Perceptions of Reality Jan 20 2020 Although we are all living in the same world, we are simultaneously each living in our own separate universe, where each person observes himself as the center of that universe. Each person has a unique conditioning and belief structure that create his perspective in which he views reality. The world then interfaces with each person to create a reality that conforms to his beliefs. A person's conditioning and beliefs affect his attitudes and emotions, which then magnetize certain energies that resonate to his state of being. In this way each individual is creating a separate reality according to his perceptions of truth. What we perceive as reality is only the surface of a much deeper and greater truth. Beyond the apparent world lies the essence of life and a vast kingdom of hidden knowledge. Our conditioning and beliefs bind us to a certain perspective in which we view our reality. Perceptions of Reality show us how we can break free of the bondage of our conditioning that holds us in a life of mediocrity. When we become free from this bondage, we can change our perspective, which in turn, changes our perceptions. From a higher perspective we can see the larger picture of our lives and the world. We will see the circumstances that have created our present reality, and the relationships of events and experiences that were previously beyond our horizons of perception. From this higher perspective we will perceive the world in a new light. It will change before our eyes and interface with us in a new and more positive way. We will be able to take control of our lives, change our destiny and shape a new future. From this higher state of awareness, we will discover the portal to access the abstract mind, which is the mental function of genius and the doorway to revelation. From the perspective of revelation, we will open the doors into the absolute realms, beyond material time and space, and describes the perceptions of God, the soul, the world, and the paths to higher consciousness. Perceptions of Reality will show us how to access the abstract mind and open the doorways into revelation, creating a new reality, full of abundance, harmony and joy.

The Intimacy of Consciousness Exploration and Transpersonal Psychotherapy Apr 03 2021 This volume brings together a group of transpersonal psychotherapists and spiritual teachers to tell of their own very personal and intimate explorations of consciousness. What has the experience of "coming home" meant to them? Has it meant connecting with God, the Divine Feminine, the Cosmos, the Sacred? Has it meant arriving at home in themselves, in their very center, in their essence? Where is home? Is it inside, is it outside, or is it both? All world cultures have stories about this particular place. In addition to describing their own unique quests, the contributors also share how radically such a journey challenged them to face their own vulnerabilities and shadow parts. Various, very different and often startling personal stories are told. Through reading of the very human trials and psycho-spiritual challenges that these nine international teachers have endured on their journeys home, readers will gain insights and greater understanding regarding their own explorations of consciousness. They will realize that the spiritual journey can have many faces and take many paths. The one thing, however, that all authors have in common, is the longing to be fully and wholly oneself.
