**A World Made for Money** Mar 23 2020 A spirited and incisive survey of economic geography, *A World Made for Money* begins with the author stopped at a red light in Norman, Oklahoma. Observing the landscape of drugstores and banks, and for that matter the stoplight and roads themselves, Bret Wallach observes, "Everything I see has been built to make money" or, at the very least, to facilitate making money. This, he argues, is a global phenomenon that nonetheless has occurred only within the past hundred years or so. Although guidebooks and culture brokers often disparage these landscapes of commerce, Wallach--recipient of a MacArthur "genius grant"--argues that we would do well to pay them close attention. *A World Made for Money* provides a compelling, condensed tour of our world. From Silicon Valley to Sri Lanka, from post-Soviet Russia to post-apartheid South Africa, Wallach looks at how human beings are buying, manufacturing, working, growing and shipping food, and accessing the natural resources to fuel it all. These essential facets of daily life, propelled by the profit motive, represent a transnational force shaping our surroundings and environment in ways that may not always be beautiful (or even healthy) but that are fundamental to understanding how the world works in the twenty-first century. Wallach examines the relationship between acquisitiveness and landscape, reveals surprising contradictions and nuances, and provides fresh perspective on politically charged topics such as sprawl, deindustrialization, and agribusiness.

**The Speed of Change** Dec 20 2019 In the early 1900s the motor-vehicle (car, bus, lorry or motor-cycle) was introduced in sub-Saharan Africa. Initially the plaything and symbol of colonial domination, the motor-vehicle transformed the economic and social life of the continent. Indeed, the motor-vehicle is arguably the single most important factor for change in Africa in the twentieth century. A factor for change that thus far has been neglected in research and literature. Yet its impact extends across the totality of human existence; from ecological devastation to economic advancement, from cultural transformation to political change, through to a myriad of other themes. This edited volume of eleven contributions by historians, anthropologists and social and political scientists explores aspects of the social history and anthropology of the motor-vehicle in Africa.

[East Asian Regionalism from a Legal Perspective](#) Apr 04 2021 Plenty has been written about the political and economical aspects of regionalism, but the legal perspective has been neglected. *East Asian Regionalism From a Legal Perspective* is unique in synthesizing legal, economic and political analyses. In the first part, the book investigates the current features of regionalism from a comparative perspective, looking at economic and currency cooperation and comparing Asian regionalism with Europe and Latin America. In the second part, the contributors go on to look at the present legal features of regionalism, covering institutional frameworks, trade diversity and regional integration. The third part of the book is truly unique in proposing an essential groundwork for the institutionalisation of an East Asian Community. It conceives a draft East Asian Charter, an essential document that distils what East Asian nations have achieved, and also includes integral principles and fundamental rules for future cooperation among countries and peoples in the region. This book will be of interest to graduates and academics interested in regionalism, international relations, international law and Asian studies.
