The most comprehensive book ever written on leatherback sea turtles. Weighing as much as 2,000 pounds and reaching lengths of over seven feet, leatherback turtles are the world's largest reptile. These unusual sea turtles have a thick, pliable shell that helps them to withstand great depths—they can swim more than one thousand meters below the surface in search of food. And what food source sustains these goliaths? Their diet consists almost exclusively of jellyfish, a meal they crisscross the oceans to find. Leatherbacks have been declining in recent decades, and some predict they will be gone by the end of this century. Why? Because of two primary factors: human redevelopment of nesting beaches and commercial fishing. There are only twenty-nine index beaches in the world where these turtles nest, and there is immense pressure to develop most of them into homes or resorts. At the same time, longline and gill net fisheries continue to overwhelm waters frequented by leatherbacks. In *The Leatherback Turtle*, James R. Spotila and Pilar Santidrián Tomillo bring together the world's leading experts to produce a volume that reveals the biology of the leatherback while putting a spotlight on the conservation problems and solutions related to the species. The book leaves us with options: embark on the conservation strategy laid out within its pages and save one of nature's most splendid creations, or watch yet another magnificent species disappear. An interpretative history of Spain's culture, politics, traditions, and people from prehistoric times to the present, with particular concern for twentieth-century life, thought, and more. In its role as handbook, *Hispanics and United States Film* provides the best single source of information on Hispanic personalities in American film and on American films with a Hispanic focus produced from 1896 to the present time. Hundreds of films, actors, and other figures of the film industry are referenced. This informational component of the book, which provides titles, dates, and other filmographic information, is supplemented by a bibliography on the subject. A guide to Mexico's civil law system helps foreigners learn the property buying process. A bonus section provides tips on how to choose a real estate agent plus practical matters such as utilities, fees, and insurance. *Learning in the Age of Digital Reason* contains 16 in-depth dialogues between Petar Jandrić and leading scholars and practitioners in diverse fields of history, philosophy, media theory, education, practice, activism, and arts. The book creates a postdisciplinary snapshot of our reality, and the ways we experience that reality, at the moment here and now. It historicises our current views to human learning, and experiments with collective knowledge making and the relationships between theory and practice. It stands firmly at the side of the weak and the oppressed, and aims at critical emancipation. *Learning in the Age of Digital Reason* is playful and serious. It addresses important issues of our times and avoids the omnipresent (academic) sin of pretentiousness, thus making an important statement: research and education can be sexy. Interlocutors presented in the book (in order of appearance): Larry Cuban, Andrew Feenberg, Michael Adrian Peters, Fred Turner, Richard Barbrook, McKenzie Wark, Henry Giroux, Peter McLaren, Siân Bayne, Howard Rheingold, Astra Taylor, Marcell Mars, Tomislav Medak, Ana Kuzmani?, Paul Levinson, Kathy Rae Huffman, Ana Peraica, Dmitry Vilensky (Chto Delat?), Christine Sinclair, and Hamish McLeod. "A book that must be read by all Americans who desire a more critical understanding of the historical contributions that Africans made beyond the borders of the United States. It dramatically captures a history that has long been neglected by historians of the Mexican Revolution of 1810. . . . An important contribution that links the common histories of African and Latino Americans."--Carlos Muñoz, Jr., University of California, Berkeley Elected the first black Indian president of Mexico in 1829, Vicente Guerrero has been called the country's Washington and Lincoln. This revisionist biography of one of Mexico's most important historical figures--the person who issued the decree abolishing slavery--traces the impact of race and ethnicity on Mexico's national identity. An activist from boyhood and a mule driver by trade, Guerrero led a coalition of blacks and indigenous peoples during the difficult last years of Mexico's war for independence from Spain, 1810-21. In office, he taxed the rich, protected small businesses, tried to abolish the death penalty, and championed the village council movement in which peasants elected representatives without qualifications of race, property ownership, or literacy; he enjoyed signing his correspondence "Citizen Guerrero." In 1831 he was kidnapped and killed by his political opponents. This book also tells the story of seven generations of Guerrero's activist descendants, including his grandson Vicente Riva Palacio, the historian whose well-known writings elaborate on the ideals of a multiracial and democratic nation. Still in print today, his novels, essays, and five-volume national history are used here to help explain the factors that made the region of "El Sur" a center for political radicals from 1810 up to the revolution of 1910. For all readers interested in issues of diversity, this book will illuminate the evolving and distinct interactions of Indians, whites, and the descendants of the 250,000 Africans and 100,000 Asians brought to colonial Mexico. Theodore G. Vincent, a retired history instructor from the University of California, Berkeley, is a former newspaper columnist for the Los Angeles Herald Dispatch. He is the author of four books, most recently *Keep Cool: The Black Activists Who Built the Jazz Age*, and has published many articles on Afro-Mexico. This work is a history of the Pacific, the ocean that became a theatre of power and conflict shaped by the politics of Europe and the economic background of Spanish America. There could only be a concept of the Pacific once the limits and lineaments of the ocean were set and this was undeniably the work of Europeans. Fifty years after the Conquista, Nueva España and Peru were the bases from which the ocean was turned into virtually a Spanish lake. For most of us, privacy means an unlisted telephone number. But what about your Social Security number? Your credit card numbers? Your bank account statements? Your personal health data? You may think this information is also secure, but if you've ever ordered anything over the Internet, or if your credit card is on file at the local video store just in case you never return that copy of Titanic, or if you throw out bank statements without shredding them, then this information is now in the public domain and can easily be discovered and used against you by a private eye, a computer hacker, or even a vengeful neighbor or former lover. Once people gain control of even a shred of your personal information, they can gain control of your life. They can transform this information into access to your assets, your loved ones, even your identity. And once your privacy is gone, there's very little you can do to get it back. J. J. Luna, a highly trained and experienced security consultant, can show you how to achieve the privacy you crave, whether you just want to shield yourself from casual scrutiny or take your life savings and disappear without a trace. He reveals the shocking secrets that private detectives use to uncover information, and then shows you how to safeguard against them. Filled with vivid real-life stories drawn from the headlines and from Luna's own

Jeremy and his cat Aristotle must solve one more riddle to save the Enchanted Theater. Once again they travel through time and space. Once again they face their fears, this time deep in a maze beneath the ground and high in the sky above ancient Greece. If they succeed, the enchantment will be lifted. If they fail... "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Developing a sound, evidence-based plan may seem like a daunting task, but it doesn't have to be. In addition to complete sample life care plans, contributors candidly share the emotional highs and lows of litigation. With stories of limited access to the injured party to the "kick-me" moments of testimony, this book shares the in-the-trenches experiences of the life care planner associated with each case. To top it off, readers have access to 10 Curricula Vitae (CV) examples provided by each contributor and a plethora of research references and resources. State law has regulated condos in Jalisco since 1995, and is binding on both the condo administration and all owners. Would it surprise you to learn that many condos don't follow the Jalisco condo laws? This should concern you, because it exposes your condo to potential consequences down the road that could result in financial costs or decreased property values. MANY CONDOS: don't correctly collect condo fees; don't hold proper owners meetings; don't carry out proper votes at these meetings; or don't have a correct administrative structure. WHY DOES THIS PROBLEM EXIST? In most condos in Canada or the US, there's high compliance with provincial and state condo laws. The same does not occur in Mexico - especially amongst condos that are run by foreigners. The administration of these condos is often unaware of the details of the condo legislation - in some cases, the Board is unaware of the very existence of the law. If you're an owner, or if you're part of your condo's administration, you need to know what the law says, and what the proper procedures are. If you're considering buying a condo, you need the knowledge to find out if the condo is being run properly - before you buy into potential trouble. THE PROBLEM . . . The condo legislation is written in Spanish, and there's no high-quality translation designed for use by foreigner-run condo administrations. THE SOLUTION . . . This book contains the complete text of the Jalisco condo law translated into English. It's presented in a unique side-by-side format, with both Spanish and English paragraphs perfectly synchronised. You can always refer to the original Spanish at any time. As well as a high quality translation, there are in-line comments and notes to help clarify certain passages, issues, and legal terms. A few of the topics covered by the condo legislation, and contained in this translation: types of condominiums & how they're created; format of the condo by-laws; definition of common property; rights and duties of owners; repairs, maintenance, and improvement work; duties and authority of Administrator & Council (Board); types of owners meetings and their purpose; voting at each type of meeting - they differ significantly; fees: - their purpose and how they should be assessed - including a requirement for reserves; Late penalties for delinquent owners; disputes between owners; and debt collection & suing a delinquent owner. This book also contains translations of other legislation related to condo management and day-today operation: limitations on collecting debts, income tax & IVA, property auctions, injunctions, powers of attorney & proxies, legal signatures, obligations of neighbours, co-ownership, public registration of documents, legal entities, associations, and sanctions "Fascinating... a regular field manual... meticulously researched and very entertaining." --G. High mountains can be considered as particularly appropriate environments to detect effects of climate change on natural biocoenoses in a global scale for the following reasons: Firstly, ecosystems at the l- temperature limits of plant life are generally thought to be especially sensitive to climate change [1][2][3]. An already ongoing upward shift of vascular plants at high summits in the Alps, determined by the Austrian IGBP-research [4][5][6][7][8], is most likely a response to the atmospheric warming since the 19th century. Secondly, high mountains still comprise the most natural ecosystems in many countries, being largely untouched by human settlements and agricultural influences. Therefore, climatic effects on ecosystems can be studied without masking effects from human land use. Thirdly, high mountain ranges are present in virtually every major zoonobiome of the earth. The research initiative GLORIA aims to establish an urgently needed global monitoring network, by using high mountain ecosystems as sensitive indicators, as required in the "IGBP-Mountain Workplan" [9]. Moreover, a deeper understanding of assemblage mechanisms and assemblage processes in vegetation patterns as a contribution to ecological theory can be expected. This paper gives a short general overview about GLORIA and a first outline about the concept, method, and some few results of the "Multi Summit-Approach", one of the basic intentions within the proposed network. It aims to encourage the involvement of high mountain researchers and research co-ordinators in a detailed discussion of the proposed research activities and in a co-operation within the planned global monitoring network. This book demonstrates through country case studies that, contrary to received wisdom, Latin American militaries can contribute productively, but under select conditions, to non-traditional missions of internal security, disaster relief, and social programs. Latin American soldiers are rarely at war, but have been called upon to perform these missions in both lethal and non-lethal ways. Is this beneficial to their societies or should the armed forces be left in the barracks? As inherently conservative institutions, they are at their best, the author demonstrates, when tasked with missions that draw on pre-existing organizational strengths that can be utilized in appropriate and humane ways. They are at a disadvantage when forced to reinvent themselves. Ultimately, it is governments that must choose whether or not to deploy soldiers, and they should do so, based on a pragmatic assessment of the severity and urgency of the problem, the capacity of the military to effectively respond, and the availability of alternative solutions.
