NEW YORK TIMES BESTSELLER • From the bestselling author of *Mexican Gothic* and *Velvet Was the Night* comes a lavish historical drama reimagining of *The Island of Doctor Moreau* set against the backdrop of nineteenth-century Mexico. “This is historical science fiction at its best: a dreamy reimagining of a classic story with vivid descriptions of lush jungles and feminist themes. Some light romance threads through the heavier ethical questions concerning humanity.”—*Library Journal* (starred review) “The imagination of Silvia Moreno-Garcia is a thing of wonder, restless and romantic, fearless in the face of genre, embracing the polarities of storytelling—the sleek and the bizarre, wild passions and deep hatreds—with cool equanimity.”—*The New York Times* (Editors’ Choice) ONE OF THE BEST BOOKS OF THE YEAR: *The New York Times Book Review*, *Time*, *NPR*, *Polygon*, *Tordotcom*, *Paste*, *CrimeReads*, *Booklist* *Carlota Moreau*: A young woman growing up on a distant and luxuriant estate, safe from the conflict and strife of the Yucatán peninsula. The only daughter of a researcher who is either a genius or a madman. *Montgomery Laughton*: A melancholic overseer with a tragic past and a propensity for alcohol. An outcast who assists Dr. Moreau with his experiments, which are financed by the Lizaldes, owners of magnificent haciendas and plentiful coffers. *The hybrids*: The fruits of the doctor’s labor, destined to blindly obey their creator and remain in the shadows. A motley group of part human, part animal monstrosities. All of them live in a perfectly balanced and static world, which is jolted by the abrupt arrival of Eduardo Lizalde, the charming and careless son of Dr. Moreau’s patron, who will unwittingly begin a dangerous chain

reaction. For Moreau keeps secrets, Carlota has questions, and, in the sweltering heat of the jungle, passions may ignite. The Daughter of Doctor Moreau is both a dazzling historical novel and a daring science fiction journey. You'll discover the highest-paying tech careers, the most successful video game companies, the most popular blogs...and more! So sit back, unplug, and enjoy! A behind-the-scenes look at the robustly competitive race to dominate the market for electric cars, the larger-than-life moguls behind them, and the changes that are transforming the auto industry In the 1980s, it was

unimaginable that the home computer would become as common and easy to use as a toaster. Today, plug-in charging stations and smart grids seem like something still far off in the future. But by 2020, the auto industry will look very different from today's field of troubled auto giants. The combination of technological breakthroughs and charging networks driven by global warming and peak oil makes it clear that revolutionary change in the auto industry is happening right now. In *High Voltage*, Jim Motavalli captures this period of unprecedented change, documenting the evolution from internal combustion engines to electric power. Driven by the auto world's ambitious and sometimes outlandish personalities, the book chronicles the race to dominate the market, focusing on big players like Tesla and Fisker, as well as a tiny start-up and a battery supplier. Flashing forward to the changes we'll see in the coming years, *High Voltage* shows a not-so-distant future where we will live on a smart grid, our cars "fueling," that is, charging, while we shop or sleep. The ramifications of these changes will be on a grander scale than most of us ever imagined—altering foreign policy, reducing trade deficits, and perhaps even ending global warming.

*MODERN BUSINESS STATISTICS, 5E* allows students to gain a strong conceptual understanding of statistics with a balance of real-world applications and a focus on the integrated strengths of Microsoft Excel 2013. Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car-and-truck book on the market. "Dr. Phil," along with George Iny and the Editors of the Automobile Protection Association, pull no punches. The electric vehicle offers many promises-increasing U.S. energy security by reducing petroleum dependence, contributing to climate-change initiatives by decreasing greenhouse gas (GHG) emissions, stimulating long-term economic growth through the development of new technologies and industries, and improving public health by improving local air quality. There are, however, substantial technical, social, and economic barriers to widespread adoption of electric vehicles, including vehicle cost, small driving range, long charging times, and the need for a charging infrastructure. In addition, people are unfamiliar with electric vehicles, are uncertain about their costs and benefits, and have diverse needs that current electric vehicles might not meet. Although a person might derive some personal benefits from ownership, the costs of achieving the social benefits, such as reduced GHG emissions, are borne largely by the people who purchase the vehicles. Given the recognized barriers to electric-vehicle adoption, Congress asked the Department of Energy (DOE) to commission a study by the National Academies to address market barriers that are slowing the purchase of electric vehicles and hindering the deployment of supporting

infrastructure. As a result of the request, the National Research Council (NRC)-a part of the National Academies-appointed the Committee on Overcoming Barriers to Electric-Vehicle Deployment. This committee documented their findings in two reports-a short interim report focused on near-term options, and a final comprehensive report. Overcoming Barriers to Electric-Vehicle Deployment fulfills the request for the short interim report that addresses specifically the following issues: infrastructure needs for electric vehicles, barriers to deploying the infrastructure, and possible roles of the federal government in overcoming the barriers. This report also includes an initial discussion of the pros and cons of the possible roles. This interim report does not address the committee's full statement of task and does not offer any recommendations because the committee is still in its early stages of data-gathering. The committee will continue to gather and review information and conduct analyses through late spring 2014 and will issue its final report in late summer 2014. Overcoming Barriers to Electric-Vehicle Deployment focuses on the light-duty vehicle sector in the United States and restricts its discussion of electric vehicles to plug-in electric vehicles (PEVs), which include battery electric vehicles (BEVs) and plug-in hybrid electric vehicles (PHEVs). The common feature of these vehicles is that their batteries are charged by being plugged into the electric grid. BEVs differ from PHEVs because they operate solely on electricity stored in a battery (that is, there is no other power source); PHEVs have internal combustion engines that can supplement the electric power train. Although this report considers PEVs generally, the committee recognizes that there are fundamental differences between PHEVs and BEVs. As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls

no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz - rich cars, poor quality. There's only one Saturn you should buy. Toyota - enough apologies: "when you mess up, 'fess up." "Dr. Phil," Canada's best-known automotive expert, invites another driver to come aboard. After forty-six years and almost two million copies sold, Phil Edmonston is joined by a co-pilot for the Lemon-Aid Guide — George Iny, along with the editors of the Automobile Protection Association. The 2017 Lemon-Aid has everything: an encyclopedic lineup of the best and worst cars, trucks, and SUVs sold since 2007; secret warranties and tips on the "art of complaining" to help you get your money back; and new-car buying tips that will save you tons of money by revealing the inflated cost of fancy and frivolous add-ons. Lemon-Aid is an essential guide for careful buyers and long-time gear-heads who don't know as much as they think. This book examines the use of everyday items such as food, clothing, and social media accounts to offer sociological and intersectional analyses of how religion, race, politics, class, and gender shape, define, and reinforce consumption practices of Muslim American women. We all need mechanics, yet half of us don't trust them. The Car Care World is a collection of humorous factual auto advice columns. Easy reads, these pearls of wisdom are written in consumer-advocate style by an experienced mechanic. The sometimes contentious viewpoints of owners and mechanics are discussed with humor. Some of the reasons for the distrust are explored, and some solutions are offered. The reader will begin to understand whom to trust and when to trust them. This is not a book about how to fix your own car, although hundreds of repair tips are presented, along with solid advice about necessary and unnecessary repairs to today's cars. It is a series of stories that will enlighten you about getting a car fixed by professionals without being duped, whether you "know cars" or not. (Second Edition) Are you considering buying an electric vehicle? All of us are witnessing a once-in-a-lifetime transformation. For over one hundred years, gasoline and diesel fuels have powered ground transportation throughout the world. Now that is changing, and 2023 is the year when most people

will recognize that change is happening. This book is a comprehensive, easy-to-understand overview of the passenger EV universe including guides for buying and owning an electric car. The authors discuss choosing, owning and driving an electric car, then explain the features, advantages, benefits and limitations of over 45 EV models including pickup trucks, SUVs, and sedans. "If you have to have a car, make it an electric car. As this book makes clear, they are better than old-fashion vehicles in every way." -Bill McKibben, American environmentalist and climate change authority; co-founded 350.org and spearheaded the fossil fuel divestment campaign resulting in endowments worth more than \$15 trillion stepping back from oil, gas and coal. "Thankfully, now that the electric vehicle R&D "dark ages" are coming to an end and automakers around the world are charging up their EV programs, there's no doubt that we're about to see massive, valuable change in our transportation landscape." -Sebastian Blanco, one of America's leading electric car journalists who has been writing about EVs since 2006. This illustrated history chronicles electric and hybrid cars from the late 19th century to today's fuel cell and plug-in automobiles. It describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars' research and development. The important marketing shift from a "woman's car" to "going green" is discussed. Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered. From old-fashioned bricks-and-mortars to cutting-edge startups, businesses are moving into uncharted territory as they determine how to move from an analog past to a digital future effectively. How can you make sure not to leave human instinct behind? Businesses are leaving behind traditional meetings in favor of virtual ones, transitioning from surveys and studies to analytics and algorithms. The startling and often unacknowledged truth is

that?the promise of digital transformation can only be realized when we find a way to balance it with the promise of people.?In the end, it's the people that matter, and companies must never forget the soul that drives them. In *Restoring the Soul of Business*, business leader Rishad Tobaccowala?teaches you to: Understand how to unleash the significant benefit that can be realized by combining emotion and data, human and machine, analog and digital. Spot the warning signs of data-blinded companies: cold cultures with little human interaction, poor innovation stemming from discouraged employees who don't contribute ideas, and poor customer service due to automated, robotic processes.
