Implementing Randomized Field Trials in Education Jan 12 2022 The central idea of evidence-based education-that education policy and practice ought to be fashioned based on what is known from rigorous research-offers a compelling way to approach reform efforts. Recent federal trends reflect a growing enthusiasm for such change. Most visibly, the 2002 No Child Left Behind Act requires that "scientifically based [education] research" drive the use of federal education funds at the state and local levels. This emphasis is also reflected in a number of government and nongovernment initiatives across the country. As consensus builds around the goals of evidence-based education, consideration of what it will take to make it a reality becomes the crucial next step. In this context, the Center for Education of the National Research Council (NRC) has undertaken a series of activities to address issues related to the quality of scientific education research. In 2002, the NRC released *Scientific Research in Education* (National Research Council, 2002), a report designed to articulate the nature of scientific education research and to guide efforts aimed at improving its quality. Building on this work, the Committee on Research in Education was convened to advance an improved understanding of a scientific approach to addressing education problems; to engage the field of education research in action-oriented dialogue about how

to further the accumulation of scientific knowledge; and to coordinate, support, and promote cross-fertilization among NRC efforts in education research. The main locus of activity undertaken to meet these objectives was a year-long series of workshops. This report is a summary of the third workshop in the series, on the implementation and implications of randomized field trials in education.

Publications May 16 2022 This series includes publications (1948-1966) produced by or with the assistance of the Department of Church in Town and Country. Included are booklets from the "Christ for the Changing Countryside" series of Lutheran church studies in specific states as well as other regional rural church studies which were produced as the result of Rural Church and Town and Country workshops and consultations. Also included are a department study of the Lutheran Church in the U.S. (1954) and a file of statements, department workshop resources, and pamphlets regarding rural ministry issues which were issued and produced by department staff.

The Crystal Workshop Feb 13 2022 In this complete guide to the fundamentals of crystal healing, author and healer Azalea Lee offers an entirely new and comprehensive approach to working with metaphysical stones. Instead of focusing on a few individual crystals and their properties, she shows the reader how to select, cleanse, charge, and work with crystals of all kinds, and how to connect with their powerful healing energies. And, just as significantly, she shares a series of simple exercises to help readers develop their own deep intuition when it comes to working with the stones. Exquisite photographs of over one hundred unique crystal specimens will inspire the journey, with page after page celebrating each crystal's unique natural beauty.
