To be used in conjunction with Pumping apparatus driver/operator handbook, 2d ed. Designed to thoroughly prepare you for a Fire Department Safety Officer certification, promotion, or training examination. This text is designed to educate the driver/operator who is responsible for operating fire apparatus equipped with aerial devices, which include aerial ladders, aerial ladder platforms, articulating elevating platforms, telescoping elevating platforms, and water towers. -- From preface. Learn to safely and effectively drive and operate an apparatus with fire pumpers with the new Fire Service Pump Operator: Principles and Practice! This text is the core of a complete teaching and learning system that thoroughly supports instructors and prepares students for the job. The text includes up-to-date coverage the 2009 Edition of NFPA 1002, Standard for Fire Apparatus Driver/Operator Professional Qualifications. This text provides a thorough understanding of the types of fire apparatus equipped with pumps, how to safely drive them, and how to properly maintain these vehicles through inspection and testing programs. Students will

also learn how to operate fire pumps by gaining an understanding of water supply, nozzles and flow rates, optimal positioning, and more. The Second Edition of Exam Prep: Fire Department Apparatus Driver/Operator is designed to thoroughly prepare you for a Driver/Operator certification, promotion, or training examination by including the same type of multiple-choice questions you are likely to encounter on the actual exam. To help improve examination scores, this preparation guide follows Performance Training Systems, Inc. ' s Systematic Approach to Examination Preparation. Exam Prep: Fire Apparatus Driver Operator, Second Edition is written by fire personnel explicitly for fire personnel, and all content has been verified with the latest reference materials and by a technical review committee. Benefits of the Systematic Approach to Examination Preparation include:

- Emphasizing areas of weakness
- Providing immediate feedback
- Learning material through context and association

Exam Prep: Fire Department Apparatus Driver/Operator, Second Edition includes:

- Fire Apparatus Driver/Operator practice examinations
- Self-scoring guide with page references for further study
- Winning test-taking tips and helpful hints
- Coverage of NFPA 1002, Fire Apparatus Driver/Operator Professional Qualifications, 2009 Edition

This new IFSTA manual details the training required of Company

Officers according to NFPA® 1021, Standard for Fire Officer Professional Qualifications, 2014 Edition. The manual is divided into two sections to make a clear distinction between the information needed for Fire Officer Level I and Fire Officer Level II. Both print and eBook formats are available. There is no shortage of issues that a company officer might face in the everyday operation of a fire company or unit. This manual addresses the wide range of topics and issues encountered by a company officer, from leadership and supervision to health and safety issues. Great attention was given to focus on the job performance requirements of NFPA® 1021. The fifth edition of Fire and Emergency Services Company Officer builds on the previous edition of the manual while presenting the material in a more concise manner to make it easier for students to read and instructors to teach. By merging related topics, the number of chapters was reduced from 32 in the fourth edition to 17 in the new manual while preserving the material related to the NFPA® standard. The number of appendices was reduced from 20 to 4 by removing information that can be found in other media. Along with reducing the volume of material from the fourth edition, the fifth edition of Fire and Emergency Services Company Officer offers several new features. The manual features a new look with IFSTA ' s single-column format and upgraded and

updated curriculum components. Learning activities are included to help instructors present the material to their students. Case Histories open each chapter to illustrate important lessons learned in the real world. Photographs, illustrations, and tables are included throughout the manual to illustrate key points and improve the overall instructional value of the material. This textbook is packaged with Navigate 2 Advantage Access which unlocks a complete eBook, Study Center, homework and Assessment Center, and a dashboard that reports actionable data. Experience Navigate 2 today at www.jbInavigate.com/2. Wildland Fire Fighter: Principles and Practice, Second Edition meets and exceeds the job performance requirements and objectives as outlined in the following National Fire Protection Association (NFPA) and National Wildland Coordinating Group (NWCG) standards: • NFPA 1051, Standard for Wildland Firefighting Personnel Professional Qualifications, 2020 Edition (Chapters 4 and 5) • NWCG S-190, Introduction to Wildland Fire Behavior, 2019 Edition • NWCG S-130, Firefighter Training, 2008 Edition • NWCG L-180, Human Factors in the Wildland Fire Service, 2014 Edition From wildland fire service history, to safety, to water supply, to firing operations, this single manual covers everything an NFPA Wildland Fire Fighter I and Wildland Fire Fighter II (NWCG Fire Fighter Type 2 and

1) needs to know. In addition, the Second Edition was significantly updated and reorganized to better serve the Wildland Fire Fighter I and Wildland Fire Fighter II. The program now features two distinct sections. Section 1 includes six chapters, which set the foundation for Wildland Fire Fighter I knowledge and understanding. Section 2 comprises eight chapters, which encompass the higher-level competencies required for Wildland Fire Fighter II. This new organization will allow instructors the flexibility to teach their Wildland Fire Fighter I and II course(s) exactly the way they wish. The features in this text will help students take that extra step toward becoming outstanding wildland fire fighters. These features include:

- Refined Table of Contents. Now divided by level, the new table of contents addresses NFPA and NWCG requirements and objectives in an easy-to-follow manner.
- New Chapters. New chapters including The Wildland Fire Service, Wildland/Urban Interface Considerations, Tools and Equipment, Human Resources, and Radio Communications ensure a comprehensive understanding of history, safety, and operations.
- Scenario-Based Learning. You are the Wildland Fire Fighter and Wildland Fire Fighter in Action case scenarios are found in each chapter to encourage and foster critical-thinking skills.
- Practical Tips for Wildland Fire Fighters. The Listen Up! and Did

You Know? features provide helpful advice and encouragement. • Skill Drills. This feature provides written step-by-step explanations and visuals for important skills and procedures. This clear, concise format enhances student comprehension of complex procedures. • After-Action Review Section. The end-of-chapter review includes detailed chapter summaries and key terms to reinforce important principles. • Updated photos and illustrations. New and improved photos and illustrations enhance learning with visuals of incidents and training simulations, as well as highlighting advances in understanding hydraulics and pump operations doesn't have to be difficult, and it is of key importance to the science of fire engineering. Putting all the pieces together correctly so that the right stream is brought to the fire is essential to effective fireground operations. In the second edition of *Fire Service Hydraulics and Pump Operations*, author Paul Spurgeon, engineer/pump operator with the Denver Fire Department, breaks down the sometimes difficult-to-understand formulas of hydraulics and pumps into easily learned steps, taking care to explain the hows and whys of each formula discussed. Using an in-the-street, practical approach, Spurgeon teaches readers how to develop proper fire streams as well as how they relate to overall fireground strategies. He covers hydraulics and pumps extensively—from the

properties of water to its supply to pumping to sprinkler systems and foams. So readers can put what they 've learned into practice, Spurgeon provides both end-of-chapter tests and practice sets at the end of the book, complete with answers so that readers can check their knowledge. The second edition includes numerous updates and additions, including the Rule of Thumb chapter that illustrates how to perform these complex calculations while under stress on the fireground. This text meets the learning objectives for FESHE Fire Protection Hydraulics and Water Supply course work. Features and Benefits:

- Summary of chapter formulas
- End-of-chapter tests with answers
- Practice sets with answers to further test your understanding

This second edition of Fire Apparatus Driver/Operator has been thoroughly updated to serve as a complete training solution that addresses pump operation, safe driving techniques, tiller and aerial apparatus operation, and water supply considerations. From basic apparatus maintenance to fire pump theory and advanced hydraulic calculations, this single manual covers everything a fire service driver/operator needs to know. Fire Apparatus Driver/Operator: Pump, Aerial, Tiller, and Mobile Water Supply, Second Edition meets and exceeds the job performance requirements of Chapters 4, 5, 6, 7, and 10 of NFPA 1002, Fire Apparatus Driver/Operator Professional Qualifications, 2014

Edition. The second edition features: - An emphasis on Driver/Operator safety and responsibility with a dedicated chapter on safety. - Actual Near-Miss Reporting System cases are discussed to drive home important points about safety and the lessons learned from these real-life incidents. - Detailed step-by-step skill drills which include the corresponding NFPA job performance requirement. - Scenario based learning tools including You are the Driver/Operator, Driver/Operator in Action, and Voices of Experience case studies to encourage critical thinking skills - Driver/Operator Tips and Safety Tips to provide helpful advice from fireground veterans. Pumping and Aerial Apparatus Driver/Operator Handbook, 3/e provides five additional chapters to the Pumping Apparatus Driver/Operator Handbook, 3/e. These chapters are devoted to driver/operators responsible for operating fire apparatus equipped with aerial devices. These include aerial ladders, aerial ladder platforms, articulating elevating platforms, telescoping elevating platforms, and water towers. FSTA NEW Editions Streamline Driver/Operator Training The new editions of these bestselling IFSTA fire apparatus driver/operator training materials mark a new approach to training driver/operators. Previously, IFSTA published two separate manuals with student and instructor support materials: Pumping Apparatus

Driver/Operator Handbook and Aerial Apparatus Driver/Operator Handbook. Fire departments with both types of apparatus needed two manuals, two curriculum and driver/operator trainees needed two exam preps to study for tests. The release of the 3rd edition of these manuals streamlines the IFSTA training resources. The Pumping Apparatus Driver/Operator Handbook, 3rd Edition covers pumping apparatus only, the second book in the pair, Pumping and Aerial Apparatus Driver/Operator Handbook, 3rd Edition contains the same 15 chapters as the pumping apparatus textbook, plus an additional 5 chapters relevant to aerial apparatus. Personnel on departments that operate both types of apparatus now only need one manual and one curriculum for training. Students only need one exam prep to prepare for testing. If a fire department does not use aerial apparatus, they use the Pumping Apparatus Driver/Operator Handbook, 3rd Edition and omit the aerial sections of the curriculum and exam prep which include all 20 chapters. Chapters 2 and 3 are especially beneficial for all driver/operators: Inspection and Maintenance and Safety and Operating Emergency Vehicles. Pumping Apparatus Driver/Operator Handbook, 3rd edition Skill Sheets now included in the manual Key Terms added The new Fire Apparatus Manufacturer's Association (FAMA) standardized safety signs for fire apparatus are

highlighted Hydraulic calculations presented in a logical sequence making teaching and learning easier Customary and metric calculations in one chapter NEW case histories introduce each chapter NFPA® 1002 JPR Correlation Matrix Arabic edition of Pumping Apparatus Driver/ Operator Handbook, 3rd Edition now available.

This second edition of Fire Service Pump Operator has been thoroughly updated to serve as a complete training solution that addresses pump operation, safe driving techniques, tiller and aerial apparatus operation, and water supply considerations. From basic apparatus maintenance to fire pump theory and advanced hydraulic calculations, this single manual covers everything a fire service driver/operator needs to know. Fire Service Pump Operator: Pump, Aerial, Tiller, and Mobile Water Supply, Second Edition meets and exceeds the job performance requirements of Chapters 4, 5, and 10 of NFPA 1002, Fire Apparatus Driver/Operator Professional Qualifications, 2014 Edition. It also addresses all of the course outcomes from the National Fire Academy 's Fire and Emergency Services Higher Education (FESHE) Associates (Core) Fire Protection Hydraulics and Water Supply course. The National Fire Protection Association (NFPA) and the International

Association of Fire Chiefs (IAFC) are pleased to bring you Fire Apparatus Driver/Operator: Pump, Aerial, Tiller, and Mobile Water Supply, Third Edition. This third edition of Fire Apparatus Driver/Operator has been thoroughly updated to serve as a complete training solution that addresses pump operation, safe driving techniques, tiller and aerial apparatus operation, and water supply considerations. From basic apparatus maintenance to fire pump theory and advanced hydraulic calculations, this single manual covers everything a fire service driver/operator needs to know. Fire Apparatus Driver/Operator: Pump, Aerial, Tiller, and Mobile Water Supply, Third Edition meets and exceeds the job performance requirements (JPRs) of Chapters 4, 5, 6, 7, and 10 of the 2017 Edition of NFPA 1002, Fire Apparatus Driver/Operator Professional Qualifications. In the 2017 edition, the requirement that a Driver/Operator be certified to the Fire Fighter I level was removed. However, JPRs from NFPA 1001, Standard for Fire Fighter Professional Qualifications have been added so driver/operators who operate pumpers and mobile water supply apparatus are able to operate outside of the immediate dangers to life and health (IDLH) but still have an understanding of the following Fire Fighter I topics: Fire Department Communications (NFPA 1001: 5.2.1, 5.2.2, 5.2.3) The General Knowledge Requirements (NFPA 1001: 5.1.1)

Responding on an Apparatus to an Emergency Scene (NFPA 1001: 5.3.2) Connect a Fire Department Pumper to a Water Supply (NFPA 1001: 5.3.15) Additional appendices include the excerpt of NFPA 1002 and corresponding correlation matrixes to substantiate all JPRs that are covered and documented.

Comprehensive and updated content in this edition includes: Nozzle reaction and how to calculate it Expanded coverage of pump anatomy and pressure control devices Content that addresses vital parts of NFPA 1901, Standard for Automotive Fire Apparatus and NFPA 1911, Standard for the Inspection, Maintenance, Testing, and Retirement of In-Service Automotive Fire Apparatus. Appendix A: Daily/Weekly Inspection Check Sheet, that provides a comprehensive overview on what to inspect and how to ensure your apparatus is at operational readiness. The National Fire Protection Association® and International Association of Fire Chiefs are pleased to bring you Fire Service Pump Operator: Principles and Practice, a modern integrated teaching and learning system for the fire pumper driver/operator. This textbook meets and exceeds the job performance requirements of Chapters 4, 5, and 10 of NFPA 1002, Fire Apparatus Driver/Operator Professional Qualifications, 2009 Edition. It also addresses all of the course outcomes from the National Fire Academy ' s Fire and Emergency

Services Higher Education (FESHE) Associates (Core) Fire Protection Hydraulics and Water Supply course. Fire Service Pump Operator: Principles and Practice features: a laser-like focus on driver/operator safety and responsibility with dedicated chapters on safety; actual Near-Miss Reporting System cases are discussed to drive home important points about safety and the lessons learned from these real-life incidents; detailed step-by-step skill drills with which include the corresponding NFPA job performance requirements; page references for quick access to coverage of NFPA 1002 objectives and FESHE 's Fire Protection Hydraulics and Water Supply course outcomes at the beginning of each chapter; scenario based learning tools including You are the Driver/Operator, Driver/Operator in Action, and Voices of Experience case studies to encourage critical thinking skills; and Driver/Operator Tips and Safety Tips to provide helpful advice from fireground veterans. "Validated by the International Fire Service Training Association."

Drive to Survive: The Art of Wheeling the Rig provides an in-depth examination of fire apparatus vehicle dynamics. This is not your average “ driver training ” textbook. Fire apparatus operators must understand how a vehicle maneuvers at roadway speed, and more importantly...why does it crash? Just as a doctor cannot heal the human body without a thorough understanding of anatomy and physiology, an emergency vehicle operator cannot safely drive a fire apparatus without an in-depth knowledge of vehicle dynamics. Drive to Survive goes beyond talking about pump operations, aerial operations, and preventative maintenance; it fills in the gaps between vehicle dynamics and crash causation. After 15 years of training and research, Chris Daly developed a training program combining his fire service and crash reconstruction training experience. This book provides an in-depth knowledge of topics required in the following NFPA standards: --NFPA 1002 “ Standard for Fire Apparatus Driver/Operator Professional

Qualifications ” --NFPA 1451 “ Standard for Fire and Emergency Service Vehicle Operations Training Programs ” --NFPA 1500 “ Standard on Fire Department Occupational Health and Safety Program ” Fire apparatus operators will learn the limits of driving an emergency vehicle and will understand that no matter how long they have been driving or how good they think they are, at some point physics will take over and the vehicle will lose control. We can reduce the number of emergency vehicle crashes throughout the world by addressing key issues and providing emergency vehicle operations course (EVOC) instructors with methods to convey these concepts. Concepts you learn in this book relate to more than just driving a fire apparatus. These principles apply to anyone who drives a vehicle, including your family members and loved ones. Apparatus Driver/Operator This textbook matches the course outline and objectives identified by the National Fire Academy's Fire and Emergency Services Higher Education (FESHE) committee for the Building Construction for Fire Protection core course. This new 3rd edition provides the reader with basic instruction about how buildings are designed and constructed and how this relates to emergency operations. In addition to basic construction principles, a new emphasis is placed on firefighter safety, newer types of construction that may

be difficult to identify, and green construction principles. This edition is illustrated with new drawings and photos, case histories that emphasize real-life safety principles, key terms, and review questions. Fire inspectors, preincident planners, fireground commanders, investigators, and firefighters will all find useful and valuable information in this new edition. Safe response depends on fire apparatus drivers and operators who can meet the JPRs in NFPA 1002. Every driver and operator of fire apparatus needs to be uniquely qualified to meet specific demands based on the influences of the response area -- such as local communities, municipalities, industrial facilities, and those with airports. NFPA 1002: Standard for Fire Apparatus Driver/Operator Professional Qualifications specifies the Job Performance Requirements (JPRs) for fire fighters and fire brigade personnel who drive and operate fire apparatus, in both emergency and non-emergency situations. Follow the Standard's up-to-date criteria for: fire department emergency vehicle driver; pump operator; aerial operator; tiller operator; wildland apparatus operator; aircraft rescue and fire-fighting apparatus operator; mobile water supply apparatus operator."--provided by publisher.
