Business Institutions and Behaviour in Australia Dec 12 2021 This study of Australian business institutions and practices places the rise of big business in Australia in a comparative context through a study of its 100 largest firms in the first six and a half decades of the 20th century. Unlike many of the wealthy economies of the northern hemisphere, Australia's lists of the 100 largest firms were dominated up to World War II by those from the resource and service industries. The high levels of foreign direct investment in the resources and manufacturing industries is also highlighted. Other chapters employ 21st-century theories of the firm to explore business behaviour in more depth.

Democracy, Power, and the Supreme Court Mar 23 2020 The debate over campaign finance regulation is usually framed as a conflict between reducing corruption in the electoral process, on the one hand, and protecting freedom of speech, on the other. There is far more at stake, however, in the controversy over campaign finance regulation. By engaging in a comparative analysis of key decisions by the U.S. Supreme Court and the Supreme Court of Canada, this article shows that the judicial oversight of campaign finance reform raises fundamental and complex questions about democratic values, processes, and institutions. Campaign finance restrictions prevent inequalities in wealth from being translated into inequalities in political power; at the same time, campaign finance regulations protect incumbents, and may also shift power to a smaller set of elites within society. I claim, therefore, that the question of what to do about campaign finance regulation leads to a troubling paradox: the absence of campaign finance regulations may result in the entrenchment of the wealthy, while the imposition of campaign finance regulations may result in the entrenchment of the powerful. Based on these observations, this article develops a proposal for the adjudication of campaign finance cases. Instead of treating the campaign finance debate as a choice between reducing corruption or protecting speech, I claim instead that the decision to regulate campaign finance should be viewed as inevitably involving a trade-off among competing distributions of power in a democracy. This Article outlines a proposal for how courts should analyze the power trade-offs involved in the regulation of campaign finance.

Comparative Public Management Feb 20 2020 In this new approach to a comparative text in public management, Randall Baker examines how, why, and to what extent the public sector around the world has shared in the management revolution. The book is designed to isolate and demonstrate the essential American-ness of the United States' public service by holding it up to the mirror of other developed democracies. While there are lessons to be learned from other countries, Baker and his expert contributors examine the complexities of making comparisons across cultures, even within broadly similar democratic systems, and urban-industrial economies. The volume concludes with a list of sectoral cases. These comprise most of the main dimensions of public-sector activity around the world. They are the main elements of many graduate professional degrees in public affairs, and the material has been written with the needs of both practitioners and teachers in mind. This is essential reading for all concerned with public management and administration as well as comparative government.

The American Anomaly Mar 03 2021 Seymour Martin Lipset pronounced over a decade ago, "Those who know only one country know no country." It is well established that students learn the intricacies of American politics better when they are presented in a comparative context. In today's globalized society and workforce, it is all the more important for students to understand that the American political system is in many ways the exception and not the rule. Introductory textbooks on American government, however, rarely emphasize in sufficient depth how the United States compares to other political systems. And introductions to comparative politics infrequently situate the United States in their analysis. The American Anomaly systematically analyzes the U.S. political system by way of comparison with other countries, especially other industrialized democracies. It is organized into four sections, respectively covering the constitutional order, governmental institutions, political participation, and public policy. Extended case studies in each chapter draw on all the major regions of the world. Thoroughly revised throughout, the second edition also includes: a new chapter on domestic public policy, including civil rights and liberties; a new chapter on foreign policy; updates throughout to reflect the 2008 elections and the beginning of the Obama administration; a reorganized section on political participation; over a dozen new figures and tables. A companion website also offers overview slides, links, and other supporting features.

Constituting Federal Sovereignty Sep 28 2020 And she explores the crucial roles played by such factors as sovereignty-honoring elements within the institutional structure of the federation, the circumstances of its formation (revolt against distant empire versus aftermath of war among member states), and notably, the internal culture of respect for the rule of law in the member states.

International Transactions in Goods Jun 25 2020 International Transactions in Goods: Global Sales in Comparative Context explains the complex transactional structures common in international sales, from both an international and a domestic legal perspective. In a straightforward, accessible style, this course book sets out typical business models and commercial practices, including sample legal and commercial documents, and outlining the laws that govern them. Closely attuned to practice, this course book covers transactions on a commercial scale and gives full treatment not only to legal topics, but also payment, security, carriage, and insurance, addressing both traditional topics such as letters of credit, bills of lading, and the Incoterms, as well as modern practices like electronic funds transfers, and waybills. Martin Davies and David V. Snyder emphasize the strategic questions that lawyers and businesses face when negotiating and documenting deals, and when litigating transactions that have gone awry. As many of the strategies revolve around choice of governing law, the book treats not only international law, particularly the UN Convention on the International Sales of Goods

(CISG), but also exemplary domestic laws from both common law and civil law jurisdictions, including the US Uniform Commercial Code (UCC), English law, French law, and German law. This book is designed to be accessible to students and readers of all levels, whether from common law or civil law backgrounds, by providing basic explanations of fundamental theories and attitudes in international law, common law, civil law, and international business. The format includes the methods of different traditions, with extensive text familiar to civil law readers, case excerpts familiar to common law readers, and a large array of problems-based on real cases and transactions-to demonstrate the concepts and to practice and evaluate what has been learned. The book also tackles current ethical and moral issues in international transactions, particularly the relation of law and contracting to environmental protection, workers' rights, and similar matters.

Crime, Procedure and Evidence in a Comparative and International Context Jan 21 2020 This book aims to honour the work of Professor Mirjan Damaška, Sterling Professor of Law at Yale Law School and a prominent authority for many years in the fields of comparative law, procedural law, evidence, international criminal law and Continental legal history. Professor Damaška's work is renowned for providing new frameworks for understanding different legal traditions. To celebrate the depth and richness of his work and discuss its implications for the future, the editors have brought together an impressive range of leading scholars from different jurisdictions in the fields of comparative and international law, evidence and criminal law and procedure. Using Professor Damaška's work as a backdrop, the essays make a substantial contribution to the development of comparative law, procedure and evidence. After an introduction by the editors and a tribute by Harold Koh, Dean of Yale Law School, the book is divided into four parts. The first part considers contemporary trends in national criminal procedure, examining cross-fertilisation and the extent to which these trends are resulting in converging practices across national jurisdictions. The second part explores the epistemological environment of rules of evidence and procedure. The third part analyses human rights standards and the phenomenon of hybridisation in transnational and international criminal law. The final part of the book assesses Professor Damaška's contribution to comparative law and the challenges faced by comparative law in the twenty first century.

Introducing Comparative Politics May 05 2021 Organized thematically around important questions in comparative politics—who rules? what explains political behavior? where and why?—Introducing Comparative Politics, Fifth Edition by Stephen Orvis and Carol Ann Drogus, integrates a set of extended case studies of 11 core countries directly into the narrative. Serving as touchstones, the cases are placed within the chapters where they make the most sense topically—not separated from the theory or in a separate volume—and vividly illustrate issues in cross-national context. The book's hybrid organization gives students a more holistic view of comparative politics.

The Curse of Natural Resources Jun 06 2021 This book examines the paradox that resource-rich countries often struggle to manage their resources in a way that will help their economies thrive. It looks at how a country's political regime and quality of governance can determine the degree to which it benefits - or suffers - from having natural resources, shifting away from the traditional focus on economic growth data to study the complex implications of these resources for human well-being and sustainable development. To this end, Acar examines a panel of countries in terms of the effects of their natural resources on human development and genuine saving, which is a sustainability indicator that takes into account the welfare of future generations by incorporating the changes in different kinds of capital. Acar finds that the exportation of agricultural raw materials is associated with significant deterioration in human development, while extractive resource exports, such as energy and minerals, have negative implications for genuine savings. Next, the book compares the development path of Norway before and after discovering oil, contrasting it with Sweden's development. The two countries, which followed almost identical paths until the 1970s, diverged significantly in terms of per capita income after Norway found oil.

Tales of Crossed Destinies Sep 09 2021 Azade Seyhan's *Tales of Crossed Destinies: The Modern Turkish Novel in a Comparative Context*, second in the MLA series *World Literatures Reimagined*, offers a much-needed guide to the vast, underexplored territory of modern Turkish literature. Seyhan situates the Turkish novel in relation to such influences as the poetic and oral traditions of Ottoman Islamic culture, the early Turkish Republic, and Western Romantic and Enlightenment thought. She demonstrates that the evolution of the Turkish novel is inseparable from that of the Turkish state. Readers will discover a wealth of Turkish authors, from those with international renown, such as Ahmet Hamdi Tanpınar and the Nobel laureate Orhan Pamuk, to others less widely read. Among them are Reşat Nuri Güntekin, whose *Autobiography of a Turkish Girl* prompted thousands of young Turkish women to seek teaching posts; Halide Edib Adıvar, who envisioned a harmonious coexistence of Islamic spirituality with Western ideals; Aziz Nesin, Turkey's master humorist, who instructs the reader in censor-resistant code; and Yaşar Kemal and Adalet Ahoğlu and their blendings of myth, memory, and politics. Appendixes provide a chronology, a pronunciation guide to Turkish, and a list of modern Turkish novels in English translation, preparing readers to embark on further exploration.

Education in a Comparative Context Apr 28 2023 This series of the Israel Sociological Association, whose object is to identify and clarify the major themes that occupy social research in Israel today, gathers together the best of Israeli social science investigation that was previously scattered in a wide variety of international journals. Each book in the series focuses on a particular topic and is introduced by integrative essays, making the volumes thorough and self-contained. Israel is at the crossroads of many worlds: Africa, Asia, Europe, and has strong ties to the Anglo-American style of scholarship. In this, the fourth volume of *Studies of Israeli Society*, we have a perfect illustration of how vital these geographic linkages are in the sociological study of education in cross-cultural contexts. The volume, edited by the distinguished Anglo-Israeli scholar, and now rector of Bar-Ilan University, Ernest Krausz, adds a new dimension to this series, and no less, to the global understanding of the dual process of education and learning. The scope and depth of Israeli scholarship in the sociology of education will be manifest from the opening new essay by Eliahu Katz honoring the late Joseph Ben-David, to the closing comprehensive bibliography by David Glanz.

The End of Class Politics? Aug 28 2020 The last few decades has seen a prolonged debate over the nature and importance of social class as a basis for ideology, class voting and class politics. The prevailing assumption is that, in western societies, class inequalities are no longer important in determining political behaviour. In *The End of Class Politics?* leading scholars from the US, UK and Europe argue that the evidence on which the assumptions about the decline importance of class is based is unfounded. Instead, the book argues that the class basis of political competition has to some degree evolved, but not declined. Furthermore, the social basis of political competition and sweeping claims about the new politics of postindustrial society need to be re-examined.

Exploring childhood in a comparative context Feb 26 2023 *Exploring Childhood in a Comparative Context* meets an increasing need for students focusing on early childhood to be familiar with alternative practices in other countries. Providing a ready-made source of information about a wide range of countries including Finland, the Netherlands, the United States, New Zealand, Japan, South Africa and many more, the book clearly describes the way each country understands and conceptualises childhood. Each chapter includes contextual information about the country, an introduction to the theory that has shaped practice and describes the curriculum for pre-school and primary education. Including vignettes from practitioners working in each country to illustrate practice, the chapters explore key themes such as: Child development Parental involvement Teaching and learning Professionalism Assessment Pupil experience. Accessibly written and including opportunities for reflection, this timely new book will give students a valuable insight into alternative education systems that is essential if they are to become practitioners with a current and global approach.

Human Development in India in a Comparative Context Oct 30 2020 Human Development is both an end as well as means of growth and prosperity. It is a process which facilitates enhancing human choices as well as capabilities. Investment in human capital essentially involves improvements in the standards of nutrition, education, health, and habitat. Also UNDP's Human Development Index (HDI) has offered a better index of development than Income index. An attempt has been made in this paper to study first, the level of achievements of human development in India in relation to the other countries. This will help to identify the gaps, suggest appropriate strategies including financial restructuring at the governmental level to be able to bring about perceptible improvements in the areas of human development in India and consequently create conditions for achieving sustained level of rapid growth with equity. It appears that lack of adequate investment in human capital in India could be one of the principal reasons for perpetuation of low income, poor performance in population control, continuation of large-scale poverty, failures in tackling mounting trade gaps, practically no improvement in the total factor productivity growth, etc. The country, therefore, needs much greater emphasis on human development.

Transnational Migration to Israel in Global Comparative Context Nov 23 2022 This first-of-a-kind edited collection considers the recent phenomenon of transnational migration to Israel in a comparative context. Chimpanzees in Context Apr 04 2021 The study of the chimpanzee, one of the human species' closest relatives, has led scientists to exciting discoveries about evolution, behavior, and cognition over the past half century. In this book, rising and veteran scholars take a fascinating comparative approach to the culture, behavior, and cognition of both wild and captive chimpanzees. By seeking new perspectives in how the chimpanzee compares to other species, the scientists featured offer a richer understanding of the ways in which chimpanzees' unique experiences shape their behavior. They also demonstrate how different methodologies provide different insights, how various cultural experiences influence our perspectives of chimpanzees, and how different ecologies in which chimpanzees live affect how they express themselves. After a foreword by Jane Goodall, the book features sections that examine chimpanzee life histories and developmental milestones, behavior, methods of study, animal communication, cooperation, communication, and tool use. The book ends with chapters that consider how we can apply contemporary knowledge of chimpanzees to enhance their care and conservation. Collectively, these chapters remind us of the importance of considering the social, ecological, and cognitive context of chimpanzee behavior, and how these contexts shape our comprehension of chimpanzees. Only by leveraging these powerful perspectives do we stand a chance at improving how we understand, care for, and protect this species.

Introducing Comparative Politics May 25 2020 Organized thematically around important questions in comparative politics, *Introducing Comparative Politics*, Fourth Edition by Stephen Orvis and Carol Ann Drogus integrates a set of extended case studies of 11 core countries into the narrative. Serving as touchstones, the cases are set in chapters where they make the most sense topically—not separated from theory or in a separate volume—and vividly illustrate issues in cross-national context. The book's organization allows instructors flexibility and gives students a more accurate sense of comparative study. In this edition, a brand new chapter on Contentious Politics covers ethnic fragmentation, social movements, civil war, revolutions, and political violence. New case studies on this topic include the Occupy and Tea Party movements in the US; Zapatista rebellion in Mexico; Boko Haram in Nigeria; and; and revolutions in China and Iran. The chapter on States and Identity has been substantially revised to better introduce students to the concept of identity and how countries handle identity-based demands. Case studies include nationalism in Germany; ethnicity in Nigeria; religion in India; race in the US; gender in Iran; and sexual orientation in Brazil. Content on states and markets, political economy, globalization, and development has all been consolidated into a new Part III of the book, focusing in a sustained way on economic issues.

Sojourners in the Wilderness Feb 02 2021 While the Christian Right has been the subject of a good deal of scholarly analysis, it has not been adequately studied within a comparative context -- across time, across different institutional systems, or across different religious communities. In *Sojourners in the Wilderness*, a host of distinguished scholars examine these dimensions of the Christian Right. The contributors analyze the Christian Right historically -- what is its relationship today with earlier manifestations? How have its organizational structures and strategies changed over time? Sociologically -- what are the current opportunities for Christian Right inroads within African-American, Catholic, and Jewish communities?; and politically -- what accounts for the affinity between many evangelical Protestants and the Christian Right within the American political context, while such an affinity appears to be lacking in other political contexts? All of those interested in religion's role in politics and history will find this book valuable.

Fiscal Policy in Early Modern Europe Feb 14 2022 This book will examine the gradual assembly and consolidation of Portuguese fiscal policy in the second half of the fifteenth century, providing a comparative analysis of the Portuguese State's finances and fiscal dynamics with other Western European monarchies. This book examines relevant aspects of the Portuguese Royal finances, particularly the different instruments employed to provide income and the rubrics involving all types of expenditure between the reigns of Afonso V and Manuel I at the dawn of Modern Ages. The analysis of Portugal's case will also serve as a main conducting wire to a broader fiscal examination of other Latin-rooted Mediterranean and North Atlantic kingdoms. This book will be of interest to students and researchers of economic history, fiscal history, economic theory and history of economic thought, as well as students of Medieval History, the history of the Western Europe and the Iberian Peninsula.

Politics and the Internet in Comparative Context Jan 25 2023 For many years now we have witnessed the developing use of the internet and associated technologies by political actors and organisations. Claims and counter claims have been made as its suitability as a tool to help in the struggle to re-invigorate political participation in democracies across the globe has been contested. This book charts the shifting sands of political activity in the digital age. It interrogates the hybrid nature of modern politics as online and offline actions blur the boundaries of traditional politics between 'real-life' co-presence and the booming virtual domain of politics. By so doing, it critically reflects on the latest scholarship on the subject while concurrently advancing stimulating new insights into it. Encapsulating both the range and the diverse velocities of change in different political arenas

and geographical locations, this volume seeks to map out a path if not towards the politics of tomorrow then towards a better comprehension of the politics of today. Featuring a range of international and comparative case studies presenting research on the UK, US, Italy, France, Spain, Romania, Africa and China, this book will be of interest to students and scholars of Politics and Media, Political Communication, New Media studies, Public Administration, Sociology, Communication Studies, Computing and Information and Communications Technologies.

Youth Justice and Penalty in Comparative Context Apr 16 2022 This book represents the first major analysis of Anglo-Australian youth justice and penalty to be published and it makes significant theoretical and empirical contributions to the wider field of comparative criminology. By exploring trends in law, policy and practice over a forty-year period, the book critically surveys the 'moving images' of youth justice regimes and penal cultures, the principal drivers of reform, the core outcomes of such processes and the overall implications for theory building. It addresses a wide range of questions including: How has the temporal and spatial patterning of youth justice and penalty evolved since the early 1980s to the present time? What impacts have legislative and policy reforms imposed upon processes of criminalisation, sentencing practices and the use of penal detention for children and young people? How do we comprehend both the diverse ways in which public representations of 'young offenders' are shaped, structured and disseminated and the varied, conflicting and contradictory effects of such representations? To what extent do international human rights standards influence law, policy and practice in the realms of youth justice and penalty? To what extent are youth justice systems implicated in the production and reproduction of social injustices? How, and to what degree, are youth justice systems and penal cultures internationalised, nationalised, regionalised or localised? The book is essential reading for researchers, students and tutors in criminology, criminal justice, law, social policy, sociology and youth studies.
