[Dictionary of Biological Psychology](#) Sep 27 2020 Biological Psychology is the study of psychological processes in terms of biological functions. A major obstacle to understanding dialogue in the field has always been its terminology which is drawn from a variety of non-psychological sources such as clinical medicine, psychiatry and neuroscience, as well as specialist areas of psychology such as ethology, learning theory and psychophysics. For the first time, a distinguished international team of contributors has now drawn these terms together and defined them both in terms of their physical properties and their behavioural significance. The Dictionary of Biological Psychology will prove an invaluable source of reference for undergraduates in psychology wrestling with the fundamentals of brain physiology, anatomy and chemistry, as well as researchers and practitioners in the neurosciences, psychiatry and the professions allied to medicine. It is an essential resource both for teaching and for independent study, reliable for fact-checking and a solid starting point for wider exploration.

Alex and the Scary Things Nov 29 2020 Alex is an alligator who has experienced 'scary' things. In this charmingly illustrated story, he talks about how this affects him and how he copes. By reading about the different parts of Alex that come out because of the scary things he has experienced, such as The Destroyer when he is angry, Spacey when he dissociates, and Puddles when he is sad, children will learn to recognise when they experience these emotions themselves and find solutions for overcoming them. Alex talks about the different coping strategies he uses to get back to being himself, such as breathing techniques, a counting game, painting, and finding a safe space he can go to,

encouraging children to think about when they can do to help themselves handle difficult feelings. An essential resource for professionals working with children who have experienced trauma, including social workers, counsellors, therapists, and child psychologists, as well as for parents and foster carers.
