Managing Business in a Multi-channel World Jan 20 2020 This book addresses the concerns of existing companies who wish to succeed in the new multi-channel environment as it develops and becomes commonplace.

Mutant p53 in Cancer Progression and Personalized Therapeutic Treatments Dec 11 2021

Personalized Computational Hemodynamics Sep 20 2022 Personalized Computational Hemodynamics: Models, Methods, and Applications for Vascular Surgery and Antitumor Therapy offers practices and advances surrounding the multiscale modeling of hemodynamics and their personalization with conventional clinical data. Focusing on three physiological disciplines, readers will learn how to derive a suitable mathematical model and personalize its parameters to account for pathologies and diseases. Written by leading experts, this book mirrors the top trends in mathematical modeling with clinical applications. In addition, the book features the major results of the "Research group in simulation of blood flow and vascular pathologies" at the Institute of Numerical Mathematics of the Russian Academy of Sciences. Two important features distinguish this book from other monographs on numerical methods for biomedical applications. First, the variety of medical disciplines targeted by the mathematical modeling and computer simulations, including cardiology, vascular neurology and oncology. Second, for all mathematical models, the authors consider extensions and parameter tuning that account for vascular pathologies. Examines a variety of medical disciplines targeted by mathematical modeling and computer simulation Discusses how the results of numerical simulations are used to support clinical decision-making Covers hemodynamics relating to various subject areas, including vascular surgery and oncological tumor treatments

Personalized Law Apr 27 2023 We live in a world of one-size-fits-all law. People are different, but the laws that govern them are uniform. "Personalized Law"---rules that vary person by person---will change that. Here is a vision of a brave new world, where each person is bound by their own personally-tailored law. "Reasonable person" standards would be replaced by a multitude of personalized commands, each individual with their own "reasonable you" rule. Skilled doctors would be held to higher standards of care, the most vulnerable consumers and employees would receive stronger protections, age restrictions for driving or for the consumption of alcohol would vary according the recklessness risk that each person poses, and borrowers would be entitled to personalized loan disclosures tailored to their unique needs and delivered in a format fitting their mental capacity. The data and algorithms to administer personalize law are at our doorstep, and embryos of this regime are sprouting. Should we welcome this transformation of the law? Does personalized law harbor a utopic promise, or would it produce alienation, demoralization, and discrimination? This book is the first to explore personalized law, offering a vision of law and robotics that delegates to machines those tasks humans are least able to perform well. It inquires how personalized law can be designed to deliver precision and justice and what pitfalls the regime would have to prudently avoid. In this book, Omri Ben-Shahar and Ariel Porat not only present this concept in a clear, easily accessible way, but they offer specific examples of how personalized law may be implemented across a variety of real-life applications.

Exploring the Potential of PSMA-PET Imaging on Personalized Prostate Cancer Treatment Sep 08 2021

Infant Gender Selection & Personalized Medicine Apr 03 2021 Personalized medicine is what this book is about-tailoring your lifestyle, food, medicines, treatments, and reproductive choices to your genetic signature. According to Dr. Andrew Y. Silverman, MD, PhD, "The desire to influence the sex of the next child is probably as old as recorded history." "Gender selection is possible because of

the way in which sex is determined by our chromosomes. Dr. Ericsson devised patented methods by which X and Y sperm can be separated through filtering processes. Sperm are "layered" over a column of human serum albumin, and they swim down the gradient where they are collected in the bottom layer. "The fraction of sperm that contains the male (Y) bearing sperm is used for insemination if a boy is desired. It is effective 70-75% of the time. "The fraction of sperm that contains the female (X) bearing sperm is used for insemination if a girl is desired. It is effective 70-72% of the time." Use personalized medicine more effectively. Empower consumers by interpreting DNA testing and learning more about infant gender choice by genetics.

Translational Bioinformatics and Systems Biology Methods for Personalized Medicine Mar 22 2020 Translational Bioinformatics and Systems Biology Methods for Personalized Medicine introduces integrative approaches in translational bioinformatics and systems biology to support the practice of personalized, precision, predictive, preventive, and participatory medicine. Through the description of important cutting-edge technologies in bioinformatics and systems biology, readers may gain an essential understanding of state-of-the-art methodologies. The book discusses topics such as the challenges and tasks in translational bioinformatics; pharmacogenomics, systems biology, and personalized medicine; and the applicability of translational bioinformatics for biomarker discovery, epigenomics, and molecular dynamics. It also discusses data integration and mining, immunoinformatics, and neuroinformatics. With broad coverage of both basic scientific and clinical applications, this book is suitable for a wide range of readers who may not be scientists but who are also interested in the practice of personalized medicine. Introduces integrative approaches in translational bioinformatics and systems biology to support the practice of personalized, precision, predictive, preventive, and participatory medicine Presents a problem-solving oriented methodology to deal with practical problems in various applications Covers both basic scientific and clinical applications in order to enhance the collaboration between researchers and clinicians Brings integrative and multidisciplinary approaches to bridge the gaps among various knowledge domains in the field

Genomic and Personalized Medicine May 24 2020 Genomic and Personalized Medicine, Second Edition - winner of a 2013 Highly Commended BMA Medical Book Award for Medicine - is a major discussion of the structure, history, and applications of the field, as it emerges from the campus and lab into clinical action. As with the first edition, leading experts review the development of the new science, the current opportunities for genome-based analysis in healthcare, and the potential of genomic medicine in future healthcare. The inclusion of the latest information on diagnostic testing, population screening, disease susceptibility, and pharmacogenomics makes this work an ideal companion for the many stakeholders of genomic and personalized medicine. With advancing knowledge of the genome across and outside protein-coding regions of DNA, new comprehension of genomic variation and frequencies across populations, the elucidation of advanced strategic approaches to genomic study, and above all in the elaboration of next-generation sequencing, genomic medicine has begun to achieve the much-vaunted transformative health outcomes of the Human Genome Project, almost a decade after its official completion in April 2003. Highly Commended 2013 BMA Medical Book Award for Medicine More than 100 chapters, from leading researchers, review the many impacts of genomic discoveries in clinical action, including 63 chapters

new to this edition Discusses state-of-the-art genome technologies, including population screening, novel diagnostics, and gene-based therapeutics Wide and inclusive discussion encompasses the formidable ethical, legal, regulatory and social challenges related to the evolving practice of genomic medicine Clearly and beautifully illustrated with 280 color figures, and many thousands of references for further reading and deeper analysis

Lifetime Physical Fitness and Wellness: A Personalized Program Jul 18 2022 LIFETIME PHYSICAL FITNESS AND

WELLNESS can help you take control of your personal fitness and wellness by providing current, practical information and tools to make positive choices for your health. The authors encourage you to assess your current behaviors in order to apply the practical steps you learn in the text to start positive behavior changes. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Electrical and Structural Remodelling in Atrial Fibrillation: Phenotypes for Personalized Therapy Nov 10 2021

Contemporary Research in E-marketing Feb 19 2020 Annotation E-marketing is intrinsically interdisciplinary with academic researchers in many fields conducting research in the area. This book brings the work being conducted in many disciplines to one outlet, encouraging cross-fertilisation of ideas and greater dissemination of key research concepts.

Personalized Medicine for Urological Cancers: Targeting Cancer Metabolism Feb 13 2022

Information Technology Integration for Socio-Economic Development Aug 27 2020 As the developed world continues to become more digitized, lesser developed areas are starting to see more technological advancements being integrated into their society. These advancements are creating opportunities to improve both the economy and the lives of people within these areas. Information Technology Integration for Socio-Economic Development features theoretical concepts and best practices in the implementation of new technologies within developing areas around the world. Highlighting empirical research on the application of information technologies to bridge the digital divide within different countries, the book is ideally suited for technology developers, managers, and policy makers.

Personalized Nutrition Jan 24 2023

Functional Bakery Products: Novel Ingredients and Processing Technology for Personalized Nutrition Feb 01 2021 Advances in Food and Nutrition Research, Volume 99 highlights new advances in the field, with this updated volume presenting interesting chapters on a variety of topics, including Personalizing bakery products using 3D food printing, Dietary fiber in bakery products: source, processing, and function, The realm of plant proteins with focus on their application in developing new bakery products, Guiding the formulation of baked goods for the elderly population through food oral processing: challenges and opportunities, Gluten free bakery products: Ingredients and processes, Enhancing health benefits of bakery products using phytochemicals, Sugar, salt and fat reduction of bakery products, and more. Provides the authority and expertise of leading contributors from an international board of authors Presents the latest release in the Advances in Food and Nutrition Research series Includes the latest information on Functional

Bakery Products

Advances in AI-Based Tools for Personalized Cancer Diagnosis, Prognosis and Treatment Oct 21 2022

Personalized Radiation Therapy: Guided with Imaging Technologies Mar 02 2021

Computational Genomics and Structural Bioinformatics in Personalized Medicines Jan 12 2022

Personalized Cancer Chemotherapy Jul 26 2020 *Personalized Cancer Chemotherapy* separately describes and addresses "individualized cancer chemotherapy" (ICC) strategies new and old, to provide readers with new insights into their characteristics and techniques, as well as key debates and future trends in this area. The book devotes chapters to drug sensitivity testing, cancer biomarkers and bioinformatics detection, pharmacogenetics, individualized antimetastatic therapy, drug combinations, assistant chemotherapy, and cost-effectiveness considerations. A major obstacle to controlling cancer growth and metastases in patients is the inappropriate use of anticancer and antimetastatic drugs. Researchers and clinicians are now beginning to focus on ICC also called "personalized cancer chemotherapy" (PCC), to improve therapeutic quality and outcomes by selecting and prescribing the most appropriate and effective drugs. Using genetic, molecular, and bioinformatics data and modern experimental techniques, known tumor genes can be detected more easily than ever before; the average speed of genetic sequencing has increased 15,000 to 50,000 times since the Human Genome Project was completed. This book will help readers understand the pros and cons of each individualized cancer chemotherapy strategy from different angles so as to make good judgments and predictions of drug responses and clinical outcomes. Explores the central components of cancer treatment Investigates new developments in cancer treatment Discusses the many strategies of individualized cancer chemotherapy

Personalized Sport and Exercise Nutrition Jun 05 2021 Personalization is a key term when talking about the future of all medical disciplines, including nutrition, and more specifically sport nutrition. The prospect of better tailored and more effective sport nutrition sounds appealing, but the research in personalized sport nutrition is somewhat lacking. Emerging evidence indicates that sport nutrition supplements and strategies may work in some individuals or under certain conditions, yet not in others. Research on novel ergogenic (= performance-enhancing) dietary approaches is often inconclusive because we fail to understand the environmental and genetic factors impacting the inter-individual responses to their intake and metabolism. These scientific hurdles need to be cleared before we can move to genetic or other screening tests to tailor sport supplement and macro- and micronutrient intake advice. This Research Topic provided a platform for original data and reviews on novel strategies for personalized sport and exercise nutrition, resulting in a diverse selection of published articles in the area.

Computational Intelligence in Personalized Medicine Dec 23 2022

Mass Customization for Personalized Communication Environments: Integrating Human Factors Nov 29 2020 "This book focuses on the customization of services and communication environments to advance user satisfaction--Provided by publisher.

Adoption and Implementation of AI in Customer Relationship Management Jun 24 2020 Integration of artificial intelligence (AI) into

customer relationship management (CRM) automates the sales, marketing, and services in organizations. An AI-powered CRM is capable of learning from past decisions and historical patterns to score the best leads for sales. AI will also be able to predict future customer behavior. These tactics lead to better and more effective marketing strategies and increases the scope of customer services, which allow businesses to build healthier relationships with their consumer base. *Adoption and Implementation of AI in Customer Relationship Management* is a critical reference source that informs readers about the transformations that AI-powered CRM can bring to organizations in order to build better services that create more productive relationships. This book uses the experience of past decisions and historical patterns to discuss the ways in which AI and CRM lead to better analytics and better decisions. Discussing topics such as personalization, quality of services, and CRM in the context of diverse industries, this book is an important resource for marketers, brand managers, IT specialists, sales specialists, managers, students, researchers, professors, academicians, and stakeholders.

Personalized Immunotherapy for Tumor Diseases and Beyond May 16 2022 This book introduces personalized immunotherapy with multi-dimensional models of analysis to determine the best plan for immunotherapy of patients. The book introduces readers to some basic concepts which lay the foundation for personalized immunotherapy: the development of a major histocompatibility complex (MHC), the genome profile of T cells and tumor cells, and genome-wide association studies. Chapters also cover special topics such as new immunoassay methods related to personalized immunotherapy and targeted immunotherapy which are geared towards familiarizing readers with current research practices. Focusing on the central theme of personalized immunotherapy, the authors provide a wealth of information about T-cell screening, tumor neoantigen cloning, primary tumor cell culture for T-cell cloning, bioinformatics strategies for understanding T-cell and primary tumor cell biology and function, and new developments in research on adoptive T-cell immunotherapy. These developments include T-cell gene therapy and T-cell gene editing, transgenic T-cells for increasing affinity to tumor cells such as CAR T-cells and TCR T-cells, and the systematic modeling of polyclonal specific T-cells and biobank technology. Key Features: - Introduces readers to basic concepts in personalized medicine and immunotherapy - Presents current information about immunological assays used in research - Presents an overview of T cell immunotherapy and cloning techniques - Presents an overview of tumor cell bioinformatics and its role in immunotherapy - Includes new developments and references for personalized immunotherapy techniques (T-cell gene therapy and T-cell gene editing, transgenic T-cells which target CAR T-cells and TCR T-cells, and polyclonal T-cell modeling) - Includes a section on biobanking - Presents information in an easy-to-read format for a wide range of readers - Brings contributions from experts with over 30 years of experience in personalized immunotherapy *Personalized Immunotherapy for Tumor Diseases and Beyond* is an ideal handbook for medical professionals and students involved in personalized medicine, immunology and oncology. General readers interested in the new developments in these fields will also benefit from the information provided.

Personalized Precision Medicine in Autism Spectrum Related Disorders Nov 22 2022

Personalized Digital Health and Patient-centric Services Aug 19 2022

Advances in Cancer Nanotheranostics for Experimental and Personalized Medicine Apr 15 2022 Nanotheranostics is a recent medical field which integrates diagnostic imaging protocols and therapeutic functions to monitor real time drug release in the body and distribution to the target site. The combined processes allow technicians to observe the effectiveness of a specifically designed drug candidate and predict its possible side effects. All these features help clinicians in optimizing treatment options for cancer and other diseases for the individual patient. Current research is tailored to individual therapy because each drug may display a variety of responses depending on variations in an individual's genetics and subsequently, their clinical biochemistry. Many tumors are still challenging for therapists in terms of available treatment and nanotheranostic strategies may help them to combat cancer more efficiently. *Advances in Cancer Nanotheranostics for Experimental and Personalized Medicine* presents information about current theranostic technologies in use at clinics and recent research on nanotheranostic applications, with a focus on cancer treatment. Information is presented in seven organized chapters that cover the basics of cancer nanotheranostics, tumor microenvironmental factors, gene therapy and gene delivery concepts, and the combined application of diagnostic imaging with cancer chemotherapy. A chapter focusing on the role of non-coding MRNAs in breast cancer carcinogenesis is also included, giving readers a glimpse of the complexities in the molecular biology of cancer which drive the need for new theranostic technologies. The book is of interest to medical professionals (including oncologists and specialists in internal medicine), diagnostic imaging technicians, and researchers in the fields of pharmacology, molecular biology and nuclear medicine.

Learning Personalized Oct 29 2020 A real-world action plan for educators to create personalized learning experiences *Learning Personalized: The Evolution of the Contemporary Classroom* provides teachers, administrators, and educational leaders with a clear and practical guide to personalized learning. Written by respected teachers and leading educational consultants Allison Zmuda, Greg Curtis, and Diane Ullman, this comprehensive resource explores what personalized learning looks like, how it changes the roles and responsibilities of every stakeholder, and why it inspires innovation. The authors explain that, in order to create highly effective personalized learning experiences, a new instructional design is required that is based loosely on the traditional model of apprenticeship: learning by doing. *Learning Personalized* challenges educators to rethink the fundamental principles of schooling that honors students' natural willingness to play, problem solve, fail, re-imagine, and share. This groundbreaking resource: Explores the elements of personalized learning and offers a framework to achieve it Provides a roadmap for enrolling relevant stakeholders to create a personalized learning vision and reimagine new roles and responsibilities Addresses needs and provides guidance specific to the job descriptions of various types of educators, administrators, and other staff This invaluable educational resource explores a simple framework for personalized learning: co-creation, feedback, sharing, and learning that is as powerful for a teacher to re-examine classroom practice as it is for a curriculum director to reexamine the structure of courses.

Information Hiding Jun 17 2022 This book constitutes the thoroughly refereed post-proceedings of the 4th International Information

Hiding Workshop, IHW 2001, held in Pittsburgh, PA, USA, in April 2001. The 29 revised full papers presented were carefully selected during two rounds of reviewing and revision. All current issues in information hiding are addressed including watermarking and fingerprinting of digital audio, still image and video; anonymous communications; steganography and subliminal channels; covert channels; and database inference channels.

Nuclear Medicine in the Context of Personalized Medicine Feb 25 2023

Article Collection on Human Aspects in Adaptive and Personalized Interactive Environments (HAAPIE) Oct 09 2021

Web Mining Dec 19 2019 Web Mining is moving the World Wide Web toward a more useful environment in which users can quickly and easily find the information they need. Web Mining uses document content, hyperlink structure, and usage statistics to assist users in meeting their needed information. This book provides a record of current research and practical applications in Web searching. It includes techniques that will improve the utilization of the Web by the design of Web sites, as well as the design and application of search agents. This book presents research and related applications in a manner that encourages additional work toward improving the reduction of information overflow, which is so common today in Web search results.

Pete the Cat and His Magic Sunglasses Mar 26 2023 From the bestselling Pete the Cat series, Pete's magic sunglasses help him turn his mood from grumpy to awesome! Pete the Cat wakes up feeling grumpy—nothing seems to be going his way. But with the help of some magic sunglasses, Pete learns that a good mood has been inside him all along. Fans of Pete the Cat will love watching him take his positive outlook and transform a grumpy day into an awesome day! The fun never stops—download the free groovin' song. Time for magic fun in the sun! Don't miss Pete's other adventures, including Pete the Cat: I Love My White Shoes, Pete the Cat: Rocking in My School Shoes, Pete the Cat and His Four Groovy Buttons, Pete the Cat Saves Christmas, Pete the Cat and the Bedtime Blues, Pete the Cat and the New Guy, Pete the Cat and the Cool Cat Boogie, Pete the Cat and the Missing Cupcakes, Pete the Cat and the Perfect Pizza Party, and Pete the Cat: Crayons Rock!

Personalized Medicine and Neurosurgery Aug 07 2021 The Precision Medicine Initiative, which was instituted by President Barack Obama on January 20, 2015, highlighted the importance that advances in genomics and related “-omic” approaches have made to science and medicine, and it set the stage for their federally funded and mandated integration into the delivery of health care. Whether these advances comprise large-scale approaches, such as The Cancer Genome Atlas, which provides a modern classification of cancers based on molecular profiles, or genealogy initiatives, which seek to trace the movement of our early ancestors out of Africa, genomic technology has taken us closer to developing targeted therapies and a refined understanding of our evolutionary journey. It is against this backdrop that we summarized some of the recent advances in the field of precision medicine, or personalized medicine, as they pertain to neurosurgery. In this e-Book collection provided by *Frontiers in Surgery: Neurosurgery*, we present a collection of articles by leaders in the field of neurosurgery that highlight domains using a personalized approach for the treatment of patients or avenues when personalization is possible and when it will likely alter the care of patients with neurological diseases.

Teacher-Student Relationships: Toward Personalized Education Sep 27 2020 Explore the complexity of teacher-student relationships in secondary school settings and learn how these largely unscripted relationships function for students and teachers in their learning and socioemotional development. For teachers, the relationships provide a foundation for pedagogical and curricular endeavors and lead to their increased investment in students' growth, development, and academic success. Students who have such relationships feel more comfortable in their learning environments, interested in the material, and motivated to perform well. We discuss what these relationships look like from the perspectives of teacher and student. Topics include: Drawing appropriate boundaries School-provided guidelines and guidance Formats for supporting teachers A whole school approach to working on students' emotional challenges Relationships in after-school programs. The voices of teachers and students in this volume show how much young people want to feel known and engage with teachers and how much teachers feel rewarded and invigorated by taking the step to connect with students on this level. This is the 137th volume of *New Directions for Youth Development*, the Jossey-Bass quarterly report series dedicated to bringing together everyone concerned with helping young people, including scholars, practitioners, and people from different disciplines and professions.

Advanced Topics in Electronic Commerce, Volume 1 May 04 2021 "This book provides comprehensive coverage and understanding of the social, cultural, organizational, and cognitive impacts of e-commerce technologies and advances on organizations around the world"--Provided by publisher.

Copyright Law in an Age of Limitations and Exceptions Apr 22 2020 In this book, leading scholars analyze the important role played by copyright exceptions in economic and cultural productivity.

Personalized Psychiatry Mar 14 2022 Personalized Psychiatry presents the first book to explore this novel field of biological psychiatry that covers both basic science research and its translational applications. The book conceptualizes personalized psychiatry and provides state-of-the-art knowledge on biological and neuroscience methodologies, all while integrating clinical phenomenology relevant to personalized psychiatry and discussing important principles and potential models. It is essential reading for advanced students and neuroscience and psychiatry researchers who are investigating the prevention and treatment of mental disorders. Combines neurobiology with basic science methodologies in genomics, epigenomics and transcriptomics Demonstrates how the statistical modeling of interacting biological and clinical information could transform the future of psychiatry Addresses fundamental questions and requirements for personalized psychiatry from a basic research and translational perspective

Just One You! Jul 06 2021 There is nobody else in the whole world just like you Elmo, Big Bird, and all the rest of the Sesame Street friends are here to tell you just how special you truly are

Personalized Machine Learning Dec 31 2020 Every day we interact with machine learning systems offering individualized predictions for our entertainment, social connections, purchases, or health. These involve several modalities of data, from sequences of clicks to text, images, and social interactions. This book introduces common principles and methods that underpin the design of

personalized predictive models for a variety of settings and modalities. The book begins by revising 'traditional' machine learning models, focusing on adapting them to settings involving user data, then presents techniques based on advanced principles such as matrix factorization, deep learning, and generative modeling, and concludes with a detailed study of the consequences and risks of deploying personalized predictive systems. A series of case studies in domains ranging from e-commerce to health plus hands-on projects and code examples will give readers understanding and experience with large-scale real-world datasets and the ability to design models and systems for a wide range of applications.
