Luka was not a believer. He had always been skeptical of those biblical stories, including the supposed Forbidden Fruit tempting them under The Tree of Knowledge. But what was this hold Eve now had over him? Was it that? Was this the original sin? Or was it simpler than that? Was “the forbidden fruit” really just her delightful body? If so, Luka thought that Eve should have had a good lawyer. She had been framed. There was nothing sinful about it, Luka would argue. She was simply a natural wonder. To be fair, Luka’s Eve was not the average human female. She was amazing! Better yet,

many of their friends were nearly as awesome. So it went in Flathead County, home of 314 named mountains. As Rusty had somehow managed to inscribe on the side of one of those peaks, “Montana. It’s Not For Wimps!” This book describes how man-made litter, primarily plastic, has spread into the remotest parts of the oceans and covers all aspects of this pollution problem from the impacts on wildlife and human health to socio-economic and political issues. Marine litter is a prime threat to marine wildlife, habitats and food webs worldwide. The book illustrates how advanced technologies from deep-sea research, microbiology and mathematic modelling as well as classic beach litter counts by volunteers contributed to the broad awareness of marine litter as a problem of global significance. The authors summarise more than five decades of marine litter research, which receives growing attention after the recent discovery of great oceanic garbage patches and the ubiquity of microscopic plastic particles in marine organisms and habitats. In 16 chapters, authors from all over the world have created a universal view on the diverse field of marine litter pollution, the biological impacts, dedicated research activities, and the various national and international legislative efforts to combat this environmental problem. They recommend future research directions necessary for a comprehensive understanding of this environmental issue and the development of efficient management strategies. This book addresses

scientists, and it provides a solid knowledge base for policy makers, NGOs, and the broader public. The carpenter has a very fine cat who is known as "Mrs. Chippie"... -- from the diary of Commander F. A. Worsley, captain of Shackleton's Endurance. When Sir Ernest Shackleton's ship Endurance became trapped in the Antarctic ice, all twenty-nine members of the crew were pushed to their limits of survival, including Mrs. Chippy, the ship's estimable cat. Fortunately for posterity, Mrs. Chippy left a diary of the ordeal. Closely based on the true events of Shackleton's heroic journey, and illustrated with authentic photographs taken by Frank Hurley, expedition photographer, Mrs. Chippy's Last Expedition is a firsthand account of one of the greatest adventures in history--from a unique point of view. "A strange plague called the 'Gets is decimating humanity on a global scale. It causes people to forget--small things at first, like where they left their keys, then the not-so-small things like how to drive or the letters of the alphabet. Then their bodies forget how to function involuntarily. There is no cure. But far below the surface of the Pacific Ocean, a universal healer hailed as 'ambrosia' has been discovered. In order to study this phenomenon, a special research lab has been built eight miles under the sea's surface. The goals of the second volume of the AHDR – Arctic Human Development Report: Regional Processes and Global Linkages – are to provide an update to the first AHDR (2004) in terms of an assessment of the state of Arctic human development; to highlight the major trends and changes unfolding related to the various issues and thematic areas of human development in the Arctic over the past decade; and, based on this assessment, to identify policy relevant conclusions and key gaps in knowledge, new and emerging Arctic success stories. The production of AHDR-II on the tenth anniversary of the first AHDR makes it possible to move beyond the baseline assessment to make valuable comparisons and contrasts across a decade of persistent and rapid change in the North. It addresses critical issues and emerging challenges in Arctic living conditions, quality of life in the North, global change impacts and adaptation, and Indigenous livelihoods. The assessment contributes to our understanding of the interplay and consequences of physical and social change processes affecting Arctic residents' quality of life, at both the regional and global scales. It shows that the Arctic is not a homogenous region. Impacts of globalization and environmental change differ within and between regions, between Indigenous and non-Indigenous northerners, between genders and along other axes. NATIONAL BESTSELLER • “A devastating exposé of colleges and local law

enforcement.... A substantive deep dive into the morass of campus sex crimes, where the victim is too often treated like the accused.” —Entertainment Weekly

Missoula, Montana, is a typical college town, home to a highly regarded state university whose beloved football team inspires a passionately loyal fan base. Between January 2008 and May 2012, hundreds of students reported sexual assaults to the local police. Few of the cases were properly handled by either the university or local authorities. In this, Missoula is also typical. In these pages, acclaimed journalist Jon Krakauer investigates a spate of campus rapes that occurred in Missoula over a four-year period. Taking the town as a case study for a crime that is sadly prevalent throughout the nation, Krakauer documents the experiences of five victims: their fear and self-doubt in the aftermath; the skepticism directed at them by police, prosecutors, and the public; their bravery in pushing forward and what it cost them. These stories cut through abstract ideological debate about acquaintance rape to demonstrate that it does not happen because women are sending mixed signals or seeking attention. They are victims of a terrible crime, deserving of fairness from our justice system. Rigorously researched, rendered in incisive prose, *Missoula* stands as an essential call to action. the Narwhal • Nonfiction short stories that pull you into the lives of those living in an otherworldly place • Seth Kantner received a Whiting Award naming him one of the nation's top-ten emerging writers • Publisher's Weekly called the author's 2004 debut novel, *Ordinary Wolves*, "a tour de force" When Seth Kantner's novel, *Ordinary Wolves*, was published 10 years ago, it was a literary revelation of sorts. In a raw, stylized voice it told the story of a white boy growing up with homesteading parents in Arctic Alaska and trying to reconcile his largely subsistence and Native-style upbringing with the expectations and realities tied to his race. It hit numerous bestseller lists, was critically acclaimed, and won a number of awards. Seth's nonfiction second book, the memoir *Shopping for Porcupine*, was even more compelling for many readers—the same raw details of a homesteading upbringing, but intensely personal. Now, in *Swallowed by the Great Land*, he once again brings us into his lyrical wilderness existence. *Swallowed by the Great Land* features slice-of-life essays that further reveal the duality in the author's own life today, and also in the village and community that he inhabits—a mosaic of all life on the tundra. Unique characters, village life, wilderness and the larger landscape, a warming Arctic, and hunting and other aspects of subsistence living are all explored in varied yet intimate stories. A visually captivating, novelistic travelogue that chronicles the first civilian environmental cleanup expedition in Antarctica—an engaging true story told through anecdotes, journal entries, vignettes, recipes, and archival and contemporary photography. “The first thing that comes to mind about Antarctica is not likely the food. But if you are going there, it is the second.” —Wendy Trusler and Carol Devine

The Antarctic Book of Cooking and Cleaning is a unique journey through an austral summer, when a group of dedicated individuals—fifty-four people from five countries—picked up nearly three decades’ worth of garbage during a three-month period in Antarctica. In this visually captivating polar journal, Wendy Trusler and Carol Devine transport readers back twenty years and thousands of miles to Bellinghausen, the Russian research station that became their temporary home. Devine, a humanitarian who piloted the project, and Trusler, a visual artist and cook, use journal entries, letters, provision lists, recipes, and menus to document their voyage. They share pithy, insightful observations on life, food, science, politics, and the environment. Showcased throughout are modern and vintage photos and vignettes from Antarctica’s short history—all of which add delightful color and warm detail to this unique book. Trusler reveals the challenges of cooking in a makeshift kitchen during long, white nights at the bottom of the world. While the dozens of eco-tourists strive to help preserve the continent, she must figure out how to cook for all of them in the small camp kitchen, using limited ingredients. The Antarctic Book of Cooking and Cleaning includes forty-two eclectic, tasty, and hearty recipes tinged with Russian, Chinese, and South American influences, such as Honey Oatmeal Bread, Cheese Fondue, Great Wall Dumplings, Roasted Pepper Goulash with Smoked Paprika, Roast Leg of Pork, and

Frozen Chocolate Cream. All beautifully photographed, these dishes reflect the expedition's colorful cultural fabric and the astonishing raw beauty of their surroundings—a continent uniquely devoted to peace, cooperation, and science. This book presents lively case studies of tourism developments in the European High North from diverse perspectives. It compares views of the changing political ecology of a fragile region shaped by climatic and cultural factors. In exploring the mutual relations between new developments in Arctic travel narratives and tourism practices. *Green Ice: Tourism Ecologies in the European High North* pays particular attention to the changing discourses that produce, and are in turn produced by, encounters between contemporary Arctic peoples and territories. Questions of gender and nationality are considered alongside a comparison of texts and practices in different languages, examining the politics of language and its significant role in tourism. This title pays attention to the changing symbolic value of Arctic discourses in environmental movements, in order to consider the close connections between global forms of environmentalist discourse and action and local cultural responses. An engaging and timely work, this book will be of great interest to scholars of Geography, Anthropology, and Arctic Tourism. See why the Providence Journal-Bulletin calls James Rollins "the modern master of the action thriller" with this classic Rollins tale. The acclaimed author presents an anthology of "confrontational and at times confounding . . . stories to get lost in" by Colum McCann, Victor Lodato and others (Kirkus Reviews). In his introduction to this one hundredth

volume of the beloved Best American Short Stories, guest editor T. C. Boyle writes, “The Model T gave way to the Model A and to the Ferrari and the Prius . . . modernism to postmodernism and post-postmodernism. We advance. We progress. We move on. But we are part of a tradition.” Boyle’s choices of stories reflect a vibrant range of characters, from a numb wife who feels alive only in the presence of violence to a new widower coming to terms with his sudden freedom, from a missing child to a champion speedboat racer. These stories will grab hold and surprise, which according to Boyle is “what the best fiction offers, and there was no shortage of such in this year’s selections.” The Best American Short Stories 2011 includes entries by Denis Johnson, Louise Erdrich, Elizabeth McCracken, Aria Beth Sloss, Thomas McGuane, and others. This book sheds light on the management challenges of crisis and emergency response in an arctic environment. It explores how the complexity of the operational environment impacts on the risk of operations and addresses a need for tailor-made emergency response mechanisms. Through case studies of the arctic environment, the book illustrates how factors such as nature, geography, demographics and infrastructure increase the complexity of crises in the Arctic and present a significant danger to life and health, the environment and values in challenging Arctic waters. The case studies lay a special focus on contextual factors including conflicting interests and

different stakeholder groups, as well as the institutional platforms influencing crisis response and emergency management. They also explore the implications for the managerial roles, the mode of operations, and the structuring of the organizations responsible for the emergency response. The necessity to facilitate cooperation across organizations and borders and a need for organizational flexibility in large scale operations are also emphasized. Written in an accessible style, this book will make for a useful resource for undergraduate and postgraduate students of disaster and emergency management, as well as for professionals involved in emergency services. This open access book is a result of the Dalhousie-led research project Safe Navigation and Environment Protection, supported by a grant from the Ocean Frontier Institutes the Canada First Research Excellent Fund (CFREF). The book focuses on Arctic shipping and investigates how ocean change and anthropogenic impacts affect our understanding of risk, policy, management and regulation for safe navigation, environment protection, conflict management between ocean uses, and protection of Indigenous peoples interests. A rapidly changing Arctic as a result of climate change and ice loss is rendering the North more accessible, providing new opportunities while producing impacts on the Arctic. The book explores ideas for enhanced governance of Arctic shipping through risk-based planning, marine spatial planning and scaling up

shipping standards for safety, environment protection and public health. Thomas Cole (1801-1848) is widely acknowledged as the founder of American landscape painting. Born in England, Cole emigrated in 1818 to the United States, where he transformed British and continental European traditions to create a distinctive American idiom. He embraced the picturesque, which emphasized touristic pleasures, and the sublime, an aesthetic category rooted in notions of fear and danger. Including striking paintings and a broad range of works on paper, from watercolors to etchings, mezzotints, aquatints, engravings, and lithographs, this book explores the trans-Atlantic context for Cole's oeuvre. These works chart a history of landscape aesthetics and demonstrate the essential role of prints as agents of artistic transmission. The authors offer new interpretations of work by Cole and the British artists who influenced him, including J.M.W. Turner and John Constable, revealing Cole's debt to artistic traditions as he formulated a profound new category in art. the American sublime. The interactions between apex predators and their prey are some of the most awesome and meaningful in nature—displays of strength, endurance, and a deep coevolutionary history. And there is perhaps no apex predator more impressive and important in its hunting—or more

infamous, more misjudged—than the wolf. Because of wolves' habitat, speed, and general success at evading humans, researchers have faced great obstacles in studying their natural hunting behaviors. The first book to focus explicitly on wolf hunting of wild prey, *Wolves on the Hunt* seeks to fill these gaps in our knowledge and understanding. Combining behavioral data, thousands of hours of original field observations, research in the literature, a wealth of illustrations, and—in the e-book edition and online—video segments from cinematographer Robert K. Landis, the authors create a compelling and complex picture of these hunters. The wolf is indeed an adept killer, able to take down prey much larger than itself. While adapted to hunt primarily hooved animals, a wolf—or especially a pack of wolves—can kill individuals of just about any species. But even as wolves help drive the underlying rhythms of the ecosystems they inhabit, their evolutionary prowess comes at a cost: wolves spend one-third of their time hunting—the most time consuming of all wolf activities—and success at the hunt only comes through traveling long distances, persisting in the face of regular failure, detecting and taking advantage of deficiencies in the physical condition of individual prey, and through ceaseless trial and error, all while risking injury or death. By describing and analyzing the behaviors wolves use to hunt and kill various wild prey—including deer, moose, caribou, elk, Dall sheep, mountain goats,

bison, musk oxen, arctic hares, beavers, and others—Wolves on the Hunt provides a revelatory portrait of one of nature's greatest hunters. The winner of Alaska's world-famous Iditarod -- a grueling, eleven-hundred-mile dog sled race across a frigid Arctic wilderness---takes home a \$250,000 purse. But this year, the prize is survival. Only the toughest and the most able come to compete in this annual torturous test of endurance, skill, and courage. Now, suddenly and inexplicably, the top Iditarod contestants are dying one by one in bizarre and gruesome ways. Jessie Arnold, Alaska's premier female "musher," fears she may be the next intended victim, but nothing is going to prevent her from aggressively pursuing the glory and the rewards that victory brings. Dedicated State Trooper Alex Jensen is determined to track down the murderer before more innocent blood stains the pristine Alaskan snow. But Jensen's hunt is leading him into the frozen heart of the perilous wild that Jessie Arnold knows so well -- a merciless place far from any vestige of civilization, where nature can kill as fast as a bullet...and only the Arctic night can hear your final screams. Poverty has dire consequences on the ability to fulfil one's aspirations for life. Poverty has strong implications for social cohesion and societies' abilities to function in harmonious ways. This book presents the readers with the core concepts, latest development and knowledge about policies that work to eliminate absolute poverty. This volume shows

what the consequences are for the quality of life of those living in poverty. It describes life for people in poverty in general, but also deals more specifically with children, in-work poverty and the elderly, thus providing a life, generational and global perspective on poverty, including the impact on people's happiness levels. The book also discusses policies aimed at poverty reduction, such as changes to the labour market – including the risk of working poor – and shows that there is a variety of possible instruments available to reduce poverty. These range from direct provision of social security to ensuring education and a better functioning labour market. Written in an engaging and accessible style, the book provides a succinct insight into the concept of poverty, how to measure it, the situation of poverty around the globe as well as different types of possible interventions to cope with poverty. Supporting theory with examples and case studies from a variety of contexts, suggestions for further reading, and a detailed glossary, this text is an essential read for anyone approaching the study of poverty for the first time. NATIONAL BESTSELLER • The Pulitzer Prize-winning author of *The Sixth Extinction* returns to humanity's transformative impact on the environment, now asking: After doing so

much damage, can we change nature, this time to save it? RECOMMENDED BY PRESIDENT OBAMA AND BILL GATES • SHORTLISTED FOR THE WAINWRIGHT PRIZE FOR WRITING • ONE OF THE TEN BEST BOOKS OF THE YEAR: The Washington Post • ONE OF THE BEST BOOKS OF THE YEAR: Time, Esquire, Smithsonian Magazine, Vulture, Publishers Weekly, Kirkus Reviews, Library Journal • “Beautifully and insistently, Kolbert shows us that it is time to think radically about the ways we manage the environment.”—Helen Macdonald, The New York Times That man should have dominion “over all the earth, and over every creeping thing that creepeth upon the earth” is a prophecy that has hardened into fact. So pervasive are human impacts on the planet that it’s said we live in a new geological epoch: the Anthropocene. In *Under a White Sky*, Elizabeth Kolbert takes a hard look at the new world we are creating. Along the way, she meets biologists who are trying to preserve the world’s rarest fish, which lives in a single tiny pool in the middle of the Mojave; engineers who are turning carbon emissions to stone in Iceland; Australian researchers who are trying to develop a “super coral” that can survive on a hotter globe; and physicists who are contemplating shooting tiny diamonds into the stratosphere to cool the earth. One way to look at human civilization, says Kolbert, is as a ten-thousand-year exercise in defying nature. In *The Sixth Extinction*, she explored the

ways in which our capacity for destruction has reshaped the natural world. Now she examines how the very sorts of interventions that have imperiled our planet are increasingly seen as the only hope for its salvation. By turns inspiring, terrifying, and darkly comic, *Under a White Sky* is an utterly original examination of the challenges we face. Perfect for fans of the Percy Jackson and Seven Wonders series, *The Arctic Code* is the first book in an epic, fast-paced middle grade adventure trilogy by acclaimed author Matthew J. Kirby. It is the near future, and the earth has entered a new ice age. Eleanor Perry lives in Tucson, one of the most popular destinations for refugees of the Freeze. She is the daughter of a climatologist who is trying to find new ways to preserve human life on the planet. Dr. Perry believes that a series of oil deposits she has found in the Arctic may hold the key to our survival. That's when she disappears—but not before sending Eleanor a series of cryptic messages that point to a significant and mysterious discovery. Now it's up to Eleanor to go find her. This search will launch Eleanor on a breathless race to unlock the mysteries of what has happened to our planet, solving the riddle of the cold that could be humanity's end—and uncovering a threat to the earth that may not be of this world.
