Rahu & Kethu Jun 24 2020 Astronomically, the intersection points of the sun and moon – on their movements in the celestial sphere – are called Rahu and Kethu. They are also called the north node and south node. Rahu and Kethu are unimaginably huge dark shadows in space. During their transit, when their shadow falls on any planet, that planet's all-effects will be completely altered or diverted by Rahu and Kethu. Rahu and Kethu are solely responsible for a beggar to become a millionaire and a millionaire to become a beggar. This book elaborately discusses the effects of Rahu and Kethu. In the horoscope, how Rahu and Kethu are positioned, how the planets and the houses (Bhavas) are affected by them in the birth chart are all analysed in this book. How and when the natives will be affected? To what extent they will be affected? It is because of the birth chart, the transit movement and the Dhasa Bhukthi of Rahu and Kethu? They are all clearly explained in this book with many birth charts. Kindly read this book thoroughly, analyse it with your known people's horoscope, and experience the result. It will surely give you goosebumps!

Time to Travel Again in Space Nov 29 2020 It's been 225 years since the survivors of the extinction-level ice age that occurred on Earth-I have been brought to Earth-II. The six individuals who brought the survivors on Earth-II have been living on Earth-II with the descendants of the original settlers from the past twenty-five years. However, these six individuals are now becoming restless and want to go into space again. Even though they all are in their seventies, their life expectancies are such that they could live another fifty years. They increased the size of the spaceship they used to bring the survivors to Earth-II so they can increase the number of individuals who can travel with them. They leave Earth-II to revisit some of the planets they had visited previously as well as the edge of the known universe. They find life on several planets all of which has the same generic materials as humans. This book continues the adventure the space travelers have and the knowledge they obtain from traveling through space.

Junkyard Planet Apr 27 2023 When you drop your Diet Coke can or yesterday's newspaper in the recycling bin, where does it go? Probably halfway around the world, to people and places that clean up what you don't want and turn it into something you can't wait to buy. In *Junkyard Planet*, Adam Minter--veteran journalist and son of an American junkyard owner--travels deep into a vast, often hidden, five-hundred-billion-dollar industry that's transforming our economy and environment. With unmatched access to and insight on the waste industry, and the explanatory gifts and an eye for detail worthy of a John McPhee or a William Langewiesche, Minter traces the export of America's junk and the massive profits that China and other rising nations earn from it. What emerges is an engaging, colorful, and sometimes troubling tale of how the way we consume and discard stuff fuels a world that recognizes value where Americans don't. *Junkyard Planet* reveals that Americans might need to learn a smarter way to take out the trash.

SUMMARY - Junkyard Planet: Travels In The Billion-Dollar Trash Trade By

Adam Minter Mar 26 2023 * Our summary is short, simple and pragmatic. It allows you to have the essential ideas of a big book in less than 30 minutes. By reading this summary, you will learn more about the global waste recycling economy, particularly in China and the United States. You will also learn that : Houston has the lowest waste recycling rate in the United States; San Francisco has the highest waste recycling rate in the United States; China produces more waste than the United States; Per capita waste generation is four to five times higher in the United States than in China; Slums around the world are the largest recycling plants; The key U.S. concept in waste generation is "municipal solid waste". Adam Minter's book scans a little-known sector of the global economy: that of waste recycling, which represents an annual turnover of \$500 billion. He explains in detail how the scraps of our affluent society become real nuggets in the hands of all those involved in a long chain of stakeholders, from the beggar in the American megacities to the immigrant from rural China stranded in Shanghai or Beijing. *Buy now the summary of this book for the modest price of a cup of coffee!
