Korean Modern: The Matter of Identity Apr 24 2020 The development of modern architecture in Korea and, more recently, South Korea, is closely tied to the country's dramatic transformations since the late 19th century. The authors interrogate major periods from the Late Joseon Dynasty to the vibrant democratic present, showing how architecture, by making technological and stylistic leaps, has played an important role in the construction of the nation's identity. The architectural analyses, ranging from Hwaseong Fortress to 21st-century constructions like Paju Book City, Ssamziegil Shopping Center, the Boutique Monaco skyscraper, and the Bauziium Sculpture Museum, focus on buildings in which the formation of a specifically Korean modernism is particularly observable. The appendix includes biographical descriptions of major architectural figures.

Contemporary Korean cinema Oct 23 2022 The first in-depth, comprehensive study of Korean cinema offering original insight into the relationships between ideology and the art of cinema from East Asian perspectives. Combines issues of contemporary Korean culture and cinematic representation of the society and people in both North and South Korea. Covers the introduction of motion pictures in 1903, Korean cinema during the Japanese colonial period (1910-45) and the development of North and South Korean cinema up to the 1990s. Introduces the works of Korea's major directors, and analyses the Korean film industry in terms of film production, distribution and reception. Based on this historical analysis, the study investigates ideological constructs in seventeen films, eight from North Korea and nine from South Korea.

The Korean Diaspora in Post War Japan Jul 28 2020 The indistinct status of the Zainichi has meant that, since the late 1940s, two ethnic Korean associations, the Chongryun (pro-North) and the Mindan (pro-South) have been vying for political loyalty from the Zainichi, with both groups initially opposing their assimilation in Japan. Unlike the Korean diasporas living in Russia, China or the US, the Zainichi have become sharply divided along political lines as a result. Myung Ja Kim examines Japan's changing national policies towards the Zainichi in order to understand why this group has not been fully integrated into Japan. Through the prism of this ethnically Korean

community, the book reveals the dynamics of alliances and alignments in East Asia, including the rise of China as an economic superpower, the security threat posed by North Korea and the diminishing alliance between Japan and the US. Taking a post-war historical perspective, the research reveals why the Zainichi are vital to Japan's state policy revisionist aims to increase its power internationally and how they were used to increase the country's geopolitical leverage. With a focus on International Relations, this book provides an important analysis of the mechanisms that lie behind nation-building policy, showing the conditions controlling a host state's treatment of diasporic groups.

Global Pulls on the Korean Communities in Sao Paulo and Buenos Aires Jan 22 2020 This book looks at two Korean communities, one in Sao Paulo and the other in Buenos Aires, in order to identify the global pulls that have affected Korean identity formation, community development patterns, integration efforts, social mobility, education for children, remigration, return migration, and relationships with the host communities.

The Northern Region of Korea Mar 16 2022 The residents of the three northern provinces of Korea have long had cultural and linguistic characteristics that have marked them as distinct from their brethren in the central area near the capital and in the southern provinces. The making and legitimating of centralized Korean nation-states over the centuries, however, have marginalized the northern region and its distinct subjectivities. Contributors to this book address the problem of amnesia regarding this distinct subjectivity of the northern region of Korea in contemporary, historical, and cultural discourses, which have largely been dominated by grand paradigms, such as modernization theory, the positivist perspective, and Marxism. Through the use of storytelling, linguistic analysis, and journal entries from turn-of-the-century missionaries and traveling Russians in addition to many varieties of unconventional primary sources, the authors creatively explore unfamiliar terrain while examining the culture, identity, and regional distinctiveness of the northern region and its people. They investigate how the northern part of the Korean peninsula developed and changed historically from the early Choson to the colonial period and come to a consensus regarding the importance of regionalism as a vital factor in historical transformation, especially in regard to Korea's tumultuous modern era.

Korean Adoptees and Transnational Adoption Mar 24 2020 This book investigates the experiences of South Koreans adopted into Western families and the complexity of what it means to "feel identity" beyond what is written in official adoption files. *Korean Adoptees and Transnational Adoption* is based on ethnographic fieldwork in South Korea and interviews with adult Korean adoptees from the United States, Australia, Canada, Switzerland and Sweden. It seeks to probe beneath the surface of what is "known" and examines identity as an embodied process of making that which is "unknown" into something that can be meaningfully grasped and felt. Furthermore, drawing on the author's own experiences as a transnational, transracial Korean adoptee, this book analyses the racial and cultural negotiations of "whiteness" and "Korean-ness" in the lives of adoptees and the blurriness which results in-between. Highlighting the role of memory and the body in the formation of identities, this book will be useful to students and scholars of Korean Studies, Ethnicity Studies and Anthropology as well as Asian culture and society more generally.

South Korean Identity and Global Foreign Policy Apr 29 2023 In the 20th century, South Korea was usually seen as a "shrimp amongst whales", a minor player with limited agency in regional and global affairs. Korea's risen status as a "middle power" today, however, begs the question about related changes in the South Korean identity or "sense of self" in the world. In this book, Patrick Flamm presents the first comprehensive and agency oriented empirical account of South Korean international state identity and Seoul's global foreign policy in the 21st century. Advancing a performative and narrative understanding of identity in International Relations, Flamm uses South Korea's global engagement in peacekeeping and climate diplomacy to offer much-needed insight into the various identity narratives and role conceptions at play. In the case of peacekeeping and climate diplomacy, South Korea's identity as an international actor has been dominated by practices of self-identification that position the country at the brink of advanced countries, aspiring to lead the rest of the world but with the overall objective to maintain national autonomy in a changing regional and global context. *South Korean Identity and Global Foreign Policy* is a must-read for scholars of International Relations, Foreign Policy Analysis and Asian/Korean Studies.

Rituals of Separation Jan 14 2022 When her American family returns to the U.S. after sixteen years in South Korea, Liz is a hidden immigrant. Her mixed-up cultural identity is veiled behind the face of the girl down the street. She's the granddaughter of upperclass Americans, but her homeland is a divided Asian peninsula of neon-lit cities, five-hundred-year-old palaces, and army dictators. Rice tells the story of her life in South Korea from ages nine months to sixteen, the influence of the tragedy and tension of the Korean peninsula, and the story of her parents, who walked arm-in-arm with social activists during South Korea's democratic revolution. Told with honesty

and humor, *Rituals of Separation* captures the tension of living between identities, the deep longing for home, and the determination to find healing in the face of unrecoverable loss.

Korean-American Youth Identity and 9/11 Dec 25 2022 This scholarly examination specifically focuses on Korean-American identity, particularly in regards to Korean-American youth, after 9/11. The text represents an important contribution to Korean-American studies.

Be(com)ing Korean in the United States May 06 2021 Koreans have been immigrating to the United States via Hawaii for over a hundred years, although the greatest influx to the mainland began after 1965, making Koreans one of the most recent ethnic groups in the United States. The intimate socio-political links between the United States and the Korean peninsula after World War II also contributes to the ideas and ideals of what it means to be Korean in the United States. As with many people with immigrant background, young people of Korean descent residing in the United States try to understand their ethnic identities through their families, peers, and communities, and many of these journeys involve participating in cultural activities that include traditional dance, song, and other such performance activities. This study is the culmination of a four-year ethnographic research project on the cultural practices of a group of Koreans in the United States pursuing the traditional Korean cultural art form of pungmul in exploring their ethnic identities. Through the accesses and opportunities afforded to the members of Mae-ari Korean Cultural Troupe by the national and transnational networks with other people of Korean descent, these young people begin to understand themselves as "Korean" while teaching and learning traditional Korean cultural practices in performances, workshops, and everyday interactions with each other. Most studies about Asian Americans focus on the immigration challenges, or the conflicts and differences between generations. While these are important issues that affect the lives of Asian Americans, it is also valuable to focus on how new cultural identities are formed in the attempt to hold on to the traditions of the immigrant homeland. This research pays close attention to how young people understand their identities through cultural practices, regardless of generational differences. The focus is on collective meaning-making about ethnic identity across immigration statuses and generations. In investigating their ways of being, author Sonya Gwak pays close attention to the semiotic processes within the group that aid in creating and cultivating notions of ethnic identity, especially in the ways in which the notion of culture becomes indelibly linked with "things" within and across the sites. Dr. Gwak also explores the pedagogical processes within the group regarding how cultures are objectified and transformed into tools of teaching and learning. Finally, the study also reveals how people understand their ethnic identities through direct and active engagement with, experience of, and expression of "cultural objects." By looking at the multiple forms of expressing ethnic identity, this study shows how the young people in Mae-ari locate themselves within the time and space of Korean history, Korean American history, activism, performing arts, and tradition. This study argues that ethnic identity formation is a process that is rooted in cultural practices contextualized in social, political, and cultural histories. This book advances the field of ethnic and immigrant studies by offering a new framework for understanding the multiple ways in which young people make sense of their identities. *Be(com)ing Korean in the United States* is an important book for all collections in Asian American studies, as well as ethnic and immigrant studies.

The 1.5 Generation Korean Diaspora Feb 15 2022 *The 1.5 Generation Korean Diaspora: A Comparative Understanding of Identity, Culture, and Transnationalism* provides insights into the contemporary experiences of 1.5 generation Korean immigrants around the world. By exploring Korean emigrants' lives in host locations such as Los Angeles, Boston, Toronto, Auckland, Argentina, and Deluth, the contributors study the inherent complexities of being a 1.5 generation immigrant and show that 1.5 generation immigrants are a unique group that deserves further study. The contributors analyze key issues, such as the 1.5 generation's identity negotiations, their occupational trajectories, the role of ethnic communities and institutions, changing values of love and marriage, the cultural tension involved in parenthood, their health needs and services, and ethnic and transnational entrepreneurship.

Measured Excess Aug 29 2020 This insightful analysis of the ways in which South Korean economic development strategies have reshaped the country's national identity gives specific attention to the manner in which women, as the primary agents of consumption, have been affected by this transformation. Past scholarship on the culture of nationalism has largely focused on the ways in which institutions utilize memory and "history" to construct national identity. In a provocative departure, Laura C. Nelson challenges these assumptions with regard to South Korea, arguing that its identity has been as much tied to notions of the future as rooted in a recollection of the past. Following a backlash against consumerism in the late 1980s, the government spearheaded a program of frugality that eschewed imported goods and foreign travel in order to strengthen South Korea's national identity. Consumption—with its focus on immediate gratification—threatened the state's future-oriented discourse of national unity. In

response to this perceived danger, Nelson asserts, the government cast women as the group whose "excessive desires" for material goods were endangering the nation.

Korea's Growing Role(s) on the World Stage Sep 22 2022 South Korea is usually seen as a 'shrimp amongst whales', a minor player with limited agency in regional and global affairs. After colonization, the Korean War, national division and decades of military rule in the 20th century, however, South Korea today contributes to international peace and security with its peacekeeping troops and has successfully promoted its 'green growth' vision of sustainable development. The rising status of Korea begs the question about related changes in the South Korean identity or 'sense of self' in the world. In the respective International Relations and Korean Studies literatures this question has not yet been fully addressed beyond hopes for South Korea to be a future cornerstone of the liberal international order. Further, a wide variety of 'identity' conceptualizations has been leading to 'definitional anarchy' as well as 'confusion and analytical ambiguity' in the study of identity in general and South Korean international identity in particular. This thesis presents a theoretically rigorous and empirically rich approach for the inquiry into state identity through the utilization of conceptual tools from symbolic-interactionist role theory as a contribution to the research on state identity and foreign policy. By focusing on South Korean agency and domestic self-identification practices, the empirical analysis at hand is able to provide a comprehensive account of the various identity narratives and role conceptions at play in South Korea's global engagement in peacekeeping and climate diplomacy, complementing more systemic identity approaches such as the literature on norms and socialization. It argues that in the cases of peacekeeping and climate diplomacy South Korea's identity as an international actor has been dominated by practices of self-identification that locate the country at the brink of advanced countries, aspiring to lead the rest of the world on the basis of the Korean developmental experience, but with the overall objective to maintain national autonomy in a changing regional and global context. Finally, this study is a contribution to the Korean Studies literature on how South Korea confronts globalization on the level of identity and politics.

Korean, Asian, or American? Dec 21 2019 The voices of second-generation Korean Americans echo throughout the pages of this book, which is a sensitive exploration of their struggles with minority, marginality, cultural ambiguity, and negative perceptions. This book follows a group of second-generation Korean American Christians in the English-speaking ministry of a large suburban Korean church.

Korean National Identity under Japanese Colonial Rule Jul 08 2021 Modern Korean nationalism has been shaped by the turbulent historical forces that shook and transformed the peninsula during the twentieth century, including foreign occupation, civil war, and division. This book examines the emergence of the nation as the hegemonic form of collective identity after the March First Movement of 1919, widely seen as one of the major turning points of modern Korean history. The analysis focuses on Yi Gwangsu (1892–1950), a pioneering novelist, newspaper editor, and leader of the nationalist movement, who was directly involved in many aspects of its emergence during the Japanese occupation period. Yi Gwangsu was one of the few intellectuals who not only wrote for almost the entirety of the colonial period but who also was centrally involved in many institutions related to the production of identity. By focusing on Yi Gwangsu the book provides a different kind of historical narrative linking the various fragments of the nation, puts forward a new understanding of the March First Movement and its role in the emergence of the nation, and demonstrates how central to the emergence of the nation were the development of the print industry, the rise of a modern readership, and the emergence of a capitalist market for print. This book shows how the March First Movement catalyzed the confluence of these factors, enabling the nation to emerge as the dominant form of collective identity.

Constructing "Korean" Origins Sep 29 2020 Hyung Il Pai examines how archaeological finds from Northeast Asia have been used in Korea to construct a myth of state formation emphasizing the ancient development of a pure Korean race that created a civilization rivaling those of China and Japan. He shows that the Korean state was formed far later with influences from throughout Northern Asia.

Becoming Asian American Feb 03 2021 Based on interviews with second-generation Chinese- and Korean-Americans, "this book is filled with a number of illuminating empirical findings" (American Journal of Sociology). In *Becoming Asian American*, Nazli Kibria draws upon extensive interviews she conducted with second-generation Chinese and Korean Americans in Boston and Los Angeles who came of age during the 1980s and 1990s to explore the dynamics of race, identity, and adaptation within these communities. Moving beyond the frameworks created to study other racial minorities and ethnic whites, she examines the various strategies used by members of this group to define themselves as both Asian and American. In her discussions on such topics as childhood, interaction with non-Asian Americans, college, work, and the problems of intermarriage and child-raising, Kibria finds wide discrepancies between the experiences of Asian Americans and those described in studies of other ethnic groups. While these differences help to explain the unusually successful degree of social integration and acceptance into mainstream American society enjoyed by this

“model minority,” it is an achievement that Kibria’s interviewees admit they can never take for granted. Instead, they report that maintaining this acceptance requires constant effort on their part. Kibria suggests further developments may resolve this situation—especially the emergence of a new kind of pan-Asian American identity that would complement the Chinese or Korean American identity rather than replace it.

North Koreans In Japan Apr 05 2021 This book considers the language, ideology, and identity of three generations of North Koreans in Japan organized around Chongryun. It explores how, over three generations, individuals and the community reconcile cope with changing attitudes and approaches toward Japanese society and Korean culture.

Younger-Generation Korean Experiences in the United States Sep 10 2021 *Younger-Generation Korean Experiences in the United States: Personal Narratives on Ethnic and Racial Identities* compares the formation of ethnic and racial identities in two generational cohorts of a contemporary immigrant group. Through personal essays, the book reveals how external factors helped younger-generation Korean Americans who grew up in the 1980s and early 1990s retain more of their cultural heritage than had preceding generations.

Zainichi Korean Identity and Ethnicity Jan 26 2023 Shedding light on contemporary Japanese society in an international context, Japanese-Korean relations and modern day notions of a multicultural Japan, this book addresses the broad notions and questions of citizenship, identity, ethnicity and belonging through investigation of Japan’s Korean population (zainichi). Despite zainichi Korean existence being integral to, and interwoven with, recent Japanese social history, the debates and discussions of the Korean community in Japan have been largely ignored. Moreover, as a post colonial context, the zainichi Korean situation has drawn scant attention and little investigation outside of Japan. In *Zainichi Korean Ethnicity and Identity* David Chapman seeks to redress this balance, engaging with recent discourse from within Japan’s Korean population. By taking a close look at how exclusion, marginalisation and privilege work, the book brings insight into the mechanisms of discrimination, and how discourse not only marginalizes individuals and groups, but also how it can create social change and enhance the sense of self. This book will be of interest to students and scholars of Asian studies and of Japanese and Korean politics, culture and society, but also to those with a broader interest in migration studies and the study of identity and ethnicity.

Heritage Management in Korea and Japan Feb 21 2020 Imperial tombs, Buddhist architecture, palaces, and art treasures in Korea and Japan have attracted scholars, collectors, and conservators•and millions of tourists. As iconic markers of racial and cultural identity at home and abroad, they are embraced as tangible sources of immense national pride and popular •must-see• destinations. This book provides the first sustained account to highlight how the forces of modernity, nationalism, colonialism, and globalization have contributed to the birth of museums, field disciplines, tourist industry, and heritage management policies. Its chapters trace the history of explorations, preservations, and reconstructions of archaeological monuments from an interregional East Asian comparative perspective in the past century.

The Korean Mind Jan 02 2021 Understanding a people and their culture through code words and language. Today, South Korea is an economic, technological and entertainment superpower. How, as a country, did they rebound from war, poverty and political unrest? And how can that success be replicated in other cultures? The answers can, in fact, be found by understanding Korean customs, values and beliefs. Author Boye Lafayette De Mente identifies the unique qualities that comprise the Korean identity and articulates their modern expressions of Korean culture and history in this book. Organized alphabetically by topic, De Mente explains the critical cultural code words that make Korea the country it is today. Anyone interested in Korean etiquette, whether for travel or work, will discover that their meanings extend far beyond superficial English translations to deeper interpretations. Cultural code words include: Aboji, Ah-boh-jee — The "Father Culture" Anae, Ah-negh — Wives: The Inside People Han Yak, Hahn Yahk — The Herbal Way to Health Innae, Een-nay — A Culture of Enduring Katun Sosuy Pap, Kaht-unh Soh-suut Pahp — Eating from the Same Rice Bowl And over 200 more... This in-depth discussion covers the concepts and principles that are integral to the Korean way of life and provides all the Korean history and insight necessary for those readers eager to learn the secrets of this resilient and burgeoning, yet little-understood nation.

Transnational Mobility and Identity in and out of Korea Aug 21 2022 This volume examines the socio-cultural aspects of transnational mobility of the Korean diaspora across the globe, spanning countries such as Japan, the Philippines, Germany, the US, and the UK. The contributors explore gendered migration, social inclusion and exclusion in homeland and hostland, embodied multiple subjectivities and belonging in historical and contemporary contexts, migrants’ work and family, ethnic media

consumption, information and communication technology (ICT) in transnational mobility, ethnic return migration, and marriage migration. This work is a strong interdisciplinary and trans-regional study, combining various disciplines such as sociology, gender studies, anthropology, history, theater studies, media and communication studies, and Asian studies.

Identity, Culture, and Chinese Foreign Policy Dec 13 2021 This book assesses the role of identity and Chinese face culture in Chinese foreign policy by analyzing China's political and economic retaliation against South Korea's deployment of the THAAD (Terminal High Altitude Area Defense) system on its soil. By examining the history and military action of China, Japan, and North and South Korea, the book argues that China's divergent responses were caused by different expectations according to whether states had a perceived identity as a friend or a rival. The author demonstrates that Chinese face culture shapes China's reaction to others through three dynamics of seeking, saving, and losing face. This book shows how identity and culture have worked in the relationship between China and neighboring countries through three case studies exploring North Korea's Taepodong-2 missile launch and first nuclear test in 2006, South Korea's decision to allow the United States to deploy the THAAD around 2016, and Japan's decision to deploy two U.S. X-band radars in 2005 and 2014. A timely analysis of the importance of identity and culture in international relations, the book will be of interest to scholars of Chinese foreign policy, Sino-South Korean relations, Sino-North Korean relations, Sino-Japanese relations, Korean Politics, Asian Politics, and International Relations.

Sound of the Border Nov 12 2021 Using ethnographic data collected in China and South Korea between 2004 and 2011, author Sunhee Koo provides a comprehensive view of the music of Koreans in China (Chaoxianzu), from its time as manifestation of a displaced culture to its return home after more than a century of amalgamation and change in China. As the first English-language book on the music and identity of China's Korean minority community, *Sound of the Border* investigates diasporic mutations of Korean culture, influenced by power dynamics in the host country and the constant renewal of relationships with the homeland. Between the 1860s and the 1940s, about two million Koreans migrated to China in search of economic opportunity and political stability. Settling primarily in the northeastern part of China bordering the Russian Far East, these Koreans had flexibility in crossing geopolitical and cultural boundaries throughout the first half of the twentieth century. In 1949, the majority of Koreans in China accepted their new citizenship designation as one of the PRC's fifty-five official national minorities. The subsequent partition of the Korean peninsula in 1953 further politicized their ethnic identity, and for the next forty years they were only authorized to interact with North Korea. It was only in the early 1990s that Chaoxianzu were able to renew their relationship with South Korea, although they now faced new challenges due to an ethno-national prejudice as it focused on the nation's industrial advancement as the most prominent measure of its social superiority. Sunhee Koo examines the unique construction of diasporic Korean music in China and uses it as a window to understanding the complexities and diversification of Korean identity, shaped by the ideological and political bifurcation and post-Cold War political resurgence that have affected Northeast Asia. The performances of Korean Chinese musicians—positioned between their adopted state and the two Koreas—embody a complex cultural intersection crisscrossing ideological, political, and social boundaries in historical and present-day Northeast Asia. Migrants enact their agency in creating a unique sound for Korean Chinese identity through navigating cultural resources accessed in their host and the two distinctive motherlands.

The Forgotten Histories Jun 19 2022 The movement of Koreans in the last century has been driven by diverse, profound factors and has left an indelible mark on Korean society. The Korean diaspora has often been studied in relation to South Korea's economic rise amid domestic and societal hardships, but these accounts fail to consider the breadth of its migrants' experiences and their rich, cross-cultural interactions. What initially pushed these Koreans to leave their homeland, and how did these people arrive in these far-away places? How do their stories connect the seemingly disparate Korean communities and distinguish them from other diasporas? In *The Forgotten Histories*, The East Foundation outlines the history of the Korean diaspora and unites the often isolated narratives of Korean migrants from throughout the world. Focusing on four distinct and pivotal migration waves, this book addresses the overarching economic and political conditions that prompted emigration from the Korea peninsula, and how those circumstances formed the basis for a continually shifting understanding of Korean identity. Taken together, these histories portray examples of adaptation, relocation, and persistence, while emphasizing the unique collective unity among Korean migrants and their descendants.

My Korean Identity and Quest for Understanding Mar 28 2023 MY KOREAN IDENTITY AND QUEST FOR UNDERSTANDING (Korean Youth Studies, 1), edited by Sora Yang of Sydney, Australia, is a very important book in the area of Korean studies. This ground-breaking book contains 13 articles by Korean youth from around the world, in India, Africa, Australia, and the USA. The winner of the 2008 Global Rev. Ham Suk-Hyun Essay Contest, on the topic of "My Korean Identity," Sora Yang has contributed important articles on Australian Korean community, which is a growing Korean community around the world. Sora Yang also explores her own identity as a

Korean and an Australian. Jung-Im Jeong, a Student Council secretary at Canadian International School in India and the president of Bangalore Korean Presbyterian Church Youth Group in India, who is one of the early Korean settlers in Bangalore, India, due to her father's executive responsibilities in the IT sector, writes about the situation in India in terms of culture, economics, and society. Jung-Im Jeong focuses on how she developed into a leader desiring to help the people of India and also other people in need around the world. Haebin Yoon writes from Senegal, Africa, regarding her "immigration" to Africa with her missionary father, who was sent by the Korean Presbyterian Church (Ko-Shin) in Korea. She desires to follow in her father's footsteps as a missionary to Africa. Paul Sungbae Park, who has received much acclaim as an emerging young historian in his own right, has written an article exploring the experience of the Lewis and Clark Expedition. In the manner of vicarious participation, so emphasized by Professor Robert N. Bellah of University of California at Berkeley, Paul Sungbae Park has placed himself in a vicarious position of a member of the corps of discovery of the Lewis and Clark Expedition. Furthermore, Paul Sungbae Park examines similarities between the Korean Joong-Mae System and the Shakespearean arranged marriage system as found in ROMEO AND JULIET. Michael Chon, the first-born son of a cutting-edge telecommunications company founder in New Jersey, desires to expand his dad's company into a multi-billion-dollar empire. He relates his prowess as a star soccer player to his competitive spirit. As the president of his whole school, Michael Chon explores his own competitive spirit as both inherited and acquired. Joon Park, who is highly ranked in his elite magnate school in New Jersey, recounts his summer trip to South Korea and reminisces about his grandmother who wants him to grow using Korean herbal medicine. Joon Park writes with humor and figurative language that is rarely found in such a young person. Timothy Chon, Andy Jung, and Jake Byun write autobiographically about their experiences in Korea. Their testimonies serve as first-hand primary source accounts not only of the description of youth life in South Korea, but also of primary document preserving Korean youth perspectives on events and issues. Gloria Bae, a star student in her honors class, describes the bond that exists between a Korean mother and a Korean daughter, focuses on Korean food creation. The touching story will not only warm your heart, but it will also give you an insight into Korean cuisine and the Korean family.

Identity, Youth, and Gender in the Korean American Church Jul 20 2022 This book studies Korean American girls between thirteen and nineteen and their formation with regard to self, gender, and God in the context of Korean American protestant congregational life. It develops a hybrid methodology of de-colonial aims and indigenous research methods, aiming to facilitate transformative life in faith communities.

Exercising Citizenship Oct 31 2020 This dissertation examines the relationship between citizenship policies and noncitizen political behavior, focusing on extra-electoral forms of political participation by Korean residents in Japan. I analyze the institutional factors that have mediated the construction of Korean collective identity in Japan and, in turn, the ways that Korean community activists have re-conceptualized possibilities for their exercise of citizenship as foreign residents in Japan. My empirical analysis is based on a theoretical framework that defines citizenship as an interactive process of political incorporation, performance, and participation. I posit that the various dimensions of citizenship---its legal significance, symbolic meaning, claims and responsibilities, and practice---are performed, negotiated, and restructured in a triangular interactive relationship between the state, citizens, and noncitizens.

The Japan–South Korea Identity Clash Feb 27 2023 Japan and South Korea are Western-style democracies with open-market economies committed to the rule of law. They are also U.S. allies. Yet despite their shared interests, shared values, and geographic proximity, divergent national identities have driven a wedge between them. Drawing on decades of expertise, Brad Glosserman and Scott A. Snyder investigate the roots of this split and its ongoing threat to the region and the world. Glosserman and Snyder isolate competing notions of national identity as the main obstacle to a productive partnership between Japan and South Korea. Through public opinion data, interviews, and years of observation, they show how fundamentally incompatible, rapidly changing conceptions of national identity in Japan and South Korea—and not struggles over power or structural issues—have complicated territorial claims and international policy. Despite changes in the governments of both countries and concerted efforts by leading political figures to encourage U.S.–ROK–Japan security cooperation, the Japan–South Korea relationship continues to be hobbled by history and its deep imprint on ideas of national identity. This book recommends bold, policy-oriented prescriptions for overcoming problems in Japan–South Korea relations and facilitating trilateral cooperation among these three Northeast Asian allies, recognizing the power of the public on issues of foreign policy, international relations, and the prospects for peace in Asia.

Deconstructing Japan's Image of South Korea May 18 2022 What role does identity play in foreign policy? How might identity impact on Japan's relations with South Korea? This book takes identity theorizing in International Relations theory a step further by attempting to account for a resilient collective identity that informs policy makers throughout time and space.

Zainichi (Koreans in Japan) Dec 01 2020 This book traces the origins and transformations of a people-the Zainichi, or Koreans “residing in Japan.” Using a wide range of arguments and evidence-historical and comparative, political and social, literary and pop-cultural-John Lie reveals the social and historical conditions that gave rise to Zainichi identity, while exploring its vicissitudes and complexity. In the process he sheds light on the vexing topics of diaspora, migration, identity, and group formation.
