[Advances in Cross-Cultural Decision Making](#) Apr 23 2020 This book reports on the latest advances in understanding cross-cultural decision and human cognition with respect to various cultural constructs, such as geographical, historical, sociological, and organizational cultures. It addresses researchers, scholars, and industry practitioners from diverse fields, including sociology, linguistics, business, military science, psychology, human factors research, neuroscience, and education. The book covers a wealth of topics, including: analyses of historical events and intercultural competence; commercial applications of social-cultural science; the study of decision-making similarities (and differences) across cultures; cultural behavioral modeling and simulation technology; and social networks and studies on group communication alike. It also reports on real-world case studies relevant to cross-cultural decision-making. The book's main goal is to combine studies from other relevant disciplines such as causal analysis in complex environments, team decision making and social changes to develop a more holistic understanding of the decisions that people, groups, and societies make, so as to improve our ability to forecast and plan for the future. Based on the AHFE 2017 International Conference on Cross-Cultural Decision Making (CCDM), held on July 17–21, 2017, in Los Angeles, California, USA, this book offers a multidisciplinary view on the impact of culture on people's cognition and behavior, and a timely reference guide to new applications and future challenges.

[Writing Program Architecture](#) Aug 28 2020 Writing Program Architecture offers an unprecedented abundance of information concerning the significant material, logistical, and rhetorical features of writing programs. Presenting the realities of thirty diverse and award-winning programs, contributors to the volume describe reporting lines, funding sources, jurisdictions, curricula, and other critical programmatic matters and provide insight into their program histories, politics, and philosophies. Each chapter opens with a program snapshot that includes summary demographic and historical information and then addresses the profile of the WPA, program conception, population served, funding, assessment, technology, curriculum, and more. The architecture of the book itself makes comparison across programs and contexts easy, not only among the programs described in each chapter but also between the program in any given chapter and the reader's own program. An online web companion to the book includes access to the primary documents that have been of major importance to the development or sustainability of the program, described in a "Primary Document" section of each chapter. The metaphor of architecture allows us to imagine the constituent parts of a writing program as its foundation, beams, posts, scaffolding—the institutional structures that, alongside its people, anchor a program to the ground and keep it standing. The most extensive resource on program structure available to the field, Writing Program Architecture illuminates structural choices made by leaders of exemplary programs around the United States and provides an authoritative source of standard practice that a WPA might use to articulate programmatic choices to higher administration. **Thinking Critically through Digital Media** Jan 13 2022 Although the use of internet and digital materials in the language classroom has come a long way over the last 25 years, still the vast majority of web based material that finds its way into the language classroom is used for information input or comprehension purposes. The students' interaction with the materials is as such largely passive with the teacher controlling the suitability of the materials selected and deciding what information the students will extract from it. In *Thinking Critically through Digital Media* I have tried to build on this model, but develop it and take it to deeper and more critical levels of analysis that go beyond the superficial linguistic level and help to develop students not only as English language speakers but as capable information literate participants in the global knowledge economy. The book uses as its basis the development of key digital literacies. These include the ability to understand visually presented data, the ability collect and analyse data using a range of techniques and survey tools and the ability to create and deliver a range of presentation types using digital media tools. Whilst developing these digital literacies students are also encouraged to assess the validity, credibility and underlying bias of the information they study and are given a range of research tools and techniques for reassessing the information and evaluating how it fits within their personal framework of belief systems and values. The book itself has four main chapters. The first three chapters contain a range of activities that teachers can use with students to develop their abilities to understand and create infographics, develop research polls and surveys and create and deliver presentations. These activities give students hands-on exposure to a range of recommended tools and develop students as active creators of information whilst developing their abilities to work collaboratively in digital online environments. The fourth key chapter of the book is a collection of lesson plans that teachers can use to take students through a complete process from accessing their existing knowledge about a topic, understanding new input, examining how the information fits into their existing value scheme, checking the credibility and validity of the information, carrying out their own parallel research through social media to finally sharing and reevaluating what they have learned. You can see an example of the classroom materials here: <https://bit.ly/intro-extro-demo> I believe that the skills and abilities teachers can help students develop through the use of these materials are ones that are sadly lacking, not only in the English language classroom but also in the general education of many students around the world. Through the use of these materials, I hope teachers can develop more actively and intellectually critical students who approach digital media with the ability not only to comprehend and consume information but also understand the possible bias, motivation and underlying values of those creating the information. I believe these skills and abilities are key to creating a more tolerant, open-minded and critically aware global society.

**Overcoming Bias** Oct 10 2021 Journalists go out of their way to avoid purposeful bias in the news. But there is a more pervasive set of internal biases and flaws in thinking that can lead to unintentional inaccuracies and distortions in news coverage. This engaging book offers a fresh take on reporting without bias, targeting the way that we categorize people, filter information and default to rehearsed ways of thinking. Included throughout are stories and on-target advice from reporters and editors, providing real-world voices and experiences. This advice and guidance is coupled with practical exercises that give readers the chance to apply what they learn. *Overcoming Bias* will teach readers to edit their thinking for habitual errors, making them more perceptive journalists. It provides a career-long foundation for challenging bias. This is an ideal text for a course on multi-cultural reporting or journalism ethics; it may also be used as a supplement in any course on reporting and writing, as each chapter deals with potential biases that emerge at each stage of the story process, from story ideas to editing.

**Symphony in C: Carbon and the Evolution of (Almost) Everything** Jun 25 2020 An enchanting biography of the most resonant—and most necessary—chemical element on Earth. Carbon is everywhere: in the paper of this book and the blood of our bodies. It's with us from beginning to end, present in our baby clothes and coffin alike. We live on a carbon planet, and we are carbon life. No other element is so central to our well-being; yet, when missing or misaligned, carbon atoms can also bring about disease and even death. At once ubiquitous and mysterious, carbon holds the answers to some of humanity's biggest questions. Where did Earth come from? What will ultimately become of it—and of us? With poetic storytelling, earth scientist Robert M. Hazen explores the universe to discover the past, present, and future of life's most essential element. We're not only "made of star stuff," as Carl Sagan famously observed, but "Big Bang stuff," too. Hazen reveals that carbon's grand symphony began with a frenzied prelude shortly after the dawn of creation, bringing new attention to the tiny number of Big Bang-created carbon atoms that often get overlooked. In minutes, violently colliding protons and neutrons improbably formed the first carbon atoms, which can still be found within our bodies. His book then unfolds in four movements, building momentum as he explores carbon as the element of Earth, Air, Fire, and Water. He visits the famed volcanic crater Solfatara di Pozzuoli near Naples, where venting carbon dioxide and other noxious fumes condense into beautiful crystals. He climbs the cliffs of the Scottish Highlands and delves deep into the precious-metal mines of Namibia, journeying toward Earth's mysterious core in search of undocumented carbon structures. Hazen often asks us to pause and consider carbon's role in climate change and what we can do about it, for our lives and this element are inextricably intertwined. With prose that sparkles like a diamond, *Symphony in C* tells the story of carbon, in which we all have a part.

*Communicating Corporate Social Responsibility in the Digital Era* Aug 08 2021 Although literature on corporate social responsibility is vast, research into the use and effectiveness of various communications through digital platforms about such corporate responsibility is scarce. This gap is surprising; communicating about corporate social responsibility initiatives is vital to organizations that increasingly highlight their corporate social responsibility initiatives to position their corporate brands for both consumers and other stakeholders. Yet these organizations still sometimes rely on traditional methods to communicate, or even decide against communicating at all, because they fear triggering stakeholders' skepticism or cynicism. A systematic, interdisciplinary examination of corporate social responsibility communication through digital platforms therefore is necessary, to establish an essential definition and up-to-date picture of the field. This research anthology addresses the above objectives. Drawing on marketing, management, and communication disciplines, among others, this anthology examines how organizations construct, implement, and use digital platforms to communicate about their corporate social responsibility and thereby achieve their organizational goals. The 21 chapters in this anthology reflect six main topic sections: Challenges and opportunities for communicating corporate social responsibility through digital platforms. Moving toward symmetry and interactivity in digital corporate social responsibility communication. Fostering stakeholder engagement in and through digital corporate social responsibility communication. Leveraging effective digital corporate social responsibility communication. Digital activism and corporate social responsibility. Digital methodologies and corporate social responsibility.

**Digital Literacy for Primary Teachers** Feb 02 2021 The educational landscape for primary teachers and learners is increasingly digital and technology rich, making it a challenge for professionals to decide which digital technologies to use, how and when, to bring about the maximum benefit for learning and teaching. This book navigates this complex and evolving arena, providing a structure for teachers to reflect on their own digital literacy, helping them make informed decisions, providing practical ideas on how to develop children's digital literacy capabilities and offering a range of professional development activities. The text makes clear links to the new primary curriculum, including the computing programmes of study. It is pedagogy led and illustrated with a range of subject examples. Chapters examine the implications of digital literacy for teaching and learning, creating content, collaboration and communication, digital citizenship, e-safety and digital safeguarding. Critical questions and reflections throughout stimulate readers to engage fully with the text and their professional development.

**Teaching Children and Adolescents Physical Education 4th Edition** May 17 2022 Expanded to address teaching across elementary, middle, and high school, this resource focuses on what it takes to become a master physical education teacher. It includes new research, examples, technology tips, sample task sheets, and assessment examples—all relevant to K-12.

**Sustainable Marketing Planning** Nov 30 2020 There are two major parallel challenges facing managers and leaders: first, how to adapt to global changes in markets, competition and supply, and second, how to grow a business while observing recognisably sustainable practices. Companies must now align their values with customers who increasingly seek people-friendly and planet-friendly products and services. Using sustainable marketing techniques to create value ultimately leads to improved customer satisfaction, better professional relationships and increased effectiveness. With marketing planning absent from the current textbook offering, this book provides practical insights, tools and frameworks to help readers produce tactically and strategically appropriate marketing plans. Showing how to embed sustainability in these strategies and reflecting on the historical and current criticisms aimed at marketing, students will be shown how to implement changes while being encouraged to reflect on why they are needed. Full of tools and frameworks to improve comprehension, including chapter-by-chapter learning outcomes, summaries, exercises, applied activities and mini case studies, it bridges the gap between theory and practice effectively and accessibly. Finally, PowerPoint lecture slides and Multiple Choice Questions sections are provided for each chapter as electronic resources. Presenting contemporary themes and challenges at the cutting edge of business research and practice, this book should be core reading for advanced undergraduate and postgraduate students of sustainable marketing, marketing planning and marketing strategy, as well as professionals seeking to improve the competitive advantage of their organisations.

**Literature and the Scottish Reformation** Nov 11 2021 Throughout the twentieth century Scottish literary studies was dominated by a critical consensus that critiqued contemporary anti-Catholic by advancing a re-reading of the Reformation. This consensus understood that Scotland's rich medieval culture had been replaced with an anti-aesthetic tyranny of life and letters. As a result, Scottish literature has consistently been defined in opposition to the Calvinism to which it frequently returns. Yet, as the essays in this collection show, such a consensus appears increasingly untenable in light both of recent research and a more detailed survey of Scottish literature. This collection launches a full-scale reconsideration of the series of relationships between literature and reformation in early modern Scotland. Previous scholarship in this area has tended to dismiss the literary value of the writing of the period - largely as a reaction to its regular theological interests. Instead the essays in this volume reinforce recent work that challenges the received scholarly consensus by taking these interests seriously. This volume argues for the importance of this religiously orientated writing, through the adoption of a series of interdisciplinary approaches. Arranged chronologically, the collection concentrates on major authors and texts while engaging with a number of contemporary critical issues and so highlighting, for example, writing by women in the period. It addresses the concerns of historians and theologians who have routinely accepted the established reading of this period of literary history in Scotland and offers a radically new interpretation of the complex relationships between literature and religious reform in early modern Scotland.

**Building Bridges: HCI, Visualization, and Non-formal Modeling** Oct 30 2020 This volume constitutes the refereed post-workshop proceedings of two IFIP WG 13.7 workshops on Human-Computer Interaction and Visualization: the 7th HCI Workshop on Non-formal Modelling for Interaction Design, held at the 29th European Conference on Cognitive Ergonomics, ECCE 2011, in Rostock, Germany, in August 2011 and the 8th HCI Workshop on HCI and Visualization, held at the 13th IFIP TC 13 Conference on Human-Computer Interaction, INTERACT 2011, in Lisbon, Portugal, in September 2011. The 15 revised papers presented were carefully reviewed and selected for inclusion in this volume. They cover a wide range of topics in the fields of non-formal modeling, visualization and HCI and provide visions from researchers working at or across the borders between these domains that may help develop a holistic cross-discipline.

**MasterClass in History Education** May 25 2020 MasterClass in History Education draws on international research and practice to present effective and engaging approaches for history teachers who want to explore the ways in which reading, research and reflection can support the development of history teaching and learning in the classroom. At the heart of the book is a series of professional enquiries carried out by experienced history teachers, working in a range of contexts. Each history teacher addresses clear questions arising from their practice and together they illustrate various approaches to data collection, data analysis and argument. These history teachers also show how they drew on diverse scholarship in history and history education, including many publications by other history teachers. In eight further chapters, other experts, ranging from practitioner-scholars to researchers in diverse fields (such as history, history education, teacher education, teacher research and curriculum theory) reflect on the distinctive insights that these teachers offer and explore connections with their own fields. The combination of perspectives and the depth of knowledge of the varied contributors reveal the importance of different kinds of relationship between 'theory' and 'practice'. The links between classroom realities and research and the critical use of different kinds of text will support history teachers in developing their practice and professional voice.
