Endoscopic Ear Surgery Nov 11 2021 Increasingly used as an adjunctive tool in the diagnosis and management of ear disease, middle ear endoscopy has the potential to decrease patient morbidity, prevent disease recurrence, and reduce costs. Its capacity to uncover hidden anatomy within the small dimensions of the ear has made it essential for functional surgery, allowing surgeons to preserve key anatomic structures such as the cochlea and facial nerve. Now for the first time, the physicians who pioneered this groundbreaking minimally invasive technique review its indications, advantages, disadvantages, and surgical approaches: Written by the foremost leaders in the field, all members of the International Working Group on Endoscopic Ear Surgery Features nearly 1,000 intraoperative endoscopic images filmed with high-definition cameras, plus outstanding line drawings that aid in understanding all concepts Comprehensively covers the field, including chapters on endoscopic and combined endoscopic-microscopic management of cholesteatoma, surgical restoration of middle ear ventilation, myringoplasty, Meniere disease, tympanoplasty and stapes surgery, revision surgery, and much more Demonstrates state-of-the-art endoscopic procedures in 19 instructive videos From the unique anatomy and pathophysiology of the middle ear through diagnosis, surgical indications, procedures, and instrumentation, this book is indispensable for all otolaryngologists and neurotologists. It offers a full picture of the field today, as well as exploring the future possibilities of ear endoscopes alone or in combination with operative microscopes for the most effective treatment of middle ear pathologies.

[Facing Reality](#) Sep 21 2022 Written in collaboration with Cornelius Castoriadis and Grace Lee, James examines the practical process of social revolution in the modern world. Inspired by the October 1956 Hungarian workers' revolution against Stalinist oppression, as well as the wildcat strikes of U.S. workers (against Capital and the union bureaucracies), James and his co-authors looked ahead to the rise of new mass emancipatory movements by African Americans and anti-colonialist/anti-imperialist currents in Africa and Asia. Virtually alone among the radical texts of the time, Facing Reality, first published in 1958 by Marty Glaberman, rejected modern society's mania for conquering nature, and welcomed women's struggles for new relations between the sexes. A true masterpiece, and still one of the finest expositions of workers' self-emancipation around. This new 21st-century edition includes a new introduction by James's longtime friend, John H Bracey, situating the book in its 1950s/60s context, and accentuating its continued relevance in our time.

Gravel Roads Feb 14 2022 The purpose of this manual is to provide clear and helpful information for maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer the questions that arise concerning gravel road maintenance such as: What is enough surface crown? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.

Revolutionizing Aircraft Materials and Processes Mar 15 2022 This book addresses the emerging needs of the aerospace industry by discussing recent developments and future trends of aeronautic materials. It is aimed at advancing existing materials and fostering the ability to develop novel materials with less weight, increased mechanical properties, more functionality, diverse manufacturing methods, and recyclability. The development of novel materials and multifunctional materials has helped to increase efficiency and safety, reduce costs, and decrease the environmental foot print of the aeronautical industry. In this book, integral metallic structures designed by disruptive concepts, including topology optimization and additive manufacturing, are highlighted.

Remaking a Garden- The Laskett Transformed Sep 28 2020 The garden at the Laskett in Herefordshire is always described as the largest formal garden laid out in Britain since the war and one of most important and interesting gardens of the second half of the twentieth century. It was made by Roy Strong and his wife, theatre designer Julia Trevelyan Oman, between 1973 and 2003. In the latter year Roy's book about the garden and how it was made (The Laskett: the story of a garden) was published, Julia died, and Roy started to remake the garden. Remaking a Garden: the Laskett Gardens Transformed is the story of that remaking, told by Roy, with photographs by Clive Bournell, who has photographed the whole process from the beginning.

Programming for TV, Radio & The Internet Jul 19 2022 Where do program ideas come from? How are concepts developed into saleable productions? Who do you talk to about getting a show produced? How do you schedule shows on the lineup? What do you do if a series is in trouble? The answers to these questions, and many more, can be found in this comprehensive, in-depth look at the roles and responsibilities of the electronic media programmer. Topics include: Network relationships with affiliates, the expanded market of syndication, sources of programming for stations and networks, research and its role in programming decisions, fundamental appeals to an audience and what qualities are tied to success, outside forces that influence programming, strategies for launching new programs or saving old ones. Includes real-life examples taken from the authors' experiences, and 250+ illustrations!
