Like many of us, Toni Terry has tried out every fitness and diet fad going. From gym memberships to detoxes, her characteristic determination got her through the punishing workouts and regimes. And yet, after a month or a year, she always got bored; something was missing and she wasn't quite achieving the results she'd hoped for. What changed and turned her into the social media phenomenon she is today was a whole new approach to fitness and eating well. And what was the magic ingredient? People. Feeling intimidated at the thought of working out on her own with a personal trainer, she hit on the idea of asking her friends to join her. As soon as she started exercising with friends and family, Toni not only started enjoying herself, she also grew more motivated, got the body she always wanted, and felt healthier and happier than ever before. The Buddy Workout will chronicle Toni's journey from her battle with a serious back condition as a teenager, to busy family life with world-class footballer John Terry and her passion for fitness and maintaining a healthy lifestyle. Toni's easy-to-follow fitness programme includes workouts she does on a regular basis with her trainer Bradley Simmonds, and she'll also provide ideas for 5-minute workouts you can build into your busy life, top tips for keeping motivated and looking your best, as well as delicious and nutritious recipes you can share with family and friends. To address the absence of the exploration of the unconscious experience of privilege within counselling and psychotherapy, the book not only presents an exploration of intersectional difference, but also discusses the deeper unconscious understanding of difference, and how privilege plays a role in the construction of otherness. It does so by utilising material from both within the world of psychotherapy, and from the fields of post-colonial theory, feminist discourse, and other theoretical areas of relevance. The book also offers an exploration and understanding of intersectionality and how this impacts upon our conscious and unconscious

exploration of privilege and otherness. With theoretically underpinned, and inherently practical psychotherapeutic case studies, this book will serve as a guidebook for counsellors and psychotherapists. This book offers a step-by-step, practical guide to running a complete career coaching programme: assessing the present; looking at motivation, skills and 'personal brand'; writing the most powerful CV/résumé; getting through a job interview or assessment centre successfully; and negotiating terms for a new job. Career coaching has never been needed more now that jobs for life have disappeared, being made redundant is common, the 'gig economy' is here to stay, and young people often must start in unpaid roles. The principles of career coaching are much the same whether you are a professional executive coach or a volunteer working for a charity whose aim is to get people back into work. But how do you do it most effectively? The focus must be on the whole career coaching cycle and building a holistic understanding of how a client's personal and professional life has influenced the person they are today, who they want to be, and how to set successful goals. Economic and political reforms and globalization in the developing world have led to the emergence of companies that are expanding beyond their national borders into the international arena. The transformation into multinational corporations is generally not accompanied by a change in the way they manage their talent. There is a disconnect between globalization and talent management. Yet the most effective and sustainable source of competitive advantage is talent. Talent Management in the Developing World explores how the policies, systems and procedures that have been successful within national boundaries are inadequate to meet the value propositions of completely different and diverse people working in different countries, cultures, legal and socio-economic environments. In fact they may be dysfunctional to talent management. Using the perspective of the developing world, Dr Elegbe outlines the shift in paradigm and practice that is required if organizations are to develop a sustainable talent management strategy in these countries. A
