinese people. In succeeding chapters, Mr. Werner's readable, well-illustrated text considers the gods of China and myths of stars, thunder, lightning, wind and rain; of water and fire; of epidemics, medicine, and exorcism; as well as tales about the goddess of mercy, the guardian of the gate of heaven, accounts of how the Monkey became a god, and much more. In addition, 32 striking illustrations depict such traditional deities as the Spirit That Clears the Way, civilian and military Door Gods, the Kitchen-God, Dragon-Gods, the Gods of Happiness, Office, and Longevity, and others. Engrossing and informative, Myths and Legends of China will appeal not only to lovers of folklore but to anyone interested in Chinese art, culture, or philosophy.

The instant #1 New York Times bestseller | A Washington Post Notable Book | One of NPR's Best Books of 2021 The definitive behind-the-scenes story of Trump's final year in office, by Phil Rucker and Carol Leonnig, the Pulitzer-Prize winning reporters and authors of *A Very Stable Genius*. “Chilling.” – Anderson Cooper “Jaw-dropping.” – John Berman “Shocking.” – John Heilemann “Explosive.” – Hallie Jackson “Blockbuster new reporting.” – Nicolle Wallace “Bracing new revelations.” – Brian Williams “Bombshell reporting.” – David Muir

The true story of what took place in Donald Trump’s White House during a disastrous 2020 has never before been told in full. What was really going on around the president, as the government failed to contain the coronavirus and over half a million Americans perished? Who was influencing Trump after he refused to concede an election he had clearly lost

and spread lies about election fraud? To answer these questions, Phil Rucker and Carol Leonnig reveal a dysfunctional and bumbling presidency's inner workings in unprecedented, stunning detail. Focused on Trump and the key players around him—the doctors, generals, senior advisers, and Trump family members—Rucker and Leonnig provide a forensic account of the most devastating year in a presidency like no other. Their sources were in the room as time and time again Trump put his personal gain ahead of the good of the country. These witnesses to history tell the story of him longing to deploy the military to the streets of American cities to crush the protest movement in the wake of the killing of George Floyd, all to bolster his image of strength ahead of the election. These sources saw firsthand his refusal to take the threat of the coronavirus seriously—even to the point of allowing himself and those around him to be infected. This is a story of a nation sabotaged—economically, medically, and politically—by its own leader, culminating with a groundbreaking, minute-by-minute account of exactly what went on in the Capitol building on January 6, as Trump's supporters so easily breached the most sacred halls of American democracy, and how the president reacted. With unparalleled access, Rucker and Leonnig explain and expose exactly who enabled—and who foiled—Trump as he sought desperately to cling to power. A classic and heart-racing work of investigative reporting, this book is destined to be read and studied by citizens and historians alike for decades to come. This is the first book to examine the various uses of the Arthurian legend in Hollywood film, covering films from the 1920s to the present. The authors use five representational categories: intertextual collage (or cult film); melodrama, which focuses on the love triangle; conservative propaganda, pervasive during the Cold War; the Hollywood epic; and the postmodern quest, which commonly employs the grail portion of the legend. Arguing that filmmakers rely on the audience's rudimentary familiarity with the legend, the authors show

that only certain features of the legend are activated at any particular time. This fascinating study shows us how the legend has been adapted and how through the popular medium of Hollywood films, the Arthurian legend has survived and flourished. A shopping, consumer protection and a best bets guide, this source will get the buyer on the right track. The experiments related to the nature and properties of engineering materials and provided information to assist in teaching about materials in the education community. If you're looking for better understanding of your BMW, look no further! This manual provides the highest level of clarity and completeness for all service and repair procedures. Covers 525i, 530i, 535i, 540i, including touring. Although the origins of The Septuagint, the most influential of the Greek versions of the first five books of the Hebrew Bible, are uncertain, different versions of a legend about the miraculous nature of its translation have existed since antiquity. The legend describes how Ptolemy Philadelphus (285-247 BCE) commissioned 72 Jewish scribes to translate the sacred Hebrew scriptures for his famous library in Alexandria and how the scribes, working independently, produced identical Greek versions. Adapted and changed by Jews, Pagans, Christians, and Muslims for many different reasons, all versions of the legend are included in this volume. Contains Insecticide decisions and Notices of judgement under the Insecticide Act formerly issued only as a separate publication, now published in both forms. The Second International Conference on Concrete Repair, Rehabilitation and Retrofitting (ICCRRR 2005) was held in Cape Town, South Africa, from 24-26 November 2008. The Conference followed the very successful First International Conference, also in Cape Town in 2005, and continued as a collaborative venture by researchers from the South African Research Programme in Concrete Materials (based at the

Universities of Cape Town and The Witwatersrand) and The Construction Materials Sections at Leipzig University and MFGA Leipzig in Germany. The background, in industry and the state of national infrastructures, continues to be highly challenging and demanding. The facts remain that much of our concrete infrastructure deteriorates at unacceptable rates, that we need appropriate tools and techniques to undertake the vast task of sound repair, maintenance and rehabilitation of such infrastructure, and that all this must be undertaken with due cognisance of the limited budgets available for such work. New ways need to be found to extend the useful life of concrete structures cost-effectively. Confidence in concrete as a viable construction material into the 21st century needs to be retained and sustained, particularly considering the environmental challenges that the industry and society now face. The conference proceedings contain papers, presented at the conference, and classified into a total of 12 sub themes which can be grouped under the three main themes of (i) Concrete durability aspects, (ii) Condition assessment of concrete structures, and (iii) Concrete repair, rehabilitation and retrofitting. The major interests in terms of submissions exists in the fields of innovative materials for durable concrete construction, integrated service life modelling of reinforced concrete structures, NDE/NDT and measurement techniques, repair methods and materials, and structural strengthening and retrofitting techniques. The large number of high-quality papers presented and the wide range of relevant topics covered confirm that these proceedings will be a valued reference for many working in the important fields of concrete durability and repair, and that they will form a suitable base for discussion and provide suggestions for future development and research. Set of book of abstracts (476 pp) and a searchable full paper CD-ROM (1396 pp).
