*Americium and Curium Chemistry and Technology* Aug 08 2021 The papers included in this volume were presented at the symposium on "Americium and Curium Chemistry and Technology" at the International Chemical Congress of Pacific Basin Societies in Honolulu, Hawaii, December 16-21, 1984. This symposium commemorated forty years of research on americium and curium. Accordingly, the papers included in this volume begin with historical perspectives on the discovery of americium and curium and the early characterization of their chemical properties, and then cover a wide range of subjects, such as thermodynamic properties, electronic structure, nuclear reactions, analytic chemistry, high pressure phase transitions, and technological aspects. Thus, this volume is a review of the chemistry of americium and curium, and provides a perspective on the current research on these elements forty years after their discovery. The editors would like to thank the participants in this symposium for their contributions. It is a pleasure to acknowledge the assistance of Ms. Barbara Moriguchi in handling the administrative aspects of the symposium and of the production of this volume. April 2, 1985 Norman M. **Statistics and Data Analysis for Financial Engineering** Jan 13 2022 Financial engineers have access to enormous quantities of data but need powerful methods for extracting quantitative information, particularly about volatility and risks. Key features of this textbook are: illustration of concepts with financial markets and economic data, R Labs with real-data exercises, and integration of graphical and analytic methods for modeling and diagnosing modeling errors. Despite some overlap with the author's undergraduate textbook *Statistics and Finance: An Introduction*, this book differs from that earlier volume in several important aspects: it is graduate-level; computations and graphics are done in R; and many advanced topics are covered, for example, multivariate distributions, copulas, Bayesian computations, VaR and expected shortfall, and cointegration. The prerequisites are basic statistics and probability, matrices and linear algebra, and calculus. Some exposure to finance is helpful.

**Shanghai Blue** Mar 03 2021 When Lan comes home to Shanghai after 10 years in Europe she finds the city enigmatic: people she knew from childhood seem odd - her own identity is a mystery. An orphan, she tries to locate her biological parents. Her only clue is cricket fighting - an old Chinese pastime turned gambling racket. The deeper she digs into her own mystery, the more sinister it becomes. With cricket-fight gambling as the leitmotif, Shanghai Blue weaves belonging and estrangement, fatality and choice into a tight plot. When Lan finally unravels the truth, it is more harrowing than she imagined.

**The Abused and the Abuser** May 25 2020 Severe abuse often occurs in settings where the grouping, whether based around a family or a community organisation or institution, outwardly appears to be very respectable. The nature of attachment dynamics allied with threat, discrediting, the manipulation of the victim's dissociative defences, long-term conditioning and the endless invoking of shame mean that sexual, physical and emotional abuse may, in some instances, be essentially unending. Even when separation from the long-term abuser is attempted, it may initially be extremely difficult to achieve, and there are some individuals who never achieve this parting. Even when the abuser is dead, the intrapsychic nature of the enduring attachment experienced by their victim remains complicated and difficult to resolve. This volume includes multiple perspectives from highly experienced clinicians, researchers and writers on the nature of the relationship between the abused and their abuser(s). No less than five of this international grouping of authors have been president of the International Society for the Study of Trauma and Dissociation, the world's oldest international trauma society. This book, which opens with a highly original clinical paper on 'weaponized sex' by Richard Kluff, one of the foremost pioneers of the modern dissociative disorders field, concludes with a gripping historical perspective written by Jeffrey Masson as he reengages with issues that first brought him to worldwide prominence in the 1980s. Between these two pieces, the contributors, all highly acclaimed for their clinical, theoretical or research work, present original, cutting edge work on this complex subject. This book was originally published as a double special issue of the Journal of Trauma and Dissociation.

Alternative Schooling and Student Engagement Sep 28 2020 This book explores the unique phenomenon of public alternative schools in Toronto, Canada and other large urban areas. Although schools of this kind have existed for more than a century, very little has been written about the alternative school movement. These alternatives focus more on child-centered instruction, give many students (and teachers) opportunities to organize the school differently, provide a greater voice for teachers, students, and parents, and engage students far more with experiential learning. When traditional school structures are failing to meet the needs of many children and youth, there is a rapidly growing need for information and

discussion about alternatives that will encourage their talents and serve their needs. This book draws attention to the issue of alternative schooling to help make it more accessible to a wider audience.
