**End-User Development** Dec 23 2022 This book constitutes the proceedings of the 8th International Conference on End-User Development, IS-EUD 2021, held in July 2021. Due to COVID-19 pandemic the conference was held virtually. The paper track received 26 submissions, of which 11 full and 4 short papers were selected after a rigorous double-blind review process. The papers focus on "Democratizing AI development", namely on EUD for AI-based systems, where end users are called-on to become end-user developers of intelligent agents, digital twins, collaborative systems and social robots.

**User-centered Web Development** Apr 15 2022 Frequently, Web sites are designed without considering the needs of the users. As a result, the Web site often fails to fulfill its intended purpose. User-Centered Web Development guides readers through the process of designing Web-based resources based on the needs of the user. This text will take the reader from the initial idea of developing a Web site, through determining the mission of the Web site, collecting the requirements, designing the pages, performing usability testing, and implementing and managing a Web site. Further, large case studies will assist readers in comprehending how these user-centered design concepts can be applied to real-world settings. The author has shown how to implement his design concepts in three case studies spread throughout the book, a non-profit, an educational Web site and Eastman Kodak.

*Have the U.S. Supreme Court's 5th Amendment Takings Decisions Changed Land Use Planning in California?* Jan 12 2022 Proposition 13 reduced the ability of local gov't's. to finance public goods and infrastructure through local taxes. Local gov't's. responded by increasing their reliance on fees and exactions. The constitutional takings clause may represent yet another limitation on the ability of local gov't's. to finance public improvements. In addition, CA's burgeoning population and scenic and natural resources make it fertile ground for the conflicts associated with growth: how should transportation infrastructure and other public services be financed as communities spread outward? How should open space, habitat, and access to recreational resources be preserved and paid for? Tables.

**Domain-driven Design** Sep 20 2022 "Domain-Driven Design" incorporates numerous examples in Java-case studies taken from actual projects that illustrate the application of domain-driven design to real-world software development.

**Health Measurement Scales** Feb 13 2022 A new edition of this practical guide for clinicians who are developing tools to measure subjective states, attitudes, or non-tangible outcomes in their patients, suitable for those who have no knowledge of statistics.

*A Dynamic Cascade Model of the Development of Substance - Use Onset* Dec 11 2021 The book offers an extensive exploration of the childhood factors that can lead to substance abuse. Puts forward a dynamic cascade model of the development of adolescent substance-use onset Model is based on broad sampling of children from prekindergarten through to Grade 12 The results offer practical suggestions for interventions, public policies, and economics of substance-use and future inquiry

**Empowerment** Dec 31 2020 Two-thirds of the population of the world are poor, and their number is growing in the first as well as in the third world, despite billions of dollars of aid. The economic development policies of the last two decades, and the theory which gave rise to them, have been discredited. The rich are disillusioned, apprehensive or uninterested, while the poor are embittered and without hope, the victims and agents of ignorance, instability and environmental degradation. The need for radical rethinking is urgent: this book makes an important contribution towards that end. John Friedmann argues that poverty should be seen not merely in material terms, but as social, political and psychological powerlessness. He presents the case for an alternative development committed to empowering the poor in their own communities, and to mobilizing them for political participation on a wider scale. In contrast to centralized development policies devised and implemented at the national and international level, alternative development restores the initiative to those in need, on the grounds that unless people have an active role in directing their own destinies long-term progress will not be achieved. The author takes the household as the strategic starting-point - stressing its moral, political and economic potential - as a source of continuity and as a location for production. From this basis he propounds a politics of emancipation that would enable the disempowered poor to assert their rights. Empowerment provides a morally-informed theoretical framework for a development policy that meets the needs of its recipients rather than of its makers.

**Land Ownership and Land Use Development** Aug 19 2022 Across Europe, land is constantly the subject of enormous and widely varied pressures. The land we have is shrinking in area due to numerous reasons, including those that are directly related to climate change and migration. In fact all disciplines that have responsibilities for the husbandry use, management, and administration of the land are forced to address the problems of how to plan and how to utilise this increasingly valuable resource. The papers contained within this book emerge from two symposia held in 2014 and 2015, which now have been arranged along four general themes reflecting the multi-disciplinary nature of the disciplines concerned with land. The first part is dedicated to the interpretation of key terms in their context and the dissimilar conceptual approaches in the governance of different states. It is followed by papers that identify the process of decision-taking: how to organize and co-operate. One large section addresses the identification of land pattern changes and the reason for it. The papers in the final cluster deal with the general theme of strategies and measures used to steer future evolution in land policies. The publication addresses various needs that have to be balanced: the tasks of living space in the face of societal and demographic changes, infrastructure supply, challenges of an increasingly urbanised region, food production, 'green energy', natural hazards, habitats and cultural landscapes protection.

**Transforming the Workforce for Children Birth Through Age 8** Oct 29 2020 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

**End-User Development** Jan 24 2023 Work practices and organizational processes vary widely and evolve constantly. The technological infrastructure has to follow, allowing or even supporting these changes. Traditional approaches to software engineering reach their limits whenever the full spectrum of user requirements cannot be anticipated or the frequency of changes makes software reengineering cycles too clumsy to address all the needs of a specific field of application. Moreover, the increasing importance of "infrastructural" aspects, particularly the mutual dependencies between technologies, usages, and domain competencies, calls for a differentiation of roles beyond the classical user--designer dichotomy. End user development (EUD) addresses these issues by offering lightweight, use-time support which allows users to configure, adapt, and evolve their software by themselves. EUD is understood as a set of methods, techniques, and tools that allow users of software systems who are acting as non-professional software developers to 1 create, modify, or extend a software artifact. While programming activities by non-professional actors are an essential focus, EUD also investigates related activities such as collective understanding and sense-making of use problems and solutions, the interaction among end users with regard to the introduction and diffusion of new configurations, or delegation patterns that may also partly involve professional designers.

**New Perspectives in End-User Development** Apr 27 2023 This book provides an in-depth insight into the emerging paradigm of End-User Development (EUD), discussing the diversity and potential for creating effective environments for end users. Containing a unique set of contributions from a number of international researchers and institutes, many relevant issues are discussed and solutions proposed, making important aspects of end-user development research available to a broader audience. Most people are familiar with the basic functionality and interfaces of computers. However, developing new or modified applications that can effectively support users' goals still requires considerable programming expertise that cannot be expected of everyone. One of the fundamental challenges that lie ahead is the development of environments that enable users with little or no programming experience to develop and modify their own applications. The ultimate goal is to empower people to flexibly employ and personalise advanced information and communication technologies.

**Study of the Development, Management, and Use of Water Resources on the Public Lands** Mar 14 2022

*Tourism in National Capitals and Global Change* May 04 2021 At a time of increasing city competition, national capitals are at the forefront of efforts to gain competitive advantage for themselves and their nation, to project a distinctive and positive image and to score well in global city league tables. They are frequently their country's main tourist gateway, and their success in attracting visitors is inextricably linked with that of the nation. They attract not just leisure visitors; they are especially important in other growing tourism markets, for example, as centres of power they feature strongly in business tourism, as academic centres they are important for educational tourism, and they frequently host global events such as the Olympic Games. And there are more of them: first, the number of capitals has grown as the number of nation-states has increased and, secondly, pressures for devolution mean more cities are seeking national capital status, even when they are not at the head of independent states. We need to understand tourism in capitals better - but there has been little research in the past. This book develops new insights as it explores the phenomenon of capital city tourism, and uses recent research to examine the appeal of 'capitalness' to tourists, and explore developments in capitals across the world. This book was published as a special issue of Current Issues in Tourism.

**Modern Web Development** Jul 18 2022 In Modern Web Development, internationally renowned software developer Dino Esposito introduces a pragmatic, problem-driven, and user-focused approach to designing and building dynamic web solutions. Esposito shows experienced developers and solution architects how to drive more value from Microsoft technologies such as ASP.NET 5, MVC, SignalR, Entity Framework,

and Web Forms, by using them in conjunction with other technologies, including Bootstrap, JavaScript, AngularJS, Ajax, JSON, and JQuery.

*Design, User Experience, and Usability. Case Studies in Public and Personal Interactive Systems* Oct 09 2021 This book constitutes the refereed proceedings of the 9th International Conference on Design, User Experience, and Usability, DUXU 2020, held as part of the 22nd International Conference on Human-Computer Interaction, HCII 2020, in Copenhagen, Denmark, in July 2020. The conference was held virtually due to the COVID-19 pandemic. From a total of 6326 submissions, a total of 1439 papers and 238 posters has been accepted for publication in the HCII 2020 proceedings. The 51 papers included in this volume were organized in topical sections on interactions in public, urban and rural contexts; UX design for health and well-being; DUXU for creativity, learning and collaboration; DUXU for culture and tourism.

*Odoo 15 Development Essentials - Fifth Edition* Nov 10 2021 Become a proficient Odoo developer and increase your productivity while building Odoo business applications Key Features: Set up the Odoo development environment and learn how to test and debug your code Use the ORM framework to work with data and implement business logic supporting business rules Design user interfaces, web pages, and business reports using the Odoo framework's web components Book Description: Odoo is fast becoming the reference open source platform for business applications thanks to the fact that it provides the infrastructure needed for developers to deliver software solutions for any business process quickly. Odoo's layered module approach makes it particularly effective for combining and extending features. This updated fifth edition is a tutorial-style introduction to essential Odoo development topics. The book starts by covering the development essentials for building business applications and takes you through Odoo installation and configuration, gradually transitioning from having no specific knowledge of Odoo to being ready for application development. You'll then learn how to develop your first Odoo application, while covering topics such as models and views. Later chapters will get you up to speed with using server APIs to add business logic, helping you lay a solid foundation for advanced topics. As you progress, you'll get equipped to build and customize your applications and explore the new features available in Odoo 12 and beyond, such as in-memory ORM and computed writable fields. Finally, you'll gain insights into building business logic and using the Odoo API to integrate with various applications. By the end of this book, you'll be able to build business apps from scratch using the latest version of Odoo. What You Will Learn: Install Odoo from source and organize the development environment Create your first Odoo app from scratch Understand the application components available in Odoo Structure the application's data model using ORM features Use the ORM API to implement the business logic layer Design a graphical user interface (GUI) for the web client and website Use the Odoo External API to interface with external systems Deploy and maintain your application in production environments Who this book is for: This book is for developers who want to learn Odoo application development and quickly become productive while creating business applications. Teachers, trainers, and Odoo team managers will also find the book useful for helping their students or trainees to learn Odoo development skills. Basic knowledge of Python programming is required to get started with the book

*Human-Centered Software Engineering* Nov 29 2020 This book constitutes the refereed proceedings of the 5th IFIP WG 13.2 International Conference on Human-Centered Software Engineering, HCSE 2014, held in Paderborn, Germany, in September 2014. The 13 full papers and 10 short papers presented together with one keynote were carefully reviewed and selected from 35 submissions. The papers cover various topics such as integration of software engineering and user-centered design; HCI models and model-driven engineering; incorporating guidelines and principles for designing usable products in the development process; usability engineering; methods for user interface design; patterns in HCI and HCSE; software architectures for user interfaces; user interfaces for special environments; representations for design in the development process; working with iterative and agile process models in HCSE; social and organizational aspects in the software development lifecycle; human-centric software development tools; user profiles and mental models; user requirements and design constraints; and user experience and software design.

*General Management Plan, Environmental Assessment* Jul 26 2020

*Version Control with Git* Feb 19 2020 Get up to speed on Git for tracking, branching, merging, and managing code revisions. Through a series of step-by-step tutorials, this practical guide takes you quickly from Git fundamentals to advanced techniques, and provides friendly yet rigorous advice for navigating the many functions of this open source version control system. This thoroughly revised edition also includes tips for manipulating trees, extended coverage of the rebase and stash, and a complete introduction to the GitHub repository. Git lets you manage code development in a virtually endless variety of ways, once you understand how to harness the system's flexibility. This book shows you how. Learn how to use Git for several real-world development scenarios Gain insight into Git's common-use cases, initial tasks, and basic functions Use the system for both centralized and distributed version control Learn how to manage merges, conflicts, patches, and diffs Apply advanced techniques such as rebasing, hooks, and ways to handle submodules Interact with Subversion (SVN) repositories—including SVN to Git conversions Navigate, use, and contribute to open source projects through GitHub

*Refrigeration Engineering* Feb 01 2021 English abstracts from Kholodil'naia tekhnika.

*The Economic Impact of the Adirondack Park Private Land Use and Development Plan* Oct 21 2022 Study of how land use legislation may be affecting the economy of the Adirondack Park.

*End-User Development* Feb 25 2023 This book constitutes the refereed proceedings of the Third International Symposium on End-User Development, IS-EUD 2011, held in Torre Canne, Italy, in June 2011. The 14 long papers and 21 short papers presented were carefully reviewed and selected for inclusion in the book. In addition the volume contains 2 keynote speeches, 14 doctoral consortia, and information on 3 workshops. The contributions are organized in topical sections on mashups, frameworks, users as co-designers, infrastructures, methodologies and guidelines, beyond the desktop, end-user development in the workplace, meta-design, and supporting end-user developers.

*Pratt Institute Monthly* Sep 27 2020

*Compendium of Land Use Laws for Sustainable Development* May 16 2022 Publisher Description

*Integrated Land Use Planning for Sustainable Agriculture and Rural Development* Jun 17 2022 Land represents an important resource for the economic life of a majority of people in the world. The way people handle and use land resources impacts their social and economic well-being as well as the sustained quality of land resources. Land use planning is also integral to water resources development and management for agriculture, industry, drinking water, and power generation. This valuable work brings to the forefront the state of practice of land use planning in India, highlighting governmental programs and research with wide-ranging chapters on important topics. Covering various agro-ecosystem, including irrigated, rainfed, coastal, semi-arid, arid (drylands), and hill and mountain (temperate) regions, this volume discusses a variety of issues related to sustainable agriculture and rural development. Chapters address the following questions: •What are the sources, scales, and quality of land resources and land use data for efficient planning • Which are the agroecological systems hot spots that are have been degraded? How can these areas be rejuvenated in terms of quality? • What should be the unit of planning for a holistic approach for the conservation and efficient use of natural resources at different administrative levels and domains? • What are the roles of state land use boards and district planning committees? • How can various programs be integrated and implemented by central and state agencies? • What are the technologies, new policies, and support systems required to address sustainable land use? • What are the legal issues? • What should be the role of communities in planning for poverty alleviation and integrated planning for sustainable agriculture based livelihoods? • What is the role GIS in sustainable agriculture and rural development? With high population growth, endemic poverty, and weak existing institutional capacity for land management, India (and other regions of the world) require strong scientific and strategically important land use policies and methods for sustainable development. This book helps to show the way. This volume is being published in association with the Centre for Agrarian Studies and Disaster Mitigation of the National Institute of Rural Development and Panchayati Raj (NIRD and PR).

*Data User News* Mar 22 2020

*Desire for Development* Jun 24 2020 Heron draws on post-structuralist notions of subjectivity, critical race and space theory, feminism, colonial and postcolonial studies, and travel writing to trace colonial continuities in the post-development recollections of white Canadian women who have worked in Africa. Following the narrative arc of the development worker story from the decision to go overseas, through the experiences abroad, the return home, and final reflections, the book interweaves theory with the words of the participants. She posits that the desire for development is about the making of self in terms that are highly raced, classed, and gendered. The construction of white female subjectivity is thereby revealed as contingent on notions of goodness and Othering, played out against, and constituted by, the backdrop of the North-South binary, in which Canada's national narrative situates us as the 'good guys' of the world.

*End-User Development* Nov 22 2022 This book constitutes the refereed proceedings of the Fourth International Symposium on End-User Development, IS-EUD 2013, held in Copenhagen, Denmark, in June 2013. The 13 full papers (45% acceptance rate) and 11 short papers (50% acceptance rate) have been presented at the event. In addition the volume contains two keynote speeches, three doctoral consortia papers, and information on 2 workshops. The papers provide a broad overview of the current state of End-User Development research.
