Rival to the Queen Feb 19 2020 From the New York Times bestselling author of *The Last Wife of Henry VIII* comes a novel about the bitter rivalry between Queen Elizabeth I and her fascinating cousin, Lettice Knollys, for the love of one extraordinary man. Powerful, dramatic and full of the rich history that has made Carolly Erickson's novels perennial bestsellers, this is the story of the only woman to ever stand up to the Virgin

Queen— her own cousin, Lettie Knollys. Far more attractive than the queen, Lettie soon won the attention of the handsome and ambitious Robert Dudley, Earl of Leicester, a man so enamored of the queen and determined to share her throne that it was rumored he had murdered his own wife in order to become her royal consort. The enigmatic Elizabeth allowed Dudley into her heart, and relied on his devoted service, but shied away from the personal and political risks of marriage. When Elizabeth discovered that he had married her cousin Lettie in secret, Lettie would pay a terrible price, fighting to keep her husband's love and ultimately losing her beloved son, the Earl of Essex, to the queen's headsman. This is the unforgettable story of two women related by blood, yet destined to clash over one of Tudor England's most charismatic men.

Statehouse Democracy Jun 24 2020 The authors demonstrate that state policies are highly responsive to public opinion through the analysis of state policies from the 1930s to the present.

The Language of the Heart, 1600-1750 Feb 25 2023 Erickson (English, U. of California-Santa Barbara) examines both scientific and romantic portrayals of the human heart in early modern English literature. After reviewing the Biblical heart, he considers William Harvey's model of a phallic pump in a feminized body, Milton's *Paradise Lost*, Richardson's *Clarissa*, Aphra Behn's *Oroonoko* as a women's perspective, and other works. Rubicon Beach Jan 20 2020 A “brilliant” novel about an alternate America that has been split in two (San Francisco Chronicle). In a dystopian Los Angeles, Cale is a newly released political prisoner under surveillance. Beset by dark visions and relegated to working in a desolate library, he’s told, without explanation, that he’s “the one everyone’s looking for.” For Catherine, a mysterious South American beauty, the crossing is no less extreme: Leaving her tribal life, she undergoes various confinements and escapes before winding up at the door of a

Hollywood screenwriter. Finally Jack Mick Lake, possessed by numerology, must negotiate a river all his own. Stark and ethereal, Steve Erickson's tales connect to form a luminous and passionate whole.

The Soul of the Family Tree Jul 26 2020 "Readers may find themselves ordering their own DNA testing kit upon finishing this." —Publishers Weekly "The Soul of the Family Tree posits that a spiritual grounding in one's family history can combat 'historical amnesia' and nurture a sense of belonging."

—Foreword Reviews Growing up in a passionately Norwegian-American Iowa town, Lori Erickson rolled her eyes at traditions like Nordic Fest and steaming pots of rømmegrøt. But like many Americans, she eventually felt drawn to genealogy, the "quintessential hobby of middle age." Her quest to know more about the Vikings and immigrants who perch in her family tree led her to visit Norse settlements and reenactments, medieval villages and modern museums, her picturesque hometown and her ancestor's farm on the fjords. Along the way, Erickson discovers how her soul has been shaped by her ancestors and finds unexpected spiritual guides among the seafaring Vikings and her hardscrabble immigrant forebears. Erickson's far-ranging journeys and spiritual musings show us how researching family history can be a powerful tool for inner growth. Travel with Erickson in *The Soul of the Family Tree* to learn how the spirits of your ancestral past can guide you today.

[Alexandra](#) May 24 2020 Taking advantage of material unavailable until the fall of the Soviet Union, Erickson portrays Alexandra's story as a closely observed, enthrallingly documented, progressive psychological retreat from reality. The lives of the Romanovs were full of color and drama, but the personal life of Alexandra has remained enigmatic. Under Erickson's masterful scrutiny the full dimensions of the Empresses' singular psychology are revealed: her childhood bereavement, her long struggle to attain her romantic goal of marriage to Nicholas, the

anguish of her pathological shyness, her struggles with her in-laws, her false pregnancy, her increasing eccentricities and loss of self as she became more preoccupied with matters of faith, and her increasing dependence on a series of occult mentors, the most notorious of whom was Rasputin. With meticulous care, long practiced skill, and generous imagination, Erickson crafts a character who lives and breathes.

The Geodesic Manifesto Jun 05 2021 Bob Erickson draws on his forty-plus years of software experience to present a vision for software development that goes beyond the Agile movement. The Geodesic Philosophy advocates achieving agility by emphasizing the right kinds of leadership, planning and management control. The book ranges from the role of the software manager to software architecture to development methodologies. Erickson draws on literature, movies, classical architecture and popular culture to help you understand the lessons for great software development. The Geodesic Manifesto is a work of art. When you open the book, you will learn about software. You will be challenged to think about software in new ways. And you will laugh, because laughter helps the mind understand and remember, and because life's too short to always take it seriously.

Thinking Sound Music Jan 24 2023 The composer's music can be typified as "modern" in craft, but American in character. Shere (a composer and critic) examines Erickson's work within both of these contexts and in a way that is accessible to non-musicians. The biography traces the composer's childhood influences; his studies with Austrian modernist Ernst Krenk; his depression and war years; the early teaching career, and his role as a pioneer of experimental music at the San Francisco Conservatory and the University of California, San Diego. A CD of three of Erickson's works is included with the text, and a list of works by title. Annotation copyright by Book News, Inc., Portland, OR

Generals & Potholes May 16 2022 When widower Madison Applewhite, the mayor of a small Texas town, agrees to attend a

meeting at the White House, he can't refuse. But after answering unending questions about his town's social and power structure, Madison still doesn't quite know why he's here in Washington, DC. The meeting's striking hostess Gloria Hernandez, a vague memory from his past, enchants him. Gloria invites Madison and the other officials present to participate in a secret federal project, and when the president, vice president, and speaker of the house personally ask for his support, Madison grasps its magnitude. Returning to Texas knowing little more than when he left, Madison is thrilled to find that Gloria has connected with his daughter, and he begins to wonder—is he ready for a new woman in his life? Despite the meager project details, Madison agrees to move forward with the project, hoping it will boost the local economy. Everything goes well—until conflict-of-interest allegations threaten to bring both the project and his budding relationship with Gloria to a screeching halt. Zeroville Nov 10 2021 The novel that inspired the film starring James Franco and Seth Rogen: “One of a kind . . . a funny, unnervingly surreal page turner” (Newsweek). Named one of the Best Books of the Year by the Washington Post Book World, Newsweek, and the Los Angeles Times Book Review *Zeroville* centers on the story of Vikar, a young architecture student so enthralled with the movies that his friends call him “cinéautistic.” With an intensely religious childhood behind him, and tattoos of Elizabeth Taylor and Montgomery Clift on his head, he arrives in Hollywood—where he’s mistaken for a member of the Manson family and eventually scores a job as a film editor. Vikar discovers the frames of a secret film within the reels of every movie ever made, and sets about splicing them together—a task that takes on frightening theological dimensions. Electrifying and “darkly funny,” *Zeroville* dives into the renegade American cinema of the

1970s and '80s and emerges into an era for which we have no name (Publishers Weekly). "Funny, disturbing, daring . . . dreamlike and sometimes nightmarish." —The New York Times Book Review "Magnificent." —The Believer "[A] writer who has been compared to Vladimir Nabokov, Don DeLillo, and Thomas Pynchon." —Bookmarks Magazine "Erickson is as unique and vital and pure a voice as American fiction has produced."

Arc d'X Nov 29 2020 In a desperate effort to liberate herself, a fourteen-year-old slave—mistress to the man who invented America—finds herself flung into a different time and world Steve Erickson's provocative reimagining of American history, *Arc d'X* begins with the relationship between Thomas Jefferson and Sally Hemings. With "skin . . . too white to be quite black and too black to be quite white," Sally is loved only to the extent that she can be possessed, and finds hope only in the promise that her children's lives will be different from her own. The couple's paradox-riven union echoes through the ages and in an alternate epoch where time plays by other rules. In Aeonopolis, a theocratic city at the foot of a volcano, priests seek to have Sally indicted, and in an emptied-out Berlin, the Wall is being rebuilt. Dizzily imaginative, *Arc d'X* is an unrivaled exploration of "the pursuit of happiness."

Days Between Stations Dec 31 2020 In what the Guardian recently named one of the best literary debuts ever, a love triangle intersects with a lost film masterpiece and weather as turbulent as the heart. Life stories converge and break away in Days Between Stations, Steve Erickson's searing first novel. At the center is the tumultuous union between Jason and Lauren, who fall in love as youths in Kansas, and later relocate to San Francisco. A cyclist training for the Olympics, Jason is often abroad and unfaithful; Lauren, in turn, finds solace in Michel, a nightclub manager trying to reconnect with his past. Michel's

journey leads to *The Death of Marat*, a recovered lost masterwork of silent film directed by his grandfather, whose extraordinary life includes having grown up as an orphaned twin in a Parisian brothel. In a world shaped by sensuality and trauma, where sandstorms invade Los Angeles, the Seine freezes, bike racers vanish in Venice, and relationships are warped by amnesia, geological chaos and personal upheaval each wrenchingly reflect the other.

The Reluctant Savior Mar 14 2022 J. Michael Miller walks the halls of the wealthy and powerful as a successful, respected business and investment advisor. On the surface, he's living the American dream. Soon, a long and expensive divorce changes the lanky Texan's views on life. The corporate world and material trappings he valued suddenly seem shallow and pointless.

Michael needs a change, so he leaves his booming business in the hands of a capable assistant, buys a used recreational vehicle, and sets out to see the land and its people. A series of chance meetings lead Michael to Towson, a small Pacific coast town surrounded by forest. Towson is a town in decline, lacking any major industry and denied its rightful state funding. Michael, with his keen business eye, sees potential all over Towson-in its forests, its now defunct boat works, and its friendly citizens. And he sees potential of a different sort in the town's only medical provider, Marilyn Hodges. As Michael plants seeds of opportunity across Towson, the townsfolk pay attention, starting a dramatic shift in how the town views itself. A masterful gardener of dreams, Michael may just save Towson-and find his own peace.

Introduction to Power Electronics Feb 01 2021 Building on

solid state device and electromagnetic contributions to the series, this text book introduces modern power electronics, that is the application of semiconductor devices to the control and conversion of electrical power. The increased availability of solid state power switches has created a very rapid expansion in applications, from the relatively low power control of domestic equipment, to high power control of industrial processes and very high power control along transmission lines. This text provides a comprehensive introduction to the entire range of devices and examines their applications, assuming only the minimum mathematical and electronic background. It covers a full year's course in power electronics. Numerous exercises, worked examples and self assessments are included to facilitate self study and distance learning.

On the ninety-third floor, Jesse Presley, the stillborn twin of the most famous singer who ever lived, suddenly awakes, driven mad over the hours and days to come by a voice in his head that sounds like his but isn't, and by the memory of a country where he survived in his brother's place..."--back cover.

Fluke Family King Jan 12 2022 The fantasy novel Fluke Family

King is the third installment in the misadventures of Sir Maynerd Fluke Dumsted, knight and Royal National Hero. Lifting her bronze face to the sky, Hebe searched for that spark which would bring her the power she needed, but it was surprisingly close. The whole island seethed in a magical turmoil, rotating like a vortex from the heart of Luloo Land. She witnessed the battle ensuing there through the eyes of the Oracle and realized that Maynerd was losing against impossible odds. The very island was organized against him, suffocating him in smoke and flame while the blackest monster imaginable beat him to the ground at every step. She could feel his agony--see his tears. He would die without her help. Hebe knew immediately what she had to do. She reached into the very power of Luloo Land and employed the winds and the rain to generate the energy she needed to recharge. It was so strong here. She had never felt anything like it before. Even the Demons of the Deep took notice as the black clouds thickened over Luloo Land. Rain pelted the ground in torrents, extinguishing the inferno that threatened the forests, but the energy grew until Hebe called it to her uplifted hands in twin flashes of lightening. The resulting thunder flattened trees to the ground, and the beasts sheltered within them raced to escape.

Uncommon Therapy Oct 09 2021 Milton H. Erickson, M.D. is generally acknowledged to have been the world's leading practitioner of medical hypnosis. His "strategic therapy," using hypnotic techniques with or without actually inducing trance, allows him to get directly to the core of a problem and prescribe a course of action that can lead to rapid recovery. This book provides a comprehensive look at Dr. Erickson's theories in practice, through a series of case studies covering the kinds of problems that are likely to occur at various stages of the human life cycle. The results Dr. Erickson achieves sometimes seem to border on the miraculous, but they are brought about by a finely honed technique used by a wise, intuitive, highly trained psychiatrist-hypnotist whose work is recognized as a major contribution to the field.

In this book, the clinical chapters are organized into sections by defined developmental pathways or gene families, and each section is preceded by a general overview. For each disorder the authors cover the disease-causing genes, the role of these genes in development as elucidated in model organisms, the human mutations that have been identified, and the developmental pathogenesis of the condition. Clinical descriptions, along with discussions of therapy and counseling, are provided. This book will be an invaluable resource for physicians, dentists, and other

MetroGreen Mar 22 2020 In metropolitan areas across the country, you can hear the laments over the loss of green space to new subdivisions and strip malls. But some city residents have taken unprecedented measures to protect their open land, and a growing movement seeks not only to preserve these lands but to link them in green corridors. Many land-use and urban planning professionals, along with landscape architects and environmental advocates, have joined in efforts to preserve natural areas.

MetroGreen answers their call for a deeper exploration of the latest thinking and newest practices in this growing conservation field. In ten case studies of U.S. and Canadian cities paired for comparative analysis-Toronto and Chicago, Calgary and Denver, and Vancouver and Portland among them-Erickson looks closely at the motivations and objectives for connecting open spaces across metropolitan areas. She documents how open-space networks have been successfully created and protected, while also highlighting the critical human and ecological benefits of connectivity. MetroGreen's unique focus on several cities rather than a single urban area offers a perspective on the political, economic, cultural, and environmental conditions that affect open-space planning and the outcomes of its implementation.

The Timeline of Presidential Elections Apr 22 2020

In presidential elections, do voters cast their ballots for the candidates whose platform and positions best match their own? Or is the race for president of the United States come down

largely to who runs the most effective campaign? It's a question those who study elections have been considering for years with no clear resolution. In *The Timeline of Presidential Elections*, Robert S. Erikson and Christopher Wlezien reveal for the first time how both factors come into play. Erikson and Wlezien have amassed data from close to two thousand national polls covering every presidential election from 1952 to 2008, allowing them to see how outcomes take shape over the course of an election year. Polls from the beginning of the year, they show, have virtually no predictive power. By mid-April, when the candidates have been identified and matched in pollsters' trial heats, preferences have come into focus—and predicted the winner in eleven of the fifteen elections. But a similar process of forming favorites takes place in the last six months, during which voters' intentions change only gradually, with particular events—including presidential debates—rarely resulting in dramatic change. Ultimately, Erikson and Wlezien show that it is through campaigns that voters are made aware of—or not made aware of—fundamental factors like candidates' policy positions that determine which ticket will get their votes. In other words, fundamentals matter, but only because of campaigns. Timely and compelling, this book will force us to rethink our assumptions about presidential elections.
