***In a world where being black is linked with all kinds of discriminations, Bernard Clinton Scales, a black American born in Houston, Texas, in 1960, triumphed over these kinds of stereotypes. He is a prodigy who underwent many struggles-from being exploited to becoming a criminal genius to coming out clean. Bernard Clinton Scales was once a poor black slave deprived of his rights because of his skin color, but because he was filled with ambition and persistent to uplift the black community, he ma Chronicles the revolution of women's civil rights throughout the past half century, drawing on oral history and research in a variety of disciplines while celebrating Hillary Clinton's recent presidential campaign. Photo by photo, discover the stories of an iconic American company and the cars they made. Images of America: Chevrolet: 1960-2012 is the second of a two-volume photographic history of Chevrolet, one of the world's best-known automotive brands, symbolized by the bow tie emblem. From 1960 to 2012, the US auto industry and Chevrolet experienced fundamental changes in their products and business plans. In the 50-plus years illustrated here, two basic changes in the marketing of motor vehicles is evident: the rising proportion of trucks among all vehicles sold and the incursion of European and Asian brands into the market. Even though the number of different Chevrolet passenger car models tripled, total car sales for the brand fell. Chevrolet: 1960-2012 relates the year-by-year evolution of the US auto business via what was once the largest-selling make. The turbulence of the 1960s and 1970s spawned a spectrum of activist movements. In spirit and action, events ranged from: gentle to violent; from Tree People to Bloody Sunday; from Community Mental Health to Black Power. This rapid stream of social and political change defined the second half of the 20th century, yet had roots in the first half. The baby boom generation launched many movements. Unlike their Depression/WWII parents, the boomers, a large cohort of unattached, young adults, had no looming familial and social responsibilities. They had the freedom and resources for the consuming task of changing the world. "Wagner's Law" is the first model of public expenditure in the history of public finance. The aim of this article is to assess its empirical evidence in Italy for the period 1960-2008. After a brief introduction, an essential survey of the economic literature on this issue is offered, before evaluating the specifications of "Wagner's Law" due either to Ram or Koop & Poirier. Wagner's original specification is also evaluated. A few notes on the expenditure policy in Italy conclude the paper. Outlines the important social, political, economic, cultural, and technological events that happened in the United States from 1960 to 1969. *period from 1960 to 1965. Wherever we turn these days, we encounter reminders of the sixties. They're invoked in presidential campaigns, American military actions, and outbursts of mass protest. We're bombarded with media-saturated anniversaries of iconic events, from JFK's inauguration (and assassination) to urban riots and Woodstock. But as Edward Morgan suggests, these references offer little more than an endless stream of distracting imagery that has more to do with today's politics and economics than with the reality of yesterday's social movements. In his provocative look at mass media's connection with those turbulent years, Morgan simultaneously seeks to explain what happened in the 1960s and what happened to how we remember it. His comprehensive overview and critical analysis reveal how the mass media have shaped the popular image of a raucous decade in ways that have curtailed its promise of democracy. Morgan's in-depth study of sixties social movements and their depictions in corporate America's print media, film, and television helps to explain why the past still provokes deep emotions—even antagonism—half a century later. He blends history, sociology, political science, media and cultural studies, and critical theory to explain why the 1960s have been so virulently targeted, particularly by critics on the right who blame today's self-indulgent culture on baby boomers and "sixties permissiveness" instead of the real culprits: consumer-driven capitalism and neoliberal politics. Emphasizing the tensions between capitalism and democracy, Morgan investigates the fate of democracy in our media-driven culture, first by examining the ways that the 1960s were represented in the media at the time, then by exploring how popular versions of the sixties have glossed over their more radically democratic qualities in favor of sensationalism and ideological constructions. He reminds us of what really happened—then shows us how the media trivialized and satirized those events, co-opting and commercializing the decade's legacy and, in doing so, robbing it of its more radical, democratic potential. By revisiting this chapter of the past, Morgan shows that it has much to tell us about where we are today and how we got here. Whether you lived through the sixties or only read about them—or only saw Hollywood's version of them in *Forrest Gump*—this book will put their lessons in clearer perspective. This study is the first systematic examination of debate negotiations in presidential election campaigns. Covering the campaigns from 1960 to 1988, it provides comparisons across election cycles and argues that debate negotiations are forms of political rhetoric that target multiple audiences. Christmas celebrations of the past forty years are shown through historical photographs, catalogue pages, and over 530 photographs of artificial and real trees, Christmas ornaments, interior and exterior lights, candy containers, cards, tinsel garlands, and cheerful holiday figurines. Innovations in Christmas ornamentation, lighting, and display are presented -- including artificial trees of the 1960s, country-style ornaments of the 1970s, 1980s chaser lights, and sophisticated 1990s European glass ornaments. Updated values are provided in the captions. With this wonderful book to inspire your search, you can carry the spirit of Christmas with you all year 'round! The first chapter of a comprehensive career survey of the "Andy Warhol of Italy" Mario Schifano (1934-1998) was a Libyan-born Italian painter and collagist of the Postmodern tradition whose work depicted themes of modernization, popular and street culture, activism and politics. This is the first chapter of a four-volume survey of his career, focusing on the 1960s. A carefully researched history of the political achievements of the 1960s including a valuable dateline for activists, journalists and historians.*
