Relying heavily on primary literary sources and archaeological scholarship, this study sheds new light on the development of towns in early England from late Roman to late Anglo-Saxon times. After a discussion of the problems of urban definition and typology, Russo examines the background of Romano-British urbanism in its prime and in its late Roman transformations. He demonstrates that late Roman towns were virtually abandoned before the Anglo-Saxon invasions. The emporia--new types of Anglo-Saxon towns--are analyzed on the basis of written and archaeological evidence and are compared with continental emporia. Finally, the origin and growth of the Anglo-Saxon burgh is considered from its eighth-century Mercian

beginnings to the better known cases of King Alfred and his successors. Hildegard of Bingen was an abbess of great authority and remains a holy person of the Catholic Church. Nine hundred years after her birth, the popularity and the influence of this great Visionary continue to grow. Her astonishing achievements in so many fields bring inspiration, joy, and help to more people every day. But true appreciation for those achievements requires an informed commentary and interpretation of their originality when compared to the structures of thought, art, religion, and politics in the twelfth century. *The World of Hildegard of Bingen* provides that commentary and interpretation, bringing Hildegard's Visions, thoughts, and practice to life. In *The World of Hildegard of Bingen* Heinrich Schipperges, an authority on Hildegard, offers an in-depth look at one of history's most fascinating Christians. He considers Hildegard's mind and thought from the basis of her understanding of wholeness, both human and universal. He sees her in the context of the political and ecclesiastical events of her time and discusses Hildegard's theology of music and of art. He also elicits the meaning of her symbolism for people's lives today. For Hildegard, the health and beauty of the human mind and body, of moral order, and of the universe reflect the perfection of God. Her Visions and writings speak to us today with extraordinary freshness. In the words and full-color pictures of *The World of Hildegard of Bingen*, this powerful woman speaks to our minds and eyes across nine centuries, offering us strength and encouragement in our quest for meaning and purpose. Includes a generous selection of short Visions, descriptions, and poems extracted from Hildegard's works as well as superb color reproductions of her art. Heinrich Schipperges was educated at the universities of Bonn and Dusseldorf and holds doctorates in medicine and philosophy. He directed the Institute of Medicine at Heidelberg University and is the author of nearly eighty books and eight hundred articles. Recognized as a leading authority on Hildegard of Bingen, Schipperges has devoted most of his work to her since his doctoral thesis in the 1950s. The collection of thirteen codices found in upper Egypt near Nag Hammadi in 1946 is one of the major archaeological discoveries of our time.

Apparently the library of a Gnostic community in late antiquity, the codices are a repository of important spiritual materials from throughout the ancient world. Hence a thorough analysis of this new material is indispensable for any proper understanding of the history of religions in this period. The rich documentation which the codices add to early Coptic text material promises to raise to a new precision the historical analysis of that language. | This edition presents collotype reproductions in natural size of all folios of the thirteen codices as well as reproductions of the covers and photographs previously taken of fragments that are now lost.

Fantasirollespil. The rich findings of recent exploration and research are incorporated in this completely revised and greatly expanded sixth edition of this standard work on the Maya people. It has long been argued that Tatian, in the production of the Diatessaron, made regular reference to the Old Testament Peshitta when he came across Old Testament citations in the Gospels. This book argues on the contrary that Tatian made little or no use of the Old Testament Peshitta, but regularly took over the text of the Old Testament citations as he found them in the Gospel sources out of which he created his harmony. Where they differ from the form of these citations in the standard Greek text tradition of the Gospels, it is because, in the second century, Tatian had access to Gospel sources which may have varied significantly from the text of the later manuscripts on which our modern critical editions are based. Thus, Tatian's Diatessaron becomes a window into an early state of the Gospel texts and supports the idea that a significant amount of textual fluidity characterized the Gospel texts in the first two centuries of their transmission. This study will be of interest to those working in the

fields of Diatessaronic studies, New Testament Textual Criticism, and the history of the Syriac Church. *Scribal Habits in Sixth-Century Greek Purple Codices* looks at unique readings and scribal changes in three closely related manuscripts, N 022, O 023 and Σ 042, concluding that for these three Gospel books, singular readings do not reveal scribal habits. The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self. Since 2002, a major international project has been creating an electronic version of the manuscript. This magnificent printed facsimile reunites the text, now divided between the British Library, the National Library of Russia, St Catherine's Monastery, Mt Sinai and Leipzig University Library. Mary Ellen Miller's rich visual and scholarly survey of pre-Hispanic art and architecture, including the most recent archaeological finds. Expanded and revised in its sixth edition, *The Art of Mesoamerica* surveys the artistic achievements of the high pre-Hispanic civilizations of Central America—Olmec, Maya, Teotihuacan, Toltec, and Aztec—as well as those of their lesser-known contemporaries. Providing an in-depth examination of central works, this book guides readers through the most iconic palaces, pyramids, sculptures, and paintings. From the Olmec colossal head 5 recovered from San Lorenzo to the Aztec calendar stone found in Mexico City's Zocalo in 1790, this book reveals the complexity and innovation behind the art and architecture produced in pre-Hispanic civilizations. This urgent and eye-opening book makes the case that protecting humanity's future is the central challenge of our time. If all goes well, human history is just beginning. Our species could survive for billions of years - enough time to end disease, poverty, and injustice, and to flourish in ways unimaginable today. But this vast future is at risk. With the advent of nuclear weapons, humanity entered a new age, where we face existential catastrophes - those from which we could never come back. Since then, these dangers have only multiplied, from climate change to engineered pathogens and artificial intelligence. If we do not act fast to reach a place of safety, it will soon be too late. Drawing on over a decade of research, *The Precipice* explores the cutting-edge science behind the risks we face. It puts them in the

context of the greater story of humanity: showing how ending these risks is among the most pressing moral issues of our time. And it points the way forward, to the actions and strategies that can safeguard humanity. An Oxford philosopher committed to putting ideas into action, Toby Ord has advised the US National Intelligence Council, the UK Prime Minister's Office, and the World Bank on the biggest questions facing humanity. In *The Precipice*, he offers a startling reassessment of human history, the future we are failing to protect, and the steps we must take to ensure that our generation is not the last. "A book that seems made for the present moment." —*New Yorker*

A chilling mosaic novel by masters of their craft. On a misty cemetery world, three strangers are drawn together through mysterious circumstances. Each of them has a tale to tell of a narrow escape from death. Amid the toll of funerary bells and the creep and click of mortuary-servitors, the truth is confessed. But whose story can be trusted? Whose recollection is warped, even unto themselves? For these are strange stories of the uncanny, the irrational and the spine-chillingly frightening, where horrors abound and the dark depths of the human psyche is unearthed. A chilling portmanteau. I could feel the hairs on the back of my neck prickling. The perfect combination of horror and *Warhammer 40,000*.'
