Therefore, real world experience with the software is highly important. You should start by learning how to

perform individual tasks. Then you need to "chain up" your skills and apply them on the project to produce a meaningful outcome as required by the exam questions. The PowerPoint exam covers: Create and Manage Presentations Insert and Format Shapes and Slides Create Slide Content Apply Transitions and Animations Manage Multiple Presentations The exam is performance based with a project-like style - you need to build up an Office document or complete something according to the given specifications. There is a simulated environment for you to get your job done. To prepare for the exam, you need to know the various options available in the Office software. You know the options and functions available, then you can choose the right stuff and apply them in the correct order to achieve the project goal. You must have hands-on experience! This Exam FOCUS book focuses on the more difficult topics that will likely make a difference in exam results. We introduce and explain the important options in the software that you cannot afford to miss. The book is NOT intended to guide you through every single step in the Office software. DO NOT TREAT THIS AS AN A-B-C GUIDE TO MS OFFICE. You should use this book together with other reference books for the best possible preparation outcome. According to the International Association of Administrative Professionals (IAAP), both the Certified Professional Secretary (CPS) exam and the Certified Administrative Professional (CAP) exam are multiple choice based. Starting from Nov 2011 the CAP exam will be offered as a single part exam. The CAP Examination covers a wide range of topics. The new exam covers: Communication Organization and Planning Information Distribution Records Management Physical and Information Resources Document Production Financial Functions Human Resources As a CAP candidate, you are expected to know almost EVERYTHING. You do not have to be an expert in everything, but your peers will expect you to have knowledge on almost everything. Keep in mind, the phrase administrative professional is a general title associated with administrative support staff - you need to provide support whenever requested. Support request can come from different sources and may involve different disciplines. Even though you may not always need to provide hands-on help, you do need to know how to properly "redirect" and "allocate" the help requests to the proper places. Administrative professionals are expected to greet and assist company visitors and customers as well as managers, executives and their staff. They serve BOTH as frontline personnel and as backend personnel. They need to be good communicators. They need to be able to adapt to different personalities and work styles of bosses and peers. There isn't any affordable "official" self study pack in the market, so we fill the gap here by releasing the CAP Exam Essentials Study Guide. The CAP Exam Essentials Study Guide provides extensive and in-depth coverage on a wide variety of business and office management topics to help you prepare for the exam. Our CAP Study Guide goes the expert-advice way. Instead of just giving you the hard facts, we also give you information that covers the best tricks and practices. With this information, you will always be able to make the most appropriate expert judgment in the exam. As of the time of this writing, after obtaining the CAP rating you can apply for a TA Specialty by passing one of the Microsoft Office certifications. This Study Guide provides full coverage on the Microsoft MOS PowerPoint exam, which can satisfy the TA Specialty exam requirement. We use PowerPoint 2013 for demonstration in this book. Taking account of students' existing skills, IT Skills for Successful Study will help students to develop intermediate or advanced IT skills in those areas most relevant to studying, and to use IT for maximum benefit.

To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that.Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded "death by powerpoint." Microsoft PowerPoint is a slide show presentation program developed by Microsoft. It was officially launched on May 22, 1990, as a part of the Microsoft Office suite. PowerPoint presentations consist of a number of individual pages or "slides." The "slide" analogy is a reference to the slide projector. A better analogy would be the "foils" (or transparencies/plastic sheets) that are shown with an overhead projector, although they are in decline now. Slides may contain text, graphics, sound, movies, and other objects, which may be arranged freely. The presentation can be printed, displayed live on a computer, or navigated through at the command of the presenter. For larger audiences the computer display is often projected using a video projector. Slides can also form the basis of webcasts.
