The Computer Science Success series is based on Windows 10 and Office 2016. This series is specially designed for providing a vast theoretical and practical knowledge of computers to the students. It is the most comprehensive series in which activity and tool-based approach is incorporated. Each chapter in the book begins with an engaging introduction followed by an activity-based approach to learning, which is supported by an ample number of diagrams, pictures, and relevant screenshots. The exercises in each chapter have sufficient practical and activity-based questions. Lots of interesting software like Office 2016 (like Word, Excel, and PowerPoint) and MSWLogo have been taught in these books. Internet is also covered. Core features of the Computer Science Success series (for Classes 3 to 5) are:

- Learning Objectives: Describes the goals required to be achieved by the end of the chapter.
- Chapter Contents: Concepts are explained to strengthen the knowledge base of the students.
- Know More: Gives extra and useful information on the topic being covered.
- Fact: Includes historical facts about the topic being covered.
- Top Tips: Gives a shortcut method of the topic being covered.
- Activity: Encourages the students to explore some real-life use of the topic being covered.
- Summary: Gives a brief summary of the topics being taught in the chapter.
- Exercises: Includes a variety of questions to evaluate the theoretical knowledge of the students.
- Activity Zone: Includes the following activities:
  - !• Puzzle: Includes crosswords or mazes to focus on some important terms included in the chapter.
  - !• Lab Session: Gives instructions to the students to perform various tasks in the lab.
  - !• Group Discussion: Encourages the students to have discussions on various topics.
  - !• Project Work: Assigns various tasks to the students to apply the concepts already learned.
- Teacher's Notes: Gives suggestions to the teachers to make the learning process better.
- Periodic Tests: A total of four periodic tests are included to evaluate the knowledge of the students.
- Model Test Papers: Two Model Test Papers, covering questions from all the chapters are included in the middle and towards the end of the book.
- Project Work: A set of projects has been designed to challenge the students to apply the concepts learned.
- Cyber Olympiad: Gives a sample Cyber Olympiad question paper to test the knowledge of the students.
- Practice Assignments(in a separate booklet): Includes both Practice Assignments and Quizzes, that help the students to understand the topics given in the chapter thoroughly.

CISCE for Annual Examination to be held in February-March, 2023 Access SOLUTIONS of Unsolved Model Test Papers using QR Codes A devastating critique of the American way of education and a hopeful blueprint for change which can unlock the creativity and joy of learning inherent in all students. In this book Nikhil Goyal—a journalist and activist, whom The Washington Post has dubbed a “future education secretary” and Forbes has named to its 30 Under 30 list—both offers a scathing indictment of our teach-to-the-test-while-killing-the-spirit educational assembly line and maps out a path for all of our schools to harness children’s natural aptitude for learning by creating an atmosphere conducive to freedom and creativity. He prescribes an inspiring educational future that is thoroughly democratic and experiential, and one that utilizes the entire community as a classroom. Computer has firmly carved its place in the human society. Computer makes our job easier and has reshaped our imagination. The world of technology and computer systems is continuously evolving and has touched virtually each and every aspect of our lives. The Computer Science Success series is based on Windows 10 and Office 2016. This series is specially designed for providing a vast theoretical and practical knowledge of computers to the students.
