[Anna May Wong](#) Nov 29 2020 Anna May Wong, born in Los Angeles in 1905 to a traditional family that did not support her ambition, is the only Asian-American actress to have achieved stardom during Hollywood's Golden Age. In her youth she went to hundreds of motion pictures and studied the actors. She remained single to avoid a conventional Chinese marriage that could endanger her career. With her beauty and grace, she gradually became the darling of the intelligentsia, inspiring poems, songs, and crowds of admirers in the British Isles, Europe, and China. During World War II, she toured the United States, New Zealand, and Australia for the benefit of the Chinese war relief. Leaving a legacy of some 60 film appearances, numerous stage and television shows, and several radio spots, Wong remains an outstanding role model for Asian-American performers. This book covers Anna May Wong's entire career through detailed filmographic entries, each containing critical commentary as well as standard cast and technical credits, synopses, and newspaper and magazine reviews. The separate sections detail Wong's stage work and radio and television appearances. Information on Wong's beginnings in Los Angeles and personal life is also provided.

Radio Dec 11 2021 The purpose of this work is to provide scholars and students of popular culture with an evaluative survey of research materials about radio. . . . An interesting introduction provides an overview of radio's history in the U.S. The bibliographic essays throughout the work will hold the attention of readers and cover topics such as networks and station histories, radio drama, news, music, comedy and variety, and sports. All users will discover important sources of information and will appreciate the well-written bibliographic essays. Booklist Following a brief historical overview on radio and its role in American life, chapters offer informative and, within the confines of the format, lively and enjoyable bibliographic essays on individual facets of radio as an entertainment and information medium. . . . Highly recommended. Choice Intended to be an evaluative survey of bibliographical material on the history and development of radio and radio programming in America, this guide identifies and discusses more than 500 written sources relating to radio music, drama, comedy and variety, news, sports and more. An introductory chapter thoroughly analyzes the historical development of the medium--from its inception during the pioneer era, to the network era (radio's Golden Age), to the decline of radio in the 1950s, and finally to the radio renaissance--based largely, on narrowcasting--that began in the 1960s and continues to the present. Greenfield also examines the formation of the FCC, focuses on radio's losing battle with television--the main reason for its decline beginning in 1949--and provides a cogent analysis of the creative thinking underlying not only the concept of today's narrowcasting, but of the current ascendancy of the local station as well. Also addresses are the Press/Radio war of the 1930s, the rise of radio drama, and the enormous influence of rock and roll music on the evolution of radio programming after World War II. A chapter is devoted to networks and station histories and another to issues such as women in radio, advertising, religious broadcasting, and armed forces radio. A list of selected archival collections, radio organizations and associations, and an index complete the volume. Primarily designed for students, scholars, and researchers in the fields of broadcasting and popular culture, this reference deserves a place in university libraries but also has a wealth of information of interest to radio and television professionals. And, because its resources include popular and fan materials as well as standard academic and professional publications, *Radio: A Reference Guide* provides an insightful overview for any informed generalist with an interest in this important facet of American popular culture.

Variation and Co-operative Communication Strategies in Air Traffic Control English Jul 26 2020 The aim of this study is to establish the co-operative communication strategies that are used in air traffic control (ATC) conversations. The research deals with the question: what kind of co-operative communication strategies do pilots and controllers employ in a speech situation with a restricted use of vocabulary, which generally does not permit any deviations from standard phraseology? The strategies in ATC speech are then compared to those used by second language learners. Faerch and Kasper's (1983) taxonomy of communication strategies will serve as a basis for this comparison. The author analyses authentic speech samples from various ATC workstations at Zurich Airport and evaluates various aspects of phraseology training of air traffic controllers.
