exception handling in python is
very similar to java the code
which harbours the risk of an
exception is embedded in a try
block while in java exceptions
are caught by catch clauses in
python we have statements
introduced by an except

keyword it's possible to create
custom made exceptions with
the raise statement it's possible
to

with statement in python

geeksforgeeks Jul 20 2022 web

nov 18 2022 in python with
statement is used in exception
handling to make the code
cleaner and much more
readable it simplifies the
management of common
resources like file streams
observe the following code
example on how the use of with
statement makes code cleaner
python3.1 without using with
statement
