This volume of PISA 2009 results examines how human, financial and material resources, and education policies and practices shape learning outcomes. The energy and fuel industries represent an extensive field for the development and implementation of solutions

aimed at improving the technological, environmental, and economic performance of technological cycles. In recent years, the issues of ecology and energy security have become especially important. Energy is firmly connected with all spheres of human economic life but, unfortunately, it also has an extremely negative (often fatal) effect on the environment and public health. Depletion of energy resources, the complexity of their extraction, and transportation are also problems of a global scale. Therefore, it is especially important nowadays to try to take care of nature and think about the resources that are necessary for future generations. For scientific teams in different countries, the development of sustainable and safe technologies for the use of fuels in the energy sector will be a challenge in the coming decades

The McCormick family immigrated from Ireland to New Jersey before 1740. Includes Burnet, Cannon, Marr, Perkins and related families. Because American consumers transmigrate between social identities in expressing their values and affiliations, marketers must apply transcultural marketing methods and offer a cultural values proposition to build long-term customer relationships. This unique book weaves these topics into profiles of 9 influential American subcultures currently shaping their members marketplace choices. According to the great mathematician Paul Erdős, God maintains perfect mathematical proofs in The Book. This book presents the authors candidates for such "perfect proofs," those which contain brilliant ideas, clever connections, and wonderful observations, bringing new insight and surprising perspectives to problems from number theory, geometry, analysis, combinatorics, and graph theory. As a result, this book will be fun reading for anyone with an interest in mathematics. This fourth volume of PISA 2012 results examines how student performance is associated with various characteristics of individual schools and school systems. Updated to reflect new developments through 2019, the tenth edition of The Law of Public Communication provides an overview of communication and media law

that includes the most current legal developments. It explains the laws affecting the daily work of writers, broadcasters, PR practitioners, photographers, and other public communicators. By providing statutes and cases in an accessible manner, even to students studying law for the first time, the authors ensure that students will acquire a firm grasp of the legal issues affecting the media. This new edition features color photos, as well as breakout boxes that apply the book's principles to daily life. The new case studies discussed often reflect new technologies and professional practices, including hot topics such as cyber bullying, drones, government surveillance, campaign financing, advertising, and digital libel. The Law of Public Communication is an ideal core textbook for undergraduate and graduate courses in communication law and mass media law. The 8th International Conference on Information Security and Cryptology was organized by the Korea Institute of Information Security and Cryptology (KIISC) and sponsored by the Ministry of Information and Communication of Korea (MIC). Interest in doing, funding, and studying interdisciplinary work has built to crescendo in recent years. But despite this growing enthusiasm, our collective understanding of the dynamics, rewards, and challenges of faculty conversations across disciplines remains murky. Through six case studies of interdisciplinary seminars for faculty, *Interdisciplinary Conversations* investigates pivotal interdisciplinary conversations and analyzes the factors that make them work. Past discussions about barriers to interdisciplinary collaborations fixate on funding, the academic reward system, and the difficulties of evaluating research from multiple fields. This book uncovers barriers that are hidden: disciplinary habits of mind, disciplinary cultures, and interpersonal dynamics. Once uncovered, these barriers can be broken down by faculty members and administrators. While clarion calls for interdisciplinarity rise in chorus, this book lays out a clear vision of how to realize the creative potential of interdisciplinary conversations. Jesse Marvin Unruh acquired a national political reputation despite the fact that he never gained office above the California governmental level. He spent sixteen years (1955-1970) in the state legislature, seven of them as assembly speaker. While there he secured passage of moderate-liberal legislation and upgraded the quality of the state legislature to the number one position in the nation. Unruh curbed the power of special interest lobbies and induced them to support his legislative program. He also kept the state Democratic Party in a moderate political position as the Republicans moved ever further to the right. Although Governors Pat Brown and Ronald Reagan frustrated his desire to

attain the Governorship, Unruh was elected State Treasurer in 1974. He transformed the office into one of great power to such an extent that by the time of his death in 1987 he was being referred to as 'the best governor California never had.' In the meantime, his close connections with the Kennedy family, especially John and Robert, his reputation as a political pundit, and his powerful influence on Wall Street, earned Unruh great respect far beyond his California base. This book presents the most complete set of analytical, normative, and historical discussions of majority decision making to date. One chapter critically addresses the social-choice approach to majority decisions, whereas another presents an alternative to that approach. Extensive case studies discuss majority voting in the choice of religion in early modern Switzerland, majority voting in nested assemblies such as the French Estates-General and the Federal Convention, majority voting in federally organized countries, qualified majority voting in the European Union Council of Ministers, and majority voting on juries. Other chapters address the relation between majority decisions and cognitive diversity, the causal origin of majority decisions, and the pathologies of majority decision making. Two chapters, finally, discuss the counter-majoritarian role of courts that exercise judicial review. The editorial Introduction surveys conceptual, causal, and normative issues that arise in the theory and practice of majority decisions. The purpose of this book is to provide practical process guide for technical support centres. It is based on the ITAL processes covered in 'Service Support' (ISBN 011330952X) and 'Service Delivery' (ISBN 0113309503) but also includes additional processes as well as a Balanced Scorecard Service Model. Processes covered in the book are: Financial and Operations Management; Knowledge Management; Configuration Management; Change Management; Release Management; Incident Management; Problem Management; Service Level Management; Capacity and Workforce Management; Availability Management; IT Service Continuity Management; and

Customer Satisfaction Measurement. This book is a practical guide to IPv6 addressing Unix and network administrators with experience in TCP/IP(v4) but not necessarily any IPv6 knowledge. It focuses on reliable and efficient operation of IPv6 implementations available today rather than on protocol specifications. Consequently, it covers the essential concepts, using instructive and thoroughly tested examples, on how to configure, administrate, and debug IPv6 setups. These foundations are complemented by discussions of best practices and strategic considerations aimed at overall efficiency, reliability, maintainability, and interoperability. Military intervention in a conflict without a reasonable prospect of success is unjustifiable, especially when it is done in the name of humanity. Couched in the debate on the responsibility to protect civilians from violence and drawing on traditional 'just war' principles, the central premise of this book is that humanitarian military intervention can be justified as a policy option only if decision makers can be reasonably sure that intervention will do more good than harm. This book asks, 'Have past humanitarian military interventions been successful?' It defines success as saving lives and sets out a methodology for estimating the number of lives saved by a particular military intervention. Analysis of 17 military operations in six conflict areas that were the defining cases of the 1990s-northern Iraq after the Gulf War, Somalia, Bosnia and Herzegovina, Rwanda, Kosovo and East Timor-shows that the majority were successful by this measure. In every conflict studied, however, some military interventions succeeded while others failed, raising the question, 'Why have some past interventions been more successful than others?' This book argues that the central factors determining whether a humanitarian intervention succeeds are the objectives of the intervention and the military strategy employed by the intervening states. Four types of humanitarian military intervention are offered: helping to deliver emergency aid, protecting aid operations, saving the victims of violence and defeating the perpetrators of violence. The focus on strategy within these four types allows an exploration of the political and military dimensions of humanitarian intervention and highlights the advantages and disadvantages of each of the four types. Humanitarian military intervention is controversial. Scepticism is always in order

about the need to use military force because the consequences can be so dire. Yet it has become equally controversial not to intervene when a government subjects its citizens to massive violation of their basic humanrights. This book recognizes the limits of humanitarian intervention but does not shy away from suggesting how military force can save lives in extreme circumstances. Examines, from various perspectives, the school failure and success of Chicano students. The contributors include specialists in cultural and educational anthropology, bilingual and special education, educational history, developmental psychology.
