The Pyrocene Jan 21 2020 A provocative rethinking of how humans and fire have evolved together over time—and our responsibility to reorient this relationship before it's too late.? The Pyrocene tells the story of what happened when a fire-wielding species, humanity, met an especially fire-receptive time in Earth's history. Since terrestrial life first appeared, flames have flourished. Over the past two million years, however, one genus gained the ability to manipulate fire, swiftly remaking both itself and

eventually the world. We developed small guts and big heads by cooking food; we climbed the food chain by cooking landscapes; and now we have become a geologic force by cooking the planet. Some fire uses have been direct: fire applied to convert living landscapes into hunting grounds, forage fields, farms, and pastures. Others have been indirect, through pyrotechnologies that expanded humanity's reach beyond flame's grasp. Still, preindustrial and Indigenous societies largely operated within broad ecological constraints that determined how, and when, living landscapes could be burned. These ancient relationships between humans and fire broke down when people began to burn fossil biomass—lithic landscapes—and humanity's firepower became unbounded. Fire-catalyzed climate change globalized the impacts into a new geologic epoch. The Pleistocene yielded to the Pyrocene. Around fires, across millennia, we have told stories that explained the world and negotiated our place within it. The Pyrocene continues that tradition, describing how we have remade the Earth and how we might recover our responsibilities as keepers of the planetary flame.

The Hard Reset Apr 28 2023 Return to the world of *The Inevitable*! The world is holding its breath... Robots everywhere are beginning to organize, drawn toward the mysterious voice speaking to them on the burgeoning robot network. Elsewhere, robot armies are growing and proving to be a threat—not just to the individual humans they encounter, but to infrastructure and the human forces that stand against them. The board of Radius Corporation has decided to initiate a hard reset to put the world back onto its old course, overriding the wills and desires of even President Zelda Blake. And at the center of it all are Jonas Lexington and his household staff: Cromwell and Mars, who are struggling to grasp the nature of the beast they may have unleashed; Chantal, whose message to her fellow sexbots is spreading through the network; Flavius, who is gathering a small but ferocious army to possess and control; and Barney, who must choose whether or not to become the villain the

world already thinks he is. As lines are drawn and an all-out war looks increasingly inevitable, it's time for everyone to decide which side they are really on. *The Hard Reset* is the third book in the world of *THE INEVITABLE* — a unique take on dystopian science fiction which combines the spark of uprising and war with surprising insights into the human condition ... through artificial eyes.

The Skeleton Crew, or, Wildfire Ned Sep 21 2022 First serialised between 1866 and 1867 by the Newsagents' Publishing Company and Edwin J. Brett, *The Skeleton Crew, or, Wildfire Ned* was among the finest and most popular of the fierce 'penny dreadful' tales which flourished in the mid nineteenth century. Edward Warbeck, the eponymous Ned, pursues a quest to defeat murderous bandits known as the Skeleton Crew, led by the indefatigable Deathwing. Occultist A. E. Waite described this bloodthirsty tale as "suggestive of a film produced by the inmates of Bedlam" with a storyline "in a state of nightmare". The original vivid, and often terrifying, images of the skeleton outlaws are reproduced in this edition. This edition also includes a critical introduction, explanatory footnotes, and extensive contextual material.

Wildfire Dec 24 2022 Wherever there is a need to fix a malfunction or rescue a damaged ship, the Federation calls in the crack team from Starfleet S.C.E. From finding a Starfleet vessel lost inside a holographic ship, to checking out new technology captured during the Dominion War, no task is too bizarre or too dangerous for Captain David Gold, Commander Sonya Gomez and their crew of S.C.E. troubleshooters on board the USS *da Vinci*. However their mission to Galvan VI could prove their greatest challenge yet. Not only must they salvage the USS *Orion* from the turbulent atmosphere of a gas giant, but the *Orion* is carrying the prototype of the deadly *Wildfire* device, a protomatter warhead that can ignite gas giants into stars. And to complicate matters still further they encounter an unknown alien life-form that may have lured the USS *Orion* to its destruction...

Full Blaze Jan 13 2022 When fighting a wildfire, how far is one step too many? And what happens after you take it? “A richly detailed and pulse-pounding balance of fast-paced drama and romance.” – RT Book Reviews *Raised in the Outback*, Jeannie Clark fought bush fires in Australia and wildfires in the US. But when she uses her firefighting helicopter to rescue a wildfire photographer she finds more danger than ever before. Cal Jackson may be an orphan and a foster child of too many homes, but he found his purpose in the heat of a wildfire. Now he fights the flames with a trained eye and a camera. But not everything is as it seems with their firefighting outfit. The next firestorm they fly into, the covert operation could be even more dangerous than the flaming wilderness. “Full Blaze hits it out of the park. Marvelous love story. Great adventure.” – Reading Reality “Suspense filled and action packed story. You can almost feel the burn as the flames wash over our storyline heroes.” – Reading Cafe [Can be read stand-alone or in series. A complete happy-ever-after with no cliffhangers. Originally published in 2014. Re-edited 2021 for improved reader experience but still the same great story.] Buy now to join the romantic firefighting adventure.

Backpacker Apr 04 2021 Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard

against which all other outdoor-industry awards are measured.

Wildfire on the Skagit Nov 23 2022 When wildfire threatens her home, a smokie gal has only one choice—fight for her life. Elite smokejumper Krista Thorson parachutes into wildfires for a living. Too tall, too big, too strong, she never fit in...except on the fireline. Her past lost, her future uncertain, Krista fights for the present. Special Forces veteran Evan Greene jumps fire to avoid facing his past. Some memories are too painful. Evan's policy? Bury and move on—until Krista unearths what he most wants to forget. No half-measures win this firefight. Together they must face their pasts before their love is burned away by the wildfire on the Skagit. "M.L. Buchman is an amazing author and...sure to entertain the most demanding reader." – Fresh Fiction, Firehawks [Can be read stand-alone or in series. A complete happy-ever-after with no cliffhangers.] Buy now to jump into the romantic firefighting adventure.

Nwcg Standards for Interagency Incident Business Management

Dec 20 2019 The National Wildfire Coordinating Group provides national leadership to enable interoperable wildland fire operations among federal, state, local, tribal, and territorial partners. Primary objectives include: Establish national interagency wildland fire operations standards; Recognize that the decision to adopt standards is made independently by the NWCG members and communicated through their respective directives systems; Establish wildland fire position standards, qualifications requirements, and performance support capabilities (e.g. training courses, job aids) that enable implementation of NWCG standards; Support the National Cohesive Wildland Fire Management Strategy goals: to restore and maintain resilient landscapes; create fire adapted communities; and respond to

wildfires safely and effectively; Establish information technology (IT) capability requirements for wildland fire; and Ensure that all NWCG activities contribute to safe, effective, and coordinated national interagency wildland fire operations. The "NWCG Standards for Interagency Incident Business Management" assists participating agencies of the NWCG to constructively work together to provide effective execution of each agency's incident business management program by establishing procedures for: - Uniform application of regulations on the use of human resources, including classification, payroll, commissary, injury compensation, and travel. - Acquisition of necessary equipment and supplies from appropriate sources in accordance with applicable procurement regulations. - Management and tracking of government property. - Financial coordination with the jurisdictional agency and maintenance of finance, property, procurement, and personnel records, and forms. - Use and coordination of incident business management functions as they relate to sharing of resources among federal, state, and local agencies, including the military. - Documentation and reporting of claims. - Documentation of costs and cost management practices. - Administrative processes for all-hazards incidents.

Extracting Home in the Oil Sands Mar 27 2023 The Canadian oil sands are one of the world's most important energy sources and the subject of global attention in relation to climate change and pollution. This volume engages ethnographically with key issues concerning the oil sands by working from anthropological literature and beyond to explore how people struggle to make and hold on to diverse senses of home in the region. The contributors draw on diverse fieldwork experiences with communities in Alberta that are affected by the oil sands industry. Through a series of case studies, they illuminate the complexities inherent in the entanglements of race, class, Indigeneity, gender, and ontological concerns in a regional context characterized by extreme extraction. The chapters are unified in a common concern for ethnographically theorizing

settler colonialism, sentient landscapes, and multispecies relations within a critical political ecology framework and by the prominent role that extractive industries play in shaping new relations between Indigenous Peoples, the state, newcomers, corporations, plants, animals, and the land.

WildFire Hearts - Vol 1 Aug 20 2022 These three firefighter romantic suspense novels will bring the heat! “an intricate, layered, deliciously twisty plot and you won’t be able to help polishing off this book in one sitting.” – USA Today about Savannah Kade
Sebastian Kane knew the moment he saw Maggie that she was the one for him. Unfortunately, so did a killer. When Maggie finds a predator’s trophies under the floorboards of her old house, she immediately becomes a target. Determined to protect her at all costs, Sebastian will have to break every vow he’s made to keep her safe. Kalan wants to let Seline know how he feels, so when the FBI asks him to pose as her boyfriend, it’s an easy yes. While posing as her lover lets him get closer, it only makes it harder to read what she really wants. And when Seline goes missing? He’ll have to keep her alive if he wants to be with her. This box set contains the first three novels in the WildFire Hearts series from Maggie Award winner Savannah Kade. If you love firefighter romances or just romantic suspense, you’re in the right place. Your next book binge is right here.

Reset Sep 09 2021 The “necessary and incisive” (Roxane Gay) account of the discrimination case that “has blown open a conversation about the status of women” in the workplace (The New York Times) SHORTLISTED FOR THE 2017 FINANCIAL TIMES AND MCKINSEY BUSINESS BOOK OF THE YEAR | NAMED A BEST FALL BOOK BY ELLE AND BUSTLE In 2015, Ellen K. Pao sued a powerhouse Silicon Valley venture capital firm, calling out workplace discrimination and retaliation against women and other underrepresented groups. Her suit rocked the tech world—and exposed its toxic culture and its homogeneity. Her

message overcame negative PR attacks that took aim at her professional conduct and her personal life, and she won widespread public support—Time hailed her as “the face of change.” Though Pao lost her suit, she revolutionized the conversation at tech offices, in the media, and around the world. In *Reset*, she tells her full story for the first time. The daughter of immigrants, Pao was taught that through hard work she could achieve her dreams. She earned multiple Ivy League degrees, worked at top startups, and in 2005 was recruited by Kleiner Perkins, arguably the world’s leading venture capital firm at the time. In many ways, she did everything right, and yet she and other women and people of color were excluded from success—cut out of decisive meetings and email discussions, uninvited to CEO dinners and lavish networking trips, and had their work undercut or appropriated by male executives. It was time for a system reset. After Kleiner, Pao became CEO of reddit, where she took forceful action to change the status quo for the company and its product. She banned revenge porn and unauthorized nude photos—an action other large media sites later followed—and shut down parts of reddit over online harassment. She and seven other women tech leaders formed Project Include, an award-winning nonprofit for accelerating diversity and inclusion in tech. In her book, Pao shines a light on troubling issues that plague today’s workplace and lays out practical, inspiring, and achievable goals for a better future. Ellen K. Pao’s *Reset* is a rallying cry—the story of a whistleblower who aims to empower everyone struggling to be heard, in Silicon Valley and beyond. Praise for *Reset* “Necessary and incisive . . . As Ellen Pao detailed her experiences, while also communicating her passion for the work men often impeded her from doing, I was nothing short of infuriated. It was great to see a highly accomplished woman of color speaking out like this, and hopefully this book will encourage more women to come forward, give voice to their experiences in the workplace, and contribute to meaningful change.”—Roxane Gay

Hardwood Reforestation and Restoration Dec 12 2021

Hardwood-dominated temperate forests (mostly in Eastern North America, Europe, North East Asia) provide valuable renewable timber and numerous ecosystem services. Many of these forests have been subjected to harvesting or conversion to agriculture, sometimes over centuries, that have greatly reduced their former extent and diversity. Natural regeneration following harvesting or during post-agricultural succession has often failed to restore these forests adequately. Past harvesting practices and the valuable timber of some species have led to a reduction in their abundance. The loss of apex predators has caused herbivore populations to increase and exert intense browsing pressure on hardwood regeneration, often preventing it. Particularly important are fruit, nut and acorn bearing species, because of their vital role in forest food webs and biodiversity. Restoring hardwood species to natural forests in which they were formerly more abundant will require a number of forest management actions (e.g., resistant hybrids, deer exclosures/protectors, enrichment planting, underplanting, etc.). Similarly, reforesting areas that were once natural forests will also require new silvicultural knowledge. Global warming trends will intensify the need for interventions to maintain the diversity and function of temperate hardwood forests, as well as for increase hardwood reforestation.

Report Aug 28 2020

Bulletin - Connecticut Agricultural Experiment Station Apr 23 2020

Wildfire Oct 22 2022 The da Vinci goes on a dangerous salvage mission: to rescue the U.S.S. Orion from a gas giant. As if the turbulent atmosphere of the planet wasn't enough, the Orion is carrying the prototype of the deadly Wildfire device -- a protomatter warhead that can ignite gas giants into stars. But the operation may be more than even Capt. David Gold's crack team of engineers can handle, as they have to fight against the liquid atmosphere of the

planet, the volatility of the Wildfire warhead -- and a strange alien life-form that may be responsible for the attack on the Orion!

Lifespan May 05 2021 A NEW YORK TIMES BESTSELLER
“Brilliant and enthralling.”? —The Wall Street Journal A paradigm-shifting book from an acclaimed Harvard Medical School scientist and one of Time’s most influential people. It’s a seemingly undeniable truth that aging is inevitable. But what if everything we’ve been taught to believe about aging is wrong? What if we could choose our lifespan? In this groundbreaking book, Dr. David Sinclair, leading world authority on genetics and longevity, reveals a bold new theory for why we age. As he writes: “Aging is a disease, and that disease is treatable.” This eye-opening and provocative work takes us to the frontlines of research that is pushing the boundaries on our perceived scientific limitations, revealing incredible breakthroughs—many from Dr. David Sinclair’s own lab at Harvard—that demonstrate how we can slow down, or even reverse, aging. The key is activating newly discovered vitality genes, the descendants of an ancient genetic survival circuit that is both the cause of aging and the key to reversing it. Recent experiments in genetic reprogramming suggest that in the near future we may not just be able to feel younger, but actually become younger. Through a page-turning narrative, Dr. Sinclair invites you into the process of scientific discovery and reveals the emerging technologies and simple lifestyle changes—such as intermittent fasting, cold exposure, exercising with the right intensity, and eating less meat—that have been shown to help us live younger and healthier for longer. At once a roadmap for taking charge of our own health destiny and a bold new vision for the future of humankind, *Lifespan* will forever change the way we think about why we age and what we can do about it.

Star Trek: Corps of Engineers: Wildfire Jun 18 2022 Whenever there's a need to fix, repair, or salvage, Starfleet calls in the crack S.C.E. team on the U.S.S. da Vinci. Under the command of Captain David Gold and Commander Sonya Gomez, the S.C.E. solves the unsolvable, from finding a Starfleet vessel lost inside a holographic ship to doping out new technology captured during the Dominion War. However, the da Vinci's mission to Galvan VI will prove to be the S.C.E.'s greatest challenge to date, as they must salvage the U.S.S. Orion from the turbulent atmosphere of a gas giant. As if that wasn't enough, the Orion is carrying the prototype of the deadly Wildfire device -- a protomatter warhead that can ignite gas giants into stars -- and the planet seems to be home to a strange alien life-form that may have been responsible for the Orion 's destruction! Wildfire contains the complete eBook editions of S.C.E. adventures

#20-24: Enigma Ship, War Stories Book 1, War Stories Book 2, Wildfire Book 1, and Wildfire Book 2.

Silas Marner Illustrated Mar 03 2021 Silas Marner is the third novel by George Eliot, published in 1861. An outwardly simple tale of a linen weaver, it is notable for its strong realism and its sophisticated treatment of a variety of issues ranging from religion to industrialisation to community.

Wildfire of Tobacco in Connecticut Feb 26 2023

Report of the State Entomologist of Connecticut for the Year Jun 25 2020

Smokejumper Nov 30 2020 A rare inside look at the thrilling world of smokejumpers, the airborne firefighters who parachute into the most remote and rugged areas of the United States, confronting the growing threat of nature's blazes. Forest and wildland fires are growing larger, more numerous, and deadlier every year — record drought conditions, decades of forestry mismanagement, and the increasing encroachment of residential housing into the wilderness have combined to create a powder keg that threatens millions of acres and thousands of lives every year. One select group of men and women are part of America's front-line defense: smokejumpers. The smokejumper program operates through both the U.S. Forest Service and the Bureau of Land Management. Though they are tremendously skilled and only highly experienced and able wildland firefighters are accepted into the training program, being a smokejumper remains an art that can only be learned on the job. Forest fires often behave in unpredictable ways: spreading almost instantaneously, shooting downhill behind a stiff tailwind, or even flowing like a liquid. In this extraordinarily rare memoir by an active-duty jumper, Jason Ramos takes readers into his exhilarating and dangerous world, explores smokejumping's remarkable history, and explains why their services are more essential than ever before.

Wildfire, Inside the Inferno Jan 25 2023 Wildfires rip through forests, choke the air with smoke, and destroy homes. Some

wildfires are sparked by nature. Others are started by humans. All come with devastating results. Readers will find out the science behind wildfires, learn about recent wildfires around the world, and discover what's being done to prevent them. Dynamic photography and clear, engaging text will captivate the reader's attention.

Reset I am GoD May 17 2022 With Jerry arrested, and Michael asked to create a Blind Man's Eye, to help cause a global blackout, something he didn't understand or find necessary, the world was on reset. Had Evil really fallen in love with GoD? And could she save him from Spoiler? And just how dangerous was the Alchemist program her father had written? She had so many questions and no one to ask. Meanwhile, Spoiler no longer wants to die, which is exactly what will happen if he allows Creation to end. The deal he's made Numen-Life must be broken, and to do this, he must destroy GoD to save the game.

WildFire Hearts - The Complete Series Jul 19 2022 "A fast-paced, superbly written series of surprises rich with heart and heat." – USA Today on Savannah Kade Sebastian knew Maggie was the one for him the first time he saw her... unfortunately, so did a killer. Can Kalan pretend to be Seline's boyfriend to protect her from the danger she keeps baiting? Firefighter Jo Huston has a past she doesn't want following her, but rescuing two boys with the help of a sexy park ranger may be her undoing. Six novels full of steamy emotion, relentless suspense, and hard-won happily-ever-afters await you in this box set. From a NEST and Maggie award winner, these stories are perfect for readers of Kendra Elliot, Lisa Jackson, and Susan Stoker!

Boise National Forest (N.F.), Payette National Forest (N.F.) and

Sawtooth National Forest (N.F.), Forest Plan Revision Mar 15 2022

Wildfire Apr 16 2022 The author was embedded with one of the busiest wildfire crews in the United States Reveals wildfires through the experiences of the people who go face-to-face with them Focuses on challenges faced in Western states. Every year wildfires ravage forests, destroy communities, and devastate human lives, with only the bravery of dedicated firefighters creating a barrier against even greater destruction. Throughout the 2016 wildfire season, journalist Heather Hansen witnessed firsthand the heroics of the Station 8 crew in Boulder, Colorado. She tells that story here, layered with the added context of the history, science, landscape, and human behavior that, year-by-year, increases the severity, frequency, and costs of conflagrations in the West. She examines the changes in both mindset and activity around wildfires and tracks the movement from wildfire as something useful, to something feared, to something necessary but roundly dreaded. *Wildfire* shares the drama, hardships, and experiences of the firefighters who try, sometimes in vain, to prevent destruction when a spark flares out of control. Hansen tells the rich and frightening stories of the firefighters themselves and the challenges they face: a safety system struggling to keep up with fire seasons that are lengthening, fires that are becoming more extreme, and agencies that are struggling to cover the bills.
