Understanding Virtual Reality Jan 21 2020 Understanding Virtual Reality: Interface, Application, and Design, Second Edition, arrives at a time when the technologies behind virtual reality have advanced dramatically in their development and deployment, providing meaningful and productive virtual reality applications. The aim of this book is to help users take advantage of ways they can identify and prepare for the applications of VR in their field, whatever it may be. The included information counters both exaggerated claims for VR, citing dozens of real-world examples. By approaching VR as a communications medium, the authors have created a resource that will

remain relevant even as the underlying technologies evolve. You get a history of VR, along with a good look at systems currently in use. However, the focus remains squarely on the application of VR and the many issues that arise in application design and implementation, including hardware requirements, system integration, interaction techniques and usability. Features substantive, illuminating coverage designed for technical or business readers and the classroom Examines VR's constituent technologies, drawn from visualization, representation, graphics, human-computer interaction and other fields Provides (via a companion website) additional case studies, tutorials, instructional materials and a link to an open-source VR programming system Includes updated perception material and new sections on game engines, optical tracking, VR visual interface software and a new glossary with pictures

Innovative Mobile Platform Developments for Electronic Services Design and Delivery Apr 28 2023 In the ever-growing world of technology, it is becoming more important to understand the developments of new electronic services and mobile applications. Innovative Mobile Platform Developments for Electronic Services Design and Delivery is a comprehensive look at all aspects of production management, delivery and consumption of e-services, self services, and mobile communication including business-to-business, business-to-consumer, government-to-business, government-to-consumer, and consumer-to-consumer e-services. This volume is perfect for the interest of professionals, academic educators, researchers, and

industry consultants by providing the latest interdisciplinary research as a new platform for learning and research dissemination.

Beyond Point-and-Shoot Feb 02 2021 There are two types of new photographers: those satisfied with their low-cost point-and-shoot cameras, and those more enthusiastic photographers who recognize the limitations of low-cost equipment and want to improve their pictures. No longer satisfied with simple snapshots, the enthusiast moves up to a more complex digital camera-one with interchangeable lenses and manual controls-to satisfy their artistic urge. Assuming little to no knowledge of photographic terms, techniques, or technology, Beyond Point-And-Shoot is intended to help smooth the transition from photographic newbie to "real" photographer who is experienced, in-control, and passionate about their craft. Author Darrell Young explores various types of interchangeable-lens cameras, focusing on those with larger imaging sensors, such as digital single-lens reflex (DSLR) cameras. Learn how to get the most out of your camera's automatic and semi-automatic exposure modes, as well as how to move beyond those modes and take full, manual control of your camera. Watch your photography improve as you discover how to apply important photographic principles, such as depth of field, white balance, and metering. With this newfound knowledge you'll move beyond point-and-shoot and begin taking truly great photographs. Other topics include: Camera types Lenses Aperture, shutter speed, and ISO Metering and shooting controls Lens focal lengths and

angles of view The histogram Color spaces Sensors Filters
Image file formats Managing digital noise And much more!

Resource Use Efficiency and Optimum Cropping Pattern in Rajasthan Aug 28 2020 First of all, I ordiently pay my obeisance to “Maa Saraswati and Lord Hanumana” with whose grace and blessings I could accomplish this task. It is a matter of pride and honour for me to express my sincere and deep sense of gratitude to my esteemed teacher and major advisor, Dr. (Mrs.) Latika Sharma, Assistant Professor & Officer Incharge (CCPC), Department of Agricultural Economics and Management, Rajasthan College of Agriculture, Udaipur for stimulative guidance, incessant encouragement, constructive suggestions, painstaking, keen and sustained efforts throughtout the course of study without which it would not have been possible for me to complete this work.

SAE Technical Paper Series Jul 27 2020 Online version:
Technical papers portion of the SAE Digital Library

references thousands of SAE Technical Papers covering the latest advances and research in all areas of mobility engineering including ground vehicle, aerospace, off-highway, and manufacturing technology. Sample coverage includes fuels and lubricants, emissions, electronics, brakes, restraint systems, noise, engines, materials, lighting, and more. Your SAE service includes detailed summaries, complete documents in PDF, plus document storage and maintenance

Introductory Economic Theory [NEHU, Shillong] Mar 23 2020 This book begins with an introduction to economics highlighting the economic problem of scarcity and choice. Further, it goes on and discusses the scope of economics as well as acquaints the students with the methodologies of economics. Basic microeconomic concepts such as demand, supply, competitive market equilibrium, elasticity and indifference curve analysis of demand have been explained in a simple and lucid manner. The book also dwells into theories of production, distribution, rent, interest and profits. It also discusses the market structures prevailing in the capitalist economy, namely, perfect competition and imperfect competition; thoroughly highlighting the sub categories of imperfect competition such as monopolistic competition, oligopoly and monopoly. Concepts of average revenue and marginal revenue have also been discussed in the book.

Universal Access in Human-Computer Interaction. Methods, Technologies, and Users Nov 30 2020 This two-volume set LNCS 10907 and 10908 constitutes the refereed proceedings of the 12th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2018, held as part of HCI International 2018 in Las Vegas, NV, USA, in July 2018. The total of 1170 papers and 195 posters included in the 30 HCII 2018 proceedings volumes was carefully reviewed and selected from 4373 submissions. The 49 papers presented in this volume were organized in topical sections named: design for all, accessibility and usability; alternative I/O techniques, multimodality and adaptation; non-visual interaction; and designing for cognitive disabilities.

Pump User's Handbook Nov 23 2022 This text explains just how and why the best-of-class pump users are consistently achieving superior run lengths, low maintenance expenditures and unexcelled safety and reliability. Written by practicing engineers whose working career was marked by involvement in pump specification, installation, reliability assessment, component upgrading, maintenance cost reduction, operation, troubleshooting and all conceivable facets of pumping technology, this text describes in detail how to accomplish best-of-class performance and low life cycle cost.

IBM Cognos 10 Framework Manager Dec 12 2021 Presented in a hands-on style, this guide presents you with real world examples to guide you through every process step by step. This book will be useful for any developer,

novice or expert, who uses Framework Manager to build packages, but wants to expand their knowledge even further.

The Handbook of Electronic Messaging Jan 01 2021 You know by now that electronic messaging is more than e-mail. It's now the premier enabling technology for delivering information, products, and services to anyone, anywhere, anytime. Your mission, and you'll probably have to expect it, is to make this happen. We can help. The Handbook of Electronic Messaging shows you how to build, leverage, manage, and protect a messaging infrastructure that will transport your enterprise from simple messaging to complex collaborative computing and the global electronic marketplace. As you'd expect for a solid handbook, The Handbook of Electronic Messaging provides you with clear explanations of the basic terms, concepts, techniques, architectures, and products. It also provides what you need to know to build and maintain a highly functional and serviceable messaging environment. Edited by Nancy Cox of Network Computing Magazine, The Handbook of Electronic Messaging features contributions from practitioners, consultants, users, and vendors who share their expertise and experience with you.

International Business: Concept, Environment and Strategy Nov 11 2021 International Business by Sharan is written in a pragmatic way with an inclination on managerial aspect, thus encouraging students to explore international business as a career choice. It deals with the latest topics and development which we are witnessing around the globe. It

attempts to impart the core body of knowledge in international business in an interesting and lively manner. This text not only describes the ideas of international business but it also uses contemporary examples, scenarios, and cases to help students effectively put theory into practice.

36th Annual International Symposium on Microarchitecture (MICRO-36 2003) May 05 2021 MICRO-36 discusses new microarchitecture and software techniques, and explores the latest research related to processor architecture, compilers, and systems for technical interaction on traditional MICRO topics. The proceedings also places a special emphasis on optimizations that take advantage of application specific opportunities. In addition, this year's MICRO includes papers that will benefit both the microarchitecture and embedded architecture communities.

Metropolitan Transport and Land Use Oct 30 2020 As cities around the globe respond to rapid technological changes and political pressures, coordinated transport and land use planning is an often targeted aim. Metropolitan Transport and Land Use, the second edition of Planning for Place and Plexus, provides unique and updated perspectives on metropolitan transport networks and land use planning, challenging current planning strategies, offering frameworks to understand and evaluate policy, and suggesting alternative solutions. The book includes current

and cutting-edge theory, findings, and recommendations which are cleverly illustrated throughout using international examples. This revised work continues to serve as a valuable resource for students, researchers, practitioners, and policy advisors working across transport, land use, and planning.

The Farm Management Handbook Oct 10 2021

The Practical Guide to Project Management Documentation Mar 15 2022 Project Management The one-stop resource for project management documentation and templates for all projects The success of any project is crucially dependent on the documents produced for it. The Practical Guide to Project Management Documentation provides a complete and reliable source of explanations and examples for every possible project-related document—from the proposal, business case, and project plan, to the status report and final post-project review. The Practical Guide to Project Management Documentation is packed with material that slashes the time and effort expended on producing new documents from scratch. Following the processes in the Project Management Institute's PMBOK® Guide, this one-stop, full-service book also offers tips and techniques for working with documents in each project process. Documentation for several project/client scenarios is addressed, including internal and externally contracted projects. A single project—the construction of a water theme park—is used as the case study for all the document examples. An included CD-ROM provides all the documents from the book as Microsoft Word(r) files.

Readers can use these as a framework to develop their own project documents. The Practical Guide to Project Management Documentation is an unmatched reference for the numerous documents essential to project managers in all industries. (PMBOK is a registered mark of the Project Management Institute, Inc.)

Use of Computers in the Coal Industry 1986 Jan 13 2022
This book is an outcome of the third conference on the use of computers in the coal industry in Morgantown. It presents valuable computer applications covering the most aspects of coal industry and covers following areas: mine management and economics; surface mining; coal preparation; and blasting.

S.A.E. Transactions Jul 07 2021 Beginning in 1985, one section is devoted to a special topic

Guidelines for the management of symptomatic sexually transmitted infections Mar 03 2021 The WHO global health sector strategy on sexually transmitted infections, 2016–2021, endorsed by the World Health Assembly in 2016, aims to eliminate STIs as a public health threat by 2030. In 2019, WHO published estimates of new cases of chlamydia, gonorrhoea, syphilis and trichomoniasis. Recent changes in the epidemiology of STIs and progress in prevention, diagnosis and treatment of STIs and HIV have necessitated changes in approaches to STI prevention and management. To address these STIs, the most widely used

approach in clinical settings is the syndromic management of STIs. In most resource-limited settings, the syndromic management flow charts are still the standard of care where laboratory diagnosis is not available or is hard to access. The objectives of these guidelines are to provide updated, evidence-informed clinical and practical recommendations on the case management of people with symptoms of STIs; and to support countries in updating their national guidelines for the case management of people with symptoms of STIs. These guidelines include the management of symptomatic infections related to urethral discharge syndrome, including persistent urethral discharge syndrome; vaginal discharge syndrome, including persistent vaginal discharge; anorectal infection; genital ulcer disease syndrome; and lower abdominal pain syndrome. These guidelines are intended for programme managers for STI prevention and control at the national level and the health-care providers at the frontline – primary, secondary and tertiary health care.

Pump User's Handbook: Life Extension, Fourth Edition Jun 18 2022 Just published in its updated fourth edition, this highly regarded text explains in clear terms how and why the best-of-class pump users are consistently achieving superior run lengths, low maintenance expenditures, and unexcelled safety and reliability. Written by practicing engineers whose working careers were marked by involvement in all facets of pumping technology, operation, assessment, upgrading and cost management, this book endeavors to describe in detail how you, too, can

accomplish optimum pump performance and low life cycle cost. A new chapter on breaking the cycle of pump repairs examines the cost of failures and the defined operating range of pumps. The authors also explore mechanical issues, deviations from best available technology, and preventing problems with oil rings and constant level lubricators. Additional topics include bearing housing protector seals, best lube application practices, lubrication and bearing distress, and paying for value.

Natural Resources as Capital Aug 08 2021 An introduction to the concepts and tools of natural resource economics, including dynamic models, market failures, and institutional remedies. This introduction to natural resource economics treats resources as a type of capital; their management is an investment problem requiring forward-looking behavior within a dynamic setting. Market failures are widespread, often associated with incomplete or nonexistent property rights, complicated by policy failures. The book covers standard resource economics topics, including both the Hotelling model for nonrenewable resources and models for renewable resources. The book also includes some topics in environmental economics that overlap with natural resource economics, including climate change. The text emphasizes skills and intuition needed to think about dynamic models and institutional remedies in the presence of both market and policy failures. It presents the nuts and bolts of resource economics as applied to nonrenewable resources, including the two-period model, stock-dependent costs, and resource scarcity. The chapters on renewable

resources cover such topics as property rights as an alternative to regulation, the growth function, steady states, and maximum sustainable yield, using fisheries as a concrete setting. Other, less standard, topics covered include microeconomic issues such as arbitrage and the use of discounting; policy problems including the “Green Paradox”; foundations for policy analysis when market failures are important; and taxation. Appendixes offer reviews of the relevant mathematics. The book is suitable for use by upper-level undergraduates or, with the appendixes, masters-level courses.

Combined Logical-numerical Enhancement of Real-time Control of Urban Drainage Networks Jul 19 2022 .

Intelligent Robotics and Applications Feb 26 2023 The volume set LNAI 11740 until LNAI 11745 constitutes the proceedings of the 12th International Conference on Intelligent Robotics and Applications, ICIRA 2019, held in Shenyang, China, in August 2019. The total of 378 full and 25 short papers presented in these proceedings was carefully reviewed and selected from 522 submissions. The papers are organized in topical sections as follows: Part I: collective and social robots; human biomechanics and human-centered robotics; robotics for cell manipulation and characterization; field robots; compliant mechanisms; robotic grasping and manipulation with incomplete information and strong disturbance; human-centered robotics; development of high-performance joint drive for robots; modular robots and other mechatronic systems; compliant manipulation learning and control for lightweight

robot. Part II: power-assisted system and control; bio-inspired wall climbing robot; underwater acoustic and optical signal processing for environmental cognition; piezoelectric actuators and micro-nano manipulations; robot vision and scene understanding; visual and motional learning in robotics; signal processing and underwater bionic robots; soft locomotion robot; teleoperation robot; autonomous control of unmanned aircraft systems. Part III: marine bio-inspired robotics and soft robotics: materials, mechanisms, modelling, and control; robot intelligence technologies and system integration; continuum mechanisms and robots; unmanned underwater vehicles; intelligent robots for environment detection or fine manipulation; parallel robotics; human-robot collaboration; swarm intelligence and multi-robot cooperation; adaptive and learning control system; wearable and assistive devices and robots for healthcare; nonlinear systems and control. Part IV: swarm intelligence unmanned system; computational intelligence inspired robot navigation and SLAM; fuzzy modelling for automation, control, and robotics; development of ultra-thin-film, flexible sensors, and tactile sensation; robotic technology for deep space exploration; wearable sensing based limb motor function rehabilitation; pattern recognition and machine learning; navigation/localization. Part V: robot legged locomotion; advanced measurement and machine vision system; man-machine interactions; fault detection, testing and diagnosis; estimation and identification; mobile robots and intelligent autonomous systems; robotic vision, recognition and

reconstruction; robot mechanism and design. Part VI: robot motion analysis and planning; robot design, development and control; medical robot; robot intelligence, learning and linguistics; motion control; computer integrated manufacturing; robot cooperation; virtual and augmented reality; education in mechatronics engineering; robotic drilling and sampling technology; automotive systems; mechatronics in energy systems; human-robot interaction.

Optimization of Unit Operations Feb 14 2022 This comprehensive book examines the technology and practical applications of plant multivariable envelope control.

Optimize plant productivity, including air handlers, boilers, chemical reactors, chillers, clean-rooms, compressors and fans, cooling towers, heat exchangers, and pumping stations. B é la G. Lipt á k speaks on Post-Oil Energy Technology on the AT&T Tech Channel.

Project Planning, Scheduling, and Control in Construction Apr 16 2022 Critical Path Method (CPM) and Performance Evaluation and Review Technique (PERT) are widely recognized as the most effective methods of keeping large, complex construction projects on schedule, under budget, and up to professional standards. But these methods remain underused because they are poorly understood and, due to a host of unfamiliar terms and applications, may seem more complicated than they really are. This encyclopedia brings together, in one comprehensive volume, all terms, definitions, and applications related to the time and

costmanagement of construction projects. While many of these termsrefer to ancient and venerable building practices, others haveevolved quite recently and refer specifically to modernconstruction and management techniques. Sources include hundreds ofprofessional books, trade journals, and research publications, aswell as planning and scheduling software vendor literature. The detailed glossary of all applicable terms includes across-referenced listing of examples that describe real-worldapplications for each term supplied. An extensive bibliographycovers all applicable books, articles, and periodicals available onproject planning, scheduling, and control using CPM and relatedsubjects. This book is an important quick reference and desktop informationresource for construction planners, schedulers, and controllers, aswell as civil engineers and project managers. It is also theultimate research tool for educators, students, or anyone who seeksto improve their understanding of the management of modernconstruction projects.
